Evaluating Participatory Mapping Software Charla M. Burnett, 2023-04-21 This volume provides a framework for evaluating geospatial software for participatory mapping The evaluation is based on ten key indicators ethics cost technical level inclusiveness data accuracy data privacy analytical capacity visualization capacity openness and accessibility i e mobile friendly or offline capabilities Each application is evaluated by a user and cross analyzed with specific case studies of the software s real world application This framework does not discriminate against assessing volunteered geographic information VGI applications as a form of participatory mapping in circumstances that its application is spearheaded by underrepresented groups with the intent to empower and spark political or behavioral change within formal and informal institutions Each chapter follows a strict template to ensure that the information within the volume can be updated periodically to match the ever changing technological environment The book covers ten different mapping applications with the goal of creating a comparative evaluation framework that can be easily interpreted by convening institutions and novice users This will also help identify gaps in software for participatory mapping which will help to inform application development in the future and updates to current geospatial software *Intelligent Networks and Systems* Nazmul Siddique, Mohammad Shamsul Arefin, Sheak Rashed Haider Noori, M Shamim Kaiser, 2025-09-30 In today s fast evolving tech landscape *Intelligent Networks and Systems* Advanced Technologies and Applications explores cutting edge innovations in intelligent systems and their real world impact From smart grids and IoT applications to machine learning driven network optimization and cybersecurity this book covers the key technologies shaping modern infrastructure Balancing technical depth with clear engaging writing this book is designed for researchers industry professionals and tech enthusiasts alike It not only unpacks the latest advancements but also examines ethical and regulatory challenges as intelligent networks become more integrated into everyday life As these technologies continue to transform industries this book serves as a vital resource for staying ahead Whether you re looking to deepen your expertise or apply these concepts in practice this book will guide and inspire your journey into the future of intelligent technology [Search and research](#) Ana GARCÍA-VALCÁRCEL, Francisco José GARCÍA PEÑALVO, Marta MARTÍN DEL POZO, 2017-06-27 Descripci n Resumen Ingl s The present volume represents a compilation of international teacher education practice and research with a focus on Teacher Education for Contemporary Contexts It draws upon the diverse educational perspectives teaching procedures knowledge and situated contexts where the discipline takes shape The sections of this book comprise research papers accepted for presentation during the 18th International Study Association on Teachers and Teaching ISATT Biennial Conference that will take place from July 3rd to July 7th in Salamanca Spain Around 300 delegates from 57 countries across the globe and a large Scientific Committee of 80 colleagues have contributed academically and professionally to support our ability to share the contents of this volume The main conference topic is search and research Searching is the action of

looking carefully at people objects and situations in order to find something concealed or to discover something beyond the ordinary This is what teachers do in their classrooms and primarily search represents their endeavours to construct professional knowledge as a result of developing practice Researching is systematic inquiry that intends to discover new knowledge and or to refute educational theories a process typically rendered by teacher educators and other researchers The focus of this 18th biennial ISATT conference is to bring together both search and research connecting practice and theory or praxis with the purpose of offering relevant solutions to realistic classroom problems The editorial process followed three differentiated phases The first phase required abstract submission with the purpose of being accepted for the conference A double or triple blind review was conducted to evaluate whether the papers submitted were suitable for the conference A rate of 87% of the papers were accepted for presentation The second phase encouraged authors to voluntarily submit a full paper of 3 000 words A total of 111 full papers were then subjected to an open review process with the main purpose of suggesting to authors ways of further improving the presentation of their valuable research A third phase not yet completed and therefore beyond the scope of this book was the review and selection of the outstanding papers papers that were deemed eligible for the post proceeding publication i e less than 15% of the total The central intent of the book is to contribute to fostering scholarly discussions and to inform future teaching trajectories strengthen lines of research in teacher education and demonstrate the opportunities and constraints in our professional work Its added value highlights the commonplace in international research that serves to depict how the field of teacher education is moving forward in an increasingly global society All in all teachers teacher educators and researchers learn by effective communication processes whether in in personal professional interactions or in the use of digital technologies Positive interactions lead to building strong communities of learners which in turn leads to the production of valuable knowledge and better understandings about learning and teaching With the upcoming commemoration of its 800th anniversary in the year 2018 the University of Salamanca as the oldest university in operation in Spain is proud to host the ISATT 18th biennial conference and to support the exceptional work of many researchers in the field of Teacher Education by compiling and editing the work in this volume Furthermore the local Organizing Committee and the ISATT Executive Committee hope you will experience a rewarding intellectual experience as a result of your contributions and knowledge as both academics and practitioners Thank you very much for providing us this exciting opportunity to work with you We warmly welcome you to Salamanca a truly historic and a contemporary context

