Object-Oriented Behavioral Specifications Haim Kilov, William Harvey, 2007-08-20 Object Oriented Behavioral Specifications encourages builders of complex information systems to accelerate their move to using the approach of a scientific discipline in analysis rather than the approach of a craft. The focus is on understanding customers' needs and on precise specification of understanding gained through analysis. Specifications must bridge any gaps in understanding about business rules among customers, Subject Matter Experts, and computer people; must inform decisions about reuse of software and systems; and must enable review of semantics over time. Specifications need to describe semantics rather than syntax and to do that in an abstract and precise manner in order to create software systems that satisfy business rules. The papers in this book show various ways of designing elegant and clear specifications which are reusable, lead to savings of intellectual effort, time, and money, and which contribute to the reliability of software and systems. Object Oriented Behavioral Specifications offers a fresh treatment of the object oriented paradigm by examining the limitations of traditional OO methodologies and by describing the significance of competing trends in OO modeling. The book builds on four years of successful OOPSLA workshops 1991-1995 on behavior semantics. This book deals with precise specifications of what is accomplished by the business and what is to be done by a system. The book includes descriptions of successful use of abstract and precise specification in industry. It draws on the experience of experts from industrial and academic settings and benefits from international participation. Collective behavior neglected in some treatment of the OO paradigm is addressed explicitly in this book. The book does not take reuse of specifications or software for granted but furnishes a foundation for taking as rigorous an approach to reuse decisions as to precise specifications in original developments. **Direct and Inverse Problems of**

Mathematical Physics R.P. Gilbert, Joji Kajiwar, Yongzhi S. Xu, 2013-04-17 This volume consists of papers presented in the special sessions on Wave Phenomena and Related Topics and Asymptotics and Homogenization of the ISAAC 97 Congress held at the University of Delaware during June 2-7, 1997. The ISAAC Congress coincided with a U.S.-Japan Seminar also held at the University of Delaware. The latter was supported by the National Science Foundation through Grant INT 9603029 and the Japan Society for the Promotion of Science through Grant MTCS 134. It was natural that the participants of both meetings should interact and consequently several persons attending the Congress also presented papers in the Seminar. The success of the ISAAC Congress and the U.S.-Japan Seminar has led to the ISAAC 99 Congress being held in Fukuoka, Japan, during August 1999. Many of the same participants will return to this Seminar. Indeed, it appears that the spirit of the U.S.-Japan Seminar will be continued every second year as part of the ISAAC Congresses. We decided to include with the papers presented in the ISAAC Congress and the U.S.-Japan Seminar several very good papers by colleagues from the former Soviet Union. These participants in the ISAAC Congress attended at their own expense. This volume has the title Direct and Inverse Problems of Mathematical Physics which consists of the papers on scattering theory, coefficient identification, uniqueness, and

existence theorems boundary controllability wave propagation in stratified media viscous flows nonlinear acoustics Sobolev spaces singularity theory pseudo differential operators and semigroup theory

Biology of Inorganic Nitrogen and Sulfur H. Bothe, A. Trebst, 2012-12-06 Nitrogen and sulfur compounds are continuously synthesized degraded and converted into other forms in nature There are many similarities in the principle problems and basic mechanisms of the biology of inorganic nitrogen and sulfur Many details are not yet understood and hence are the subject of active investigation the world over In May 1980 a conference was held in Bochum Federal Republic of Germany at which attempts were made to discuss and compare all aspects of both the nitrogen and the sulfur cycle Lectures were given by internationally recognized experts on the physiology biochemistry genetics and ecology of dinitrogen fixation of assimilatory and dissimilatory nitrate and sulfate reduction and of ammonia and sulfide oxidation In addition important data were communicated by German scientists of the national program on the Metabolism of Inorganic Nitrogen and Sulfur Compounds supported by the Deutsche Forschungsgemeinschaft This book contains all the contributions to the meeting and consequently should be of interest to researchers teachers and students in the field The members of the German national program on the Metabolism of Inorganic Nitrogen and Sulfur Compounds would like to thank the Deutsche Forschungsgemeinschaft for their generous financial support of the scientific projects during the past four years and for the conference itself Without this help the present book would not have been written The members express their appreciation particularly to Dr A Hoffmann of the Deutsche Forschungsgemeinschaft for her invaluable skill and patience in taking care of the projects and scientists

