administrative burden it imposes on firms eliminating transfer pricing complexity for intra firm transactions achieving equal weighting of the sales factor the labour factor and the asset factor in the formula application of destination based rule for attributing the sales factor and replacing the traditional permanent establishment nexus with a factor presence nexus The presentation incorporates extensive comparison between the EU s formulary apportionment tax reform option and FA systems existing in the United States US at state level including reference to relevant US case law and legislation As a possible option to address the problem of base erosion and profit shifting BEPS formulary apportionment is gaining increasing acceptance and attention This book will prove invaluable to taxation authorities tax practitioners and scholars in its deeply informed and systematic guidance on good practices and prevention of problematic experiences in establishing and implementing an effective and market neutral FA system

Justice, Equality and Tax Law Nevja Čičin-Šain, Mario Riedl, 2022-10-05 An in depth analysis of the specific aspects of justice equality and tax law Justice Equality and Tax Law is a topic that is both old and new at the same time Even if the society changes the demands that tax needs to be just and equal seem to be immutable What changes of course is the perception of the content of those demands International taxation post BEPS has been fraught with new challenges that warranted urgent responses These challenges were mainly provoked by the unprecedented rise of the digital economy which truly marked a change in the way business is conducted how value is created and how goods and services are produced and consumed Digitalization in turn had repercussions on all aspects of taxation direct taxation indirect taxation and even tax procedures For instance the quest for more justice and equality in

profit taxes was the reason why in October 2021 a historical deal based on a two pillar solution to address the tax challenges arising from the digitalization of the economy was negotiated within the OECD G20 Inclusive Framework on Base Erosion and Profit Shifting and agreed upon by 137 member countries. It was also the motive behind the shift from a typical vendor collection model to an intermediary collection model supported by centralized registration points in indirect taxes notably the VAT/GST. Abundant data from the European Union or the OECD signaled an ever increasing gap between expected VAT revenues and VAT actually collected making it obvious that the classical system of VAT/GST collection was unable to respond to challenges posed by the digital economy. Therefore new solutions based on the participation of digital platforms as intermediaries had been introduced. Finally new technologies such as blockchain paved new avenues in enhancing tax compliance. In this context this volume entitled *Justice, Equality and Tax Law* contains not only a selection of the best master's theses of the full time LL.M programme in 2021/2022 but also represents an in depth analysis of various aspects of this evergreen topic.

Multilateral Cooperation in Tax Law Martin Klokár, Katharina Moldaschl, 2023-10-03. An in depth analysis of various aspects of multilateral cooperation in tax law. Tax evasion and aggressive tax planning causing base erosion and profit shifting BEPS has been a widely discussed topic among academics and tax policy makers over the past decades. Increasing globalization and digitalization have contributed to the intensification of this issue in recent years. At the same time states continue to largely insist on their sovereignty in the area of tax law. However due to their cross border nature issues related to BEPS are shared problems among the states and can typically not be solved by a single nation. Therefore multilateral cooperation represents an option to build a bridge between the states demand for sovereignty and the problems caused by BEPS. In this regard the OECD the UN and the EU play an important role in introducing international tax standards in an attempt to effectively address tax evasion and aggressive tax planning in many ways. The interaction and cooperation between different international supranational EU and regional organizations is an ongoing process. In this context the topic *Multilateral Cooperation in Tax Law* was selected as the general topic for the master's theses of the part time 2021/23 class of the postgraduate LL.M programme in International Tax Law at WU Vienna University of Economics and Business. This volume aims to develop academic insights provide practical guidance and enable an in depth analysis of various aspects of this topic. The book is divided into four parts. The first part deals with a general overview of the understanding of multilateral cooperation the background that led to the need for multilateral cooperation and the different stakeholders that play a relevant role in it. While the chapters included in the second part focus on the most

important developments on an international level OECD and UN the chapters encompassed in the third part analyse the multilateral cooperation initiatives of the EU Finally the chapters included in part four deal with selected issues related to multilateral cooperation in tax law including mutual assistance and exchange of information dispute resolution mechanisms and measures in digitalized businesses Research Handbook on European Union Taxation Law Christiana HJI