Descripci n Resumen Espa ol Castellano El presente volumen est integrado por una recopilaci n de pr cticas e investigaciones internacionales de formaci n docente centradas en la formaci n de profesores en la sociedad actual Se basa en las diversas perspectivas educativas los procedimientos de ense anza conocimiento y contextos sociales Las secciones de este libro comprenden trabajos de investigaci n aceptados para su exposici n en las XVIII Conferencia Bienal Internacional de Estudios de Profesores y Ense anza ISATT que tendr lugar del 3 al 7 de julio en Salamanca Espa a Alrededor

de 300 delegados de 57 países de todo el mundo y un gran Comité Científico de 80 colegas han contribuido académica y profesionalmente en favor de este evento. El tema principal de la conferencia es la búsqueda y la investigación. Buscar es la acción de mirar cuidadosamente a las personas, objetos y situaciones para encontrar algo escondido o descubrir algo más allá de lo ordinario. Esto es lo que los maestros hacen en sus clases y sobre todo la búsqueda representa sus esfuerzos para construir conocimiento profesional como resultado del desarrollo de la práctica cotidiana. La investigación es una investigación sistemática que pretende descubrir nuevos conocimientos y o refutar teorías educativas, un proceso que suelen dar los educadores, profesores y de otros investigadores. El objetivo de esta 18 conferencia ISATT es reunir tanto la búsqueda como la investigación conectando la práctica y la teoría o praxis con el propósito de ofrecer soluciones relevantes a los problemas reales de la clase. El proceso editorial siguió tres fases diferenciadas: 1. Requerir el envío de resúmenes con el propósito de que fuesen aceptados para la ser expuestos en la conferencia. Se realizó una revisión doble ciego o triple para evaluar si los artículos presentados eran adecuados. Se aceptó una tasa de 87% de los trabajos para su presentación. 2. La segunda fase requirió de los autores en envío en período voluntario de un trabajo completo de 3 000 palabras. Un total de 111 trabajos fueron sometidos a un proceso de revisión abierta con el propósito principal de sugerir a los autores formas de mejora. 3. Una tercera fase aún inconclusa y por lo tanto fuera del alcance de este libro fue la revisión y selección de los documentos. Pendientes los documentos que se consideraron electos para la publicación posterior al procedimiento es decir menos del 15% del total. La intención central de esta obra es contribuir a fomentar el debate académico e informar sobre futuras trayectorias de enseñanza, fortalecer las líneas de investigación en la formación del profesorado y demostrar las oportunidades y limitaciones en nuestro ámbito. Su valor es el de destacar el lugar común en la investigación internacional que sirve para describir cómo el campo de la formación de maestros avanza en una sociedad cada vez más global. En general los maestros, los educadores de educadores y los investigadores aprendan mediante procesos de comunicación eficaces ya sea en interacciones personales, profesionales o en el uso de tecnologías digitales. Las interacciones conducen a la construcción de comunidades fuertes de estudiantes que a su vez conduce a la producción de conocimientos valiosos y mejores sobre el aprendizaje y la enseñanza. Con la próxima conmemoración de su 800 aniversario en el año 2018 la Universidad de Salamanca como la decana de las españolas se enorgullece en acoger la XVIII Conferencia Bienal de ISATT y apoyar el trabajo excepcional de muchos investigadores en el campo del Profesorado. Educador e Investigador editando la obra. Además el Comité Organizador Local y el Comité Ejecutivo de ISATT esperan que experimente una lectura gratificante como resultado de sus contribuciones y conocimientos tanto académicos como profesionales. Muchas gracias por brindarnos esta emocionante oportunidad de trabajar con usted. Les damos la bienvenida a Salamanca un contexto verdaderamente histórico y a su vez contemporáneo.

Mobile Solutions and Their Usefulness in Everyday Life Sara Paiva,2018-12-11 This book provides an insight into recent technological trends and innovations in solutions and platforms to improve mobility of visually impaired people The authors goal is to help to contribute to the social and societal inclusion of the visually impaired The book s topics include but are not limited to obstacle detection systems indoor and outdoor navigation transportation sustainability systems and hardware devices to aid visually impaired people The book has a strong focus on practical applications tested in a real environment Applications include city halls municipalities and companies that must keep up to date with recent trends in platforms methodologies and technologies to promote urban mobility Also discuss are broader realms including education health electronics tourism and transportation Contributors include a variety of researchers and practitioners around the world

Smart Computing Techniques and Applications Suresh Chandra Satapathy,Vikrant Bhateja,Margarita N. Favorskaya,T. Adilakshmi,2021-07-13 This book presents best selected papers presented at the 4th International Conference on Smart Computing and Informatics SCI 2020 held at the Department of Computer Science and Engineering Vasavi College of Engineering Autonomous Hyderabad Telangana India It presents advanced and multi disciplinary research towards the design of smart computing and informatics The theme is on a broader front which focuses on various innovation paradigms in system knowledge intelligence and sustainability that may be applied to provide realistic solutions to varied problems in society environment and industries The scope is also extended towards the deployment of emerging computational and knowledge transfer approaches optimizing solutions in various disciplines of science technology and health care

