**AppleScript: The Missing Manual** Adam Goldstein, 2005-01-31 From newspapers to NASA, Mac users around the world use AppleScript to automate their daily computing routines. Famed for its similarity to English and its ease of integration with other programs, AppleScript is the perfect programming language for time-squeezed Mac fans. As beginners quickly realize, however, AppleScript has one major shortcoming: it comes without a manual. No more. You don't need a degree in computer science, a fancy system administrator title, or even a pocket protector and pair of nerdy glasses to learn the Mac's most popular scripting language; you just need the proper guide at your side. *AppleScript: The Missing Manual* is that guide. Brilliantly compiled by author Adam Goldstein, *AppleScript: The Missing Manual* is brimming with useful examples. You'll learn how to clean up your Desktop with a single click, for example, and how to automatically optimize pictures for a website. Along the way, you'll learn the overall grammar of AppleScript so you can write your own customized scripts when you feel the need. Naturally, *AppleScript: The Missing Manual* isn't merely for the uninitiated scripter. While its hands-on approach certainly keeps novices from feeling intimidated, this comprehensive guide is also suited for system administrators, web and graphics professionals, musicians, scientists, mathematicians, engineers, and others who need to learn the ins and outs of AppleScript for their daily work. Thanks to *AppleScript: The Missing Manual*, the path from consumer to seasoned scripter has never been clearer. Now you too can automate your Macintosh in no time.

*Transparent Designs* Michael L. Black, 2022-03-29 The author traces the emergence in the late 1970s and early 1980s of the belief that personal computers should be easy to use. He asks readers to consider the consequences of a computational culture grounded in the assumption that the average person does not need to know much, if anything, about the internal operations of the computers we have come to depend on.
