The South African State Transformed? Louis A. Picard, Thomas M. Mogale, Caitlin C. Corrigan, 2024-09-10 This book examines the nature of the 1994 political transition in South Africa and its impact on post apartheid South Africa Specifically it examines the failures of liberalism within the context of the transitional process that led to the institution if not the practice of a non racial state in 1994 The term liberal is an eclectic term defining a several of views political and economic We use the term here within context but essentially define it as a commitment to open views the willingness to consider change and to value basic human rights The nature of institutional change in South Africa as it moved towards a democratic state would influence whether South Africa would succeed as a newly industrializing pluralist democratic country or collapse into yet another African failed state As South Africa moves toward its fourth decade of majority rule the view towards the future is much less promising than it was in 1994
