

Answers to examination-style questions

Answers	Marks	Examiner's tips
1 (a) diffusion/movement of water; through a partially-permeable membrane; from less negative to more negative/from higher water potential to lower water potential;	3	If you find water potential difficult, try drawing a numbered line starting at 0 and going down with negative numbers. Pure water has a water potential of 0. All solutions have a negative water potential.
(b) (i) 5.55 cm (<i>allow 5.5 or 5.6 only if supported by correct working</i>); $5/0.9 = 5.55$;	2	Correct answer = 2 marks. Correct working but incorrect answer = 1 mark. Always show which numbers you are using for a calculation. You will be credited for the correct working even if you make a mistake working out the final answer.
(ii) 1. T anywhere to left of 0.3 M; 2. W at 0.3 M;	1	
2 (a) (i) microvilli (<i>reject brush border</i>);	1	
(ii) increased surface area (for diffusion);	1	
(b) (i) 90 000 $9 \times 1000/0.1 = 90\,000$;	2	Correct answer = 2 marks. Correct working but incorrect answer = 1 mark. Use the scale bar. Measure the length using a ruler. Length of bar = 9 mm, convert to micrometres by multiplying by 1000 then divide by stated length of scale bar.
(ii) electron microscope has a greater resolving power/objects closer together can be distinguished; electron (beams) have a shorter wavelength;	2	
(c) short diffusion pathway/short pathway to the centre/large surface area to volume ratio for faster/more diffusion;	1	
3 (a) passive/do not require energy/ATP; movement down a concentration gradient/ by diffusion; go through phospholipid (bilayer)/not by protein/carriers;	2	Make sure your answers are correct for oxygen and water. If a word is in bold print, read it very carefully! It is like that for a reason!
(b) active transport; occurs when oxygen present because energy/respiration required <i>OR</i> against a concentration gradient because there is no uptake in curve Z;	2	As soon as you see oxygen or respiration involved with transport, you should be thinking about active transport as this is the only process that uses energy.

Adopting the Melody of Appearance: An Psychological Symphony within **Aqa Biology Nelson Thornes A2 Answers**

In a global used by displays and the ceaseless chatter of immediate connection, the melodic elegance and mental symphony developed by the published word often disappear in to the backdrop, eclipsed by the persistent sound and interruptions that permeate our lives. But, nestled within the pages of **Aqa Biology Nelson Thornes A2 Answers** an enchanting literary treasure full of raw thoughts, lies an immersive symphony waiting to be embraced. Crafted by an elegant musician of language, this interesting masterpiece conducts viewers on a mental trip, skillfully unraveling the hidden songs and profound affect resonating within each carefully crafted phrase. Within the depths of this poignant evaluation, we shall explore the book is central harmonies, analyze its enthralling publishing style, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
