Applied Imagination Alex Faickney Osborn, 1957 *Applied Imagination; Principles and Procedures of Creative Problem-solving* Alex Faickney Osborn, 1963 Applied Imagination Alex F. Osborn, 1965 *Applied Imagination* Alexander Faickney Osborn, 1963 **Applied Imagination - Principles and Procedures of Creative Writing** Alex Osborn, 2011-06 Reprint Originally published New York Scribner 1953 **Applied Imagination** Alex F. Osborn, 1967 **Applied Imagination - Principles and Procedures of Creative Writing** Alex Osborn, 2012-10-19 The purpose of this book is to present the principles and procedures of creative thinking Chapters included are the all importance of imagination indispensability of creativity in science Many of the earliest books particularly those dating back to the 1900s and before are now extremely scarce and increasingly expensive We are republishing these classic works in affordable high quality modern editions using the original text and artwork **Teaching Children to Think** Robert Fisher, 2005 This book is for anyone interested in teaching children how to think to reason and solve problems Robert Fisher reviews the main concepts methods and research in the teaching of thinking skills developed in recent years The second edition provides practical ideas to develop the thinking and learning in children of all ages and abilities **Knowledge-Based Intelligent Information and Engineering Systems** Ignac Lovrek, Robert J. Howlett, L. C. Jain, 2008-08-18 Annotation The three volume set LNAI 5177 LNAI 5178 and LNAI 5179 constitutes the refereed proceedings of the 12th International Conference on Knowledge Based Intelligent Information and Engineering Systems KES 2008 held in Zagreb Croatia in September 2008 The 316 revised papers presented were carefully reviewed and selected The papers present a wealth of original research results from the field of intelligent information processing in the broadest sense topics covered in the first volume are artificial neural networks and connectionists systems fuzzy and neuro fuzzy systems evolutionary computation machine learning and classical AI agent systems knowledge based and expert systems intelligent vision and image processing knowledge management ontologies and data mining Web intelligence text and multimedia mining and retrieval and intelligent robotics and control **Manual for a Correspondence Course in Applied Imagination** James Edward Gates, 1958 **Encyclopedia of the Sciences of Learning** Norbert M. Seel, 2011-10-05 Over the past century educational psychologists and researchers have posited many theories to explain how individuals learn i e how they acquire organize and deploy knowledge and skills The 20th century can be considered the century of psychology on learning and related fields of interest such as motivation cognition metacognition etc and it is fascinating to see the various mainstreams of learning remembered and forgotten over the 20th century and note that basic assumptions of early theories survived several paradigm shifts of psychology and epistemology Beyond folk psychology and its naive theories of learning psychological learning theories can be grouped into some basic categories such as behaviorist learning theories connectionist learning theories cognitive learning theories constructivist learning theories and social learning theories Learning theories are not limited to psychology and related fields

of interest but rather we can find the topic of learning in various disciplines such as philosophy and epistemology education information science biology and as a result of the emergence of computer technologies especially also in the field of computer sciences and artificial intelligence As a consequence machine learning struck a chord in the 1980s and became an important field of the learning sciences in general As the learning sciences became more specialized and complex the various fields of interest were widely spread and separated from each other as a consequence even presently there is no comprehensive overview of the sciences of learning or the central theoretical concepts and vocabulary on which researchers rely The Encyclopedia of the Sciences of Learning provides an up to date broad and authoritative coverage of the specific terms mostly used in the sciences of learning and its related fields including relevant areas of instruction pedagogy cognitive sciences and especially machine learning and knowledge engineering This modern compendium will be an indispensable source of information for scientists educators engineers and technical staff active in all fields of learning More specifically the Encyclopedia provides fast access to the most relevant theoretical terms provides up to date broad and authoritative coverage of the most important theories within the various fields of the learning sciences and adjacent sciences and communication technologies supplies clear and precise explanations of the theoretical terms cross references to related entries and up to date references to important research and publications The Encyclopedia also contains biographical entries of individuals who have substantially contributed to the sciences of learning the entries are written by a distinguished panel of researchers in the various fields of the learning sciences
