which takes a holistic approach towards sustainable agricultural production technologies that result in maximum profit for the farming community. Also, it considers practices that care for natural resource bases and leave behind minimal environmental footprints. To keep prepared for climate change and natural disasters, appropriate contingency measures to tackle these unwanted situations are detailed. The book offers comprehensive coverage of the most essential topics including Modern technologies, new concepts and innovations such as 3D farming, Integrated System of Rice Intensification (ISRI), hydroponics, rooftop farming, and water budgeting. The use of IT for supporting IFS and environmental aspects related to greenhouse gas (GHG) emission. Information on organic farming covering all its aspects, present situation, market related issues, and future options. In situ input generation procedures that are integral to recycling and their effective reuse. Region specific IFS models based on soil, climate, and farmers' requirements for different agroclimatic situations. IFS management aspects including water harvesting, conservation, increased productivity, and drainage. Latest information on the socio-economic factors, impacts, government orientations, policy framework towards agriculture and environmental aspects, and the future road map to make IFS a success. This book will serve as a handy reference for academics, researchers, students, progressive farmers, and policymakers aiming to make agriculture more resilient, sustainable, and eco-friendly.

Corporate Governance and IFRS in the Middle East Muath Abdelqader, Tamer K. Darwish, Khalil Nimer, 2022-12-14. The rapid globalization of capital markets has increased attention toward examining the quality of the disclosure practices implemented by companies as internationalization and globalization are the most important motives of the harmonization of financial statements preparation and presentation. Given the expansion of trade and the openness to foreign capital markets, investment decisions became not limited only for local users but also international users may need to access the financial information. The issuance of International Financial Reporting Standards (IFRS) to be used throughout the world aims to improve the comparability and understandability of financial statements and hence to enhance investment decisions through helping investors across the borders to invest in multinational companies. Although fluid and under developed institutional arrangements remain central features of emerging markets, ensuring effective corporate governance mechanisms would indeed support companies in complying with IFRS. The latter imposes a challenge for companies operating in emerging markets. This book evaluates the differences in the level of compliance with IFRS across the GCC states, exploring the impact of corporate governance on the level of compliance with IFRS and presenting an empirical analysis of companies across the GCC. It makes an important contribution by providing a detailed empirical analysis of the interplay between corporate governance and IFRS in emerging market setting and highlights the way for future research. It will provide international business management and accounting and finance students and senior practitioners with a completely new and updated guide to the work in the field of corporate governance and IFRS compliance in emerging markets.