Quantum Field Theory Peter Breitenlohner, Dieter Maison, 2008-01-11 On the occasion of W Zimmermann's 70th birthday some eminent scientists gave review talks in honor of one of the great masters of quantum field theory It was decided to write them up and publish them in this book together with reprints of some seminal papers of the laureate Thus this volume deepens our understanding of anomalies algebraic renormalization theory axiomatic field theory and of much more while illuminating the past and present state of affairs and pointing to interesting problems for future research

Algebraic, Number Theoretic, and Topological Aspects of Ring Theory Jean-Luc Chabert, Marco Fontana, Sophie Frisch, Sarah Glaz, Keith Johnson, 2023-07-07 This volume has been curated from two sources presentations from the Conference on Rings and Polynomials Technische Universität Graz Graz Austria July 19-24 2021 and papers intended for presentation at the Fourth International Meeting on Integer valued Polynomials and Related Topics CIRM Luminy France which was cancelled due to the pandemic The collection ranges widely over the algebraic number theoretic and topological aspects of rings algebras and polynomials Two areas of particular note are topological methods in ring theory and integer valued polynomials The book is dedicated to the memory of Paul Jean Cahen a coauthor or research collaborator with some of the conference participants and a friend to many of the others This collection contains a memorial article about Paul Jean Cahen written by his longtime research collaborator and coauthor Jean Luc Chabert

Gravity to Thermal Gauge Theories: The AdS/CFT Correspondence Eleftherios Papantonopoulos, 2011-03-26 The AdS CFT correspondence is a powerful tool in studying strongly coupled phenomena in gauge field theories using results from a weakly coupled gravity background studied in the realm of string theory AdS CFT was first successfully applied to the study of phenomena such as the quark gluon plasma produced in heavy ions collisions Soon it was realized that its applicability can be extended in a more phenomenological approach to condensed matter systems and to systems described by fluid dynamics The set of tutorial reviews in this volume is intended as an introduction to and survey of the principle of the AdS CFT correspondence in its field string theoretic formulation its applicability to holographic QCD and to heavy ions collisions and to give a first account of processes in fluid dynamics and condensed matter physics which can be studied with the use of this principle Written by leading researchers in the field and cast into the form of a high level but approachable multi author textbook this volume will be of benefit to all postgraduate students and newcomers from neighboring disciplines wishing to find a comprehensive guide for their future research

Catalysts for Nitrogen Fixation Barry E. Smith, Raymond L. Richards, William E. Newton, 2013-03-20 Biological nitrogen fixation provides more than 50% of the total annual input of the essential element nitrogen to world agriculture Thus it is of immense agronomic importance and critical to food supplies particularly in developing countries This book with chapters authored by internationally renowned experts provides a comprehensive and detailed account of the fascinating history of the process including the surprising discoveries of molybdenum independent nitrogenases and superoxide dependent nitrogenase a review of Man s attempts to emulate the

biological process most successfully with the commercially dominant Haber Bosch process and the current state of the understanding art with respect to the enzymes called nitrogenases responsible for biological nitrogen fixation The initial chapters use a historical approach to the biological and industrial processes followed by an overview of assay methodologies The next set of chapters focuses on the classical enzyme the molybdenum nitrogenase and details its biosynthesis structure composition and mechanism of action as well as detailing both how variants of its two component proteins are constructed by recombinant DNA technology and how computational techniques are being applied The sophisticated chemical modelling of the metal containing clusters in the enzyme is reviewed next followed by a description of the two molybdenum independent nitrogenases first the vanadium containing enzyme and then the iron only nitrogenase together with some thoughts as to why they exist Then follows an up to date treatment of the clearly non classical properties of the superoxide dependent nitrogenase which more closely resembles molybdenum containing hydroxylases and related enzymes like nitrate reductase that it does the other nitrogenases Each chapter contains an extensive list of references This book is the self contained first volume of a comprehensive seven volume series No other available work provides the up to date and in depth coverage of this series and this volume This book is intended to serve as an indispensable reference work for all scientists working in this area including agriculture and the closely related metals in biology area to assist students to enter this challenging area of research and to provide science administrators easy access to vital relevant information

Modern Trends In Chemical Reaction Dynamics - Part Ii: Experiment And Theory Kopin Liu, Xueming Yang, 2004-11-22 The field of chemical reaction dynamics has

made tremendous progress during the last decade or so This is due largely to the development of many new state of the art experimental and theoretical techniques during that period It is beneficial to present these advances both theoretical and experimental in a review volume Parts I and II The primary purpose of this review volume is to provide graduate students and experts in the field with a rather detailed picture of the current status of advanced experimental and theoretical research in chemical reaction dynamics All chapters in these two parts have been written by world renowned experts active in such research
