

<b>Traditional Instruction</b>	<i><b>Example</b></i>	<b>Differentiated Instruction</b>	<i><b>Example</b></i>
<b>A single teaching approach for the entire class</b>	<i>The math teacher works sample word problems on the overhead.</i>	<b>A variety of approaches of lesson delivery</b>	<i>Math teacher works the first step then instructs students to discuss the next steps with a partner.</i>
<b>Student practice looks the same for the entire class.</b>	<i>Students work the odd problems from their textbook on their own with the teacher answering questions.</i>	<b>Students have access to the content through a variety of learning styles.</b>	<i>Students in small groups cycle through centers to tackle word problems visually, with math manipulatives and through journal writing.</i>
<b>Students who have already mastered the material wait until the rest of the class catches up.</b>	<i>A student who worked ahead in the textbook spends the next half of class reading an off-topic book to kill time.</i>	<b>Students who have mastered the material are given "challenge assignments" which deepen their understanding of the content.</b>	<i>These students fill in a graphic organizer which promotes higher level thinking while the rest of the class does basic skill practice of the new concept.</i>
<b>Students have little choice in what they study.</b>	<i>Students who are learning to write research papers are assigned topics randomly by the teacher.</i>	<b>Students are given choice in their areas of study whenever possible.</b>	<i>Students choose a topic for their papers which is of interest to them from within guidelines established by the teacher.</i>
<b>Students are all expected to have the same outcomes and progress is judged using the same guidelines for everyone.</b>	<i>Students are assigned a five-paragraph essay, and those who do not perform up to the set standard fail.</i>	<b>The teacher modifies the grading rubric to take into account varying levels of readiness for this assignment among students.</b>	<i>A student struggling with writing would be given a modified version of the assignment which would still be challenging but more appropriate for his current skill set.</i>

*Handbook of Language Program Development and Administration* Alan V. Brown, Cori Crane, Beatrice C. Dupuy, Estela Ene, 2025-06-30 Second language program development and administration is a long standing area within the larger field of applied linguistics In many ways it is the quintessential applied linguistics field as it crosses disciplinary boundaries while balancing the rigors of scholarly inquiry with the demands of practical application without losing sight of concrete learner outcomes The Routledge Handbook of Language Program Development and Administration provides a scholarly rigorous yet practically relevant treatment of issues implicated in program development and administration with 52 chapters written by leading scholars in the field Authors not only address the theoretical underpinnings of their respective topics but also provide actionable evidence based recommendations concerning eminently practical matters In this way the volume provides both novice and experienced language program administrators with important guidance on how to think about the work that they do and how best to go about it while also validating language program administration as a scholarly area of inquiry The Routledge Handbook of Language Program Development and Administration is essential reading for practicing second language program administrators at the post secondary level in service and pre service second language instructors graduate students in applied linguistics and even upper level undergraduate education students considering second language teaching as a future career Chapters 9 and 11 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license
