The Arrival of the Fittest Jim Endersby,2025-01-06 In the early twentieth century varied audiences took biology out of the hands of specialists and transformed it into mass culture transforming our understanding of heredity in the process In the early twentieth century communities made creative use of the new theories of heredity in circulation at the time including the now largely forgotten mutation theory of Hugo de Vries Science fiction writers socialists feminists and utopians are among those who seized on the amazing possibilities of rapid and potentially controllable evolution De Vries s highly respected scientific theory only briefly captured the attention of the scientific community but its many fans appropriated it for their own wildly imaginative ends Writers from H G Wells and Edith Wharton to Charlotte Perkins Gilman J B S Haldane and Aldous Huxley created a new kind of imaginary future which Jim Endersby calls the biotopia It took the ambiguous possibilities of biology utopian and dystopian and reimagined them in ways that still influence the public s understanding of the life sciences The Arrival of the Fittest recovers the fascinating long forgotten origins of ideas that have informed works of fiction from Brave New World to the X Men movies all while reflecting on the lessons positive and negative that this period might offer us Where No Black Woman Has Gone Before Diana Adesola Mafe,2018-03-01 A look at African American

women in science fiction fantasy and horror A compelling contribution to the scholarship on speculative cinema and television Journal of American Culture When Lieutenant Uhura took her place on the bridge of the Starship Enterprise on Star Trek the actress Nichelle Nichols went where no African American woman had ever gone before Yet several decades passed before many other black women began playing significant roles in speculative i e science fiction fantasy and horror film and television a troubling omission given that these genres offer significant opportunities for reinventing social constructs such as race gender and class Challenging cinema s history of stereotyping or erasing black women onscreen Where No Black Woman Has Gone Before showcases twenty first century examples that portray them as central figures of action and agency Writing for fans as well as scholars Diana Adesola Mafe looks at representations of black womanhood and girlhood in American and British speculative film and television including 28 Days Later AVP Alien vs Predator Children of Men Beasts of the Southern Wild Firefly and Doctor Who Series 3 Each of these has a subversive black female character in its main cast and Mafe draws on critical race postcolonial and gender theories to explore each film and show placing the black female characters at the center of the analysis and demonstrating their agency The first full study of black female characters in speculative film and television Where No Black Woman Has Gone Before shows why heroines such as Lex in AVP and Zo in Firefly are inspiring a generation of fans just as Uhura did *Cosmic Society* Peter Dickens, James S. Ormrod, 2007-11-08 As the first sociological book to tackle humanity s relationship with the universe this fascinating volume links social theory to classical and contemporary science and proposes a new cosmic social theory Spaceflight Michael J.
