Any Body There? Craig Michael Mueller, 2017-07-21 Any body there we may wonder as we watch people engage with their smart phones while being oblivious to what is going on around them Anybody there is the question facing the church as it wrestles with declining religious affiliation Craig Mueller considers this contemporary context and offers a response based in an incarnational spirituality accentuating the body and finding expression in corporate multisensory liturgy Mueller creatively weaves together topics from our digital lives with personal and congregational stories and theological liturgical and spiritual reflections Concepts such as virtuality the analog 24 7 connectivity access design and GPS are juxtaposed with themes of embodiment mortality sabbath mystery beauty and vocation Drawing on his experience as a pastor to millennials his studies in liturgical theology and his work on the effects of technology on daily life Mueller proposes that corporate worship is an antidote to the distraction fragmentation and spiritual hunger in society today As humans continue to merge with machines participation in the Sunday liturgy reminds us of what it means to be human a deeper connection to our bodies and the earth and a clear sense of purpose and mission for our everyday lives

Branding and Designing Disability Elizabeth DePoy, Stephen Gilson, 2014-06-27 Over the past fifty years design and branding have become omnipotent in the market and have made their way to other domains as well Given their potential to divide humans into categories and label their worth and value design and branding can wield immense but currently unharnessed powers of social change Groups designed as devalued can be undesigned redesigned and rebranded to seamlessly and equivalently participate in community work and civic life This innovative book argues that disability as a concept and category is created reified and segregated through current design and branding that begs for creative change Transcending models of disability that locate it either as an embodied medical condition or as a socially constructed entity this book challenges the very existence and usefulness of the category itself Proposing and illustrating creative and responsible design DePoy and Gilson include thinking and action strategies that are useful and potent for undesigning redesigning and rebranding to meet the full range of human needs and to enhance full participation in local through global communities Divided into two parts the first section presents a critical examination of disability as a designed and branded phenomenon exploring what exactly is being designed and branded and how The second part investigates the redesign of disability and provides principles for redesign and rebranding illustrated with examples from high tech to place based sustainable strategies The book provides a unique and contemporary framework for thinking about disability as well as providing relevant design and branding guidance to designers and engineers interested in embodiment issues
