Advances in Molecular Toxicology Claude Reiss, Simone Parvez, Gilles Labbe, 1998-02 Molecular toxicology is on the way to setting a new standard in toxic risk assessment with the powerful help of concepts and methods developed in the fields of molecular and cellular biology The methods of molecular toxicology are endowed with qualities not always secured in more traditional approaches to toxicity assessment These methods are easily standardized reliable reproducible and require only tiny amounts of the xenobiotic They are much simpler faster and less costly than current tests on animals and can be implemented with modest laboratory resources This volume of *Advances in Molecular Toxicology* represents a collection of invited papers presented at the First European Workshop on Molecular Toxicology in Sophia Antipolis France The book covers 8 selected topics in molecular toxicology The first two are devoted to physics dealing respectively with advanced instrumentation enabling location and quantification of xenobiotics in cells and organs with ultimate precision and computer assisted assessment of risk QSAR A comprehensive and up to date survey of molecular toxicology in the pharmaceutical industry is contributed by a pioneer in this field The third section addresses the effect of xenobiotics on cell cycle actors Sections 4 6 deal with molecular toxicology in skin kidney nerve liver and pancreatic cells The last two sections describe methods to probe DNA damage and repair and immunotoxicity

Cellular and Molecular Toxicology J.P. Vanden Heuvel,W.F. Greenlee,G.H. Perdew,William B. Mattes,2002-02-14

Volume 14 in the series Comprehensive Toxicology extends and complements the previously published 13 volume set This volume will be available separately Toxicology is the study of the nature and actions of chemicals on biological systems In more primitive times it really was the study of poisons However in the early 1500s it was apparent to Paracelsus that the dose differentiates a poison and a remedy Clearly the two most important tenets of toxicology were established during that time The level of exposure dose and the duration of exposure time will determine the degree and nature of a toxicological response Since that time the discipline of toxicology has made major advances in identifying and characterizing toxicants The growth of toxicology as a scientific discipline has been driven to a large extent by the use of extremely powerful molecular and cell biology techniques The overall aim of this volume is to demonstrate how these advances are being used to elucidate causal pathways or linkages for potential adverse health consequences of human exposure to environmental chemicals or radiation A unique feature of this volume is its illustration of how carefully designed studies of the molecular mechanisms of chemical action provide not only understanding of the potential toxicity of the chemical under investigation but also new insights into the functioning of the biological system used as an experimental model Each chapter contains a listing of major peer reviewed articles and reviews and useful web sites In addition each chapter contains a broad introductory section that outlines the subsequent sections These Introductory and Overview sections are designed to be stand alone chapters and may be packaged as a textbook in graduate level courses

Decision Support Systems for Weed Management Guillermo R. Chantre,José L. González-Andújar,2020-07-31 Weed management Decision Support Systems DSS are increasingly important computer based tools for modern agriculture Nowadays extensive agriculture has become highly dependent on external inputs and both economic costs as well the negative environmental impact of agricultural activities demands knowledge based technology for the optimization and protection of non renewable resources In this context weed management strategies should aim to maximize economic profit by preserving and enhancing agricultural systems Although previous contributions focusing on weed biology and weed management provide valuable insight on many aspects of weed species ecology and practical guides for weed control no attempts have been made to highlight the forthcoming importance of DSS in weed management This book is a first attempt to integrate concepts and practice providing a novel guide to the state of art of DSS and the future prospects which hopefully would be of interest to higher level students academics and professionals in related areas

Cellular and Molecular Toxicology and In Vitro Toxicology Daniel Acosta,2017-07-28 This work concentrates on cellular and molecular toxicity of selected well known drugs or chemicals on the cardiovascular system The

primary objective is to provide a better understanding of the mechanisms by which xenobiotics are toxic to mammalian tissues and cells. The use of in vitro cellular and tissue systems provides attractive experimental models to assess toxic manifestations of xenobiotics. This work addresses the most recent findings on the cellular and molecular mechanisms of toxicity of several important cardiotoxic agents: doxorubicin, ethanol, cocaine, and the catecholamines. It presents an overview of vascular toxins and their biochemical effects. Included is a summary of in vitro cardiovascular techniques for assessing toxicity of xenobiotics. This publication is important for those in toxicology, tissue culture, pharmacology, in vitro toxicology, developmental biology, and related areas.

Information Resources in Toxicology, Volume 1: Background, Resources, and Tools, 2020-05-16

This new fifth edition of *Information Resources in Toxicology* offers a consolidated entry portal for the study, research, and practice of toxicology. Both volumes represent a unique, wide-ranging, curated international annotated bibliography and directory of major resources in toxicology and allied fields such as environmental and occupational health, chemical safety, and risk assessment. The editors and authors are among the leaders of the profession, sharing their cumulative wisdom in toxicology's subdisciplines. This edition keeps pace with the digital world in directing and linking readers to relevant websites and other online tools. Due to the increasing size of the hardcopy publication, the current edition has been divided into two volumes to make it easier to handle and consult.

Volume 1: Background, Resources, and Tools arranged in 5 parts, begins with chapters on the science of toxicology, its history, and informatics framework. In Part 1, Part 2 continues with chapters organized by more specific subject, such as cancer, clinical toxicology, genetic toxicology, etc. The categorization of chapters by resource format, for example, journals and newsletters, technical reports, organizations, constitutes Part 3. Part 4 further considers toxicology's presence via the Internet, databases, and software tools. Among the miscellaneous topics in the concluding Part 5 are laws and regulations, professional education, grants and funding, and patents.

Volume 2: The Global Arena offers contributed chapters focusing on the toxicology contributions of over 40 countries, followed by a glossary of toxicological terms and an appendix of popular quotations related to the field. The book, offered in both print and electronic formats, is carefully structured, indexed, and cross-referenced to enable users to easily find answers to their questions or serendipitously locate useful knowledge they were not originally aware they needed. Among the many timely topics receiving increased emphasis are disaster preparedness, nanotechnology, omics, risk assessment, societal implications such as ethics, and the precautionary principle, climate change, and children's environmental health.

Introductory chapters provide a backdrop to the science of toxicology, its history, the origin and status of toxicoinformatics, and starting points for identifying resources. Offers an extensive array of chapters organized by subject, each highlighting resources such as journals, databases, organizations, and review articles. Includes chapters with an emphasis on format, such as government reports, general interest publications, blogs, and audiovisuals.