Resource Management on Distributed Systems Shikharesh Majumdar,2024-09-06 Comprehensive guide to the principles algorithms and techniques underlying resource management for clouds big data and sensor based systems Resource Management on Distributed Systems provides helpful guidance by describing algorithms and techniques for managing resources on parallel and distributed systems including grids clouds and parallel processing based platforms for big data analytics The book focuses on four general principles of resource management and their impact on system performance energy usage and cost including end of chapter exercises The text includes chapters on sensors autoscaling on

clouds complex event processing for streaming data and data filtering techniques for big data systems The book also covers results of applying the discussed techniques on simulated as well as real systems including clouds and big data processing platforms and techniques for handling errors associated with user predicted task execution times Written by a highly qualified academic with significant research experience in the field Resource Management on Distributed Systems includes information on sample topics such as Attributes of parallel distributed applications that have an intimate relationship with system behavior and performance plus their related performance metrics Handling a lack of a prior knowledge of local operating systems on individual nodes in a large system Detection and management of complex events that correspond to the occurrence of multiple raw events on a platform for streaming analytics Techniques for reducing data latency for multiple operator based queries in an environment processing large textual documents With comprehensive coverage of core topics in the field Resource Management on Distributed Systems is a comprehensive guide to resource management in a single publication and is an essential read for professionals researchers and students working with distributed systems

Design Computing and Cognition '14 John S. Gero, Sean Hanna, 2015-04-16 This book details the state of the art of research and development in design computing and design cognition It features more than 35 papers that were presented at the Sixth International Conference on Design Computing and Cognition DCC 14 held at University College London UK Inside readers will find the work of expert researchers and practitioners that explores both advances in theory and application as well as demonstrates the depth and breadth of design computing and design cognition This interdisciplinary coverage which includes material from international research groups examines design synthesis design cognition design creativity design processes design theory design grammars design support and design ideation Overall the papers provide a bridge between design computing and design cognition The confluence of these two fields continues to build the foundation for further advances and leads to an increased understanding of design as an activity whose influence continues to spread As a result the book will be of particular interest to researchers developers and users of advanced computation in design and those who need to gain a better understanding of designing that can be obtained through empirical studies

Modelling, Simulation and Applications of Complex Systems Mohd Hafiz Mohd, Md Yushalify Misro, Syakila Ahmad, Doanh Nguyen

Ngoc, 2021-06-10 This book discusses the latest progresses and developments on complex systems research and intends to give an exposure to prospective readers about the theoretical and practical aspects of mathematical modelling numerical simulation and agent based modelling frameworks The main purpose of this book is to emphasize a unified approach to complex systems analysis which goes beyond to examine complicated phenomena of numerous real life systems this is done by investigating a huge number of components that interact with each other at different microscopic and macroscopic scales new insights and emergent collective behaviours can evolve from the interactions between individual components and also with their environments These tools and concepts permit us to better understand the patterns of various real life systems and

help us to comprehend the mechanisms behind which distinct factors shaping some complex systems phenomena being influenced This book is published in conjunction with the International Workshop on Complex Systems Modelling Simulation 2019 CoSMoS 2019 IoT Big Data Integration This international event was held at the Universiti Sains Malaysia Main Campus Penang Malaysia from 8 to 11 April 2019 This book appeals to readers interested in complex systems research and other related areas such as mathematical modelling numerical simulation and agent based modelling frameworks *Handbook of AI-Based Models in Healthcare and Medicine* Bhanu Chander,Koppala Guravaiah,B. Anoop,G. Kumaravelan,2024-02-21 This handbook provides thorough in depth and well focused developments of artificial intelligence AI machine learning ML deep learning DL natural language processing NLP cryptography and blockchain approaches along with their applications focused on healthcare systems Handbook of AI Based Models in Healthcare and Medicine Approaches Theories and Applications highlights different approaches theories and applications of intelligent systems from a practical as well as a theoretical view of the healthcare domain It uses a medically oriented approach in its discussions of human biology healthcare and medicine and presents NLP based medical reports and medicine enhancements The handbook includes advanced models of ML and DL for the management of healthcare systems and also discusses blockchain based healthcare management In addition the handbook offers use cases where AI ML and DL can help solve healthcare complications Undergraduate and postgraduate students academicians researchers and industry professionals who have an interest in understanding the applications of ML DL in the healthcare setting will want this reference on their bookshelf **Intelligent Computing and Applications**
