Encyclopedia of Immigrant Health Sana Loue, Martha Sajatovic, 2014-06-20 There is increasing interest in the scientific literature on immigrant health and its impact on disease transmission disease prevention health promotion well being on an individual and population level health policy and the cost of managing all these issues on an individual institutional national and global level The need for accurate and up to date information is particularly acute due to the increasing numbers of immigrants and refugees worldwide as the result of natural disasters political turmoil the growing numbers of immigrants to magnet countries and the increasing costs of associated health care that are being felt by governments around the world

Format and Scope The first portion of the encyclopedia contains chapters that are approximately 25 to 40 manuscript pages in length Each overview chapter includes a list of references and suggested readings for cross referencing within the encyclopedia The opening chapters are Immigration in the Global Context Immigration Processes and Health in the U S A Brief History Alternative and Complementary Medicine Culture Specific Diagnoses Health Determinants Occupational and Environmental Health Methodological Issues in Immigrant Health Research Ethical Issues in Research with Immigrants and Refugees Ethical Issues in the Clinical Context The second portion of the book consists of alphabetical entries that relate to the health of immigrants Entries are interdisciplinary and are drawn from the following fields of study anthropology demographics history law linguistics medicine population studies psychology religion and sociology Each entry is followed by a listing of suggested readings and suggested resources and also links to related terms within the whole book

Outstanding Features The book adopts a biopsychosocial historical approach to the topics covered in the chapters and the entries Each entry includes suggested readings and suggested resources The chapters and entries are written graduate level that is accessible to all academics researchers and professionals from diverse backgrounds We consider the audience for the entries to be well educated but a non expert in this area The primary focus of the book is on the immigrant populations in and immigration to magnet countries References are made to worldwide trends

and issues arising globally In addition to the comprehensive subject coverage the text also offers diverse perspectives The editors themselves reflect the multidisciplinary nature of the topics with expertise in psychiatry law epidemiology anthropology and social work Authors similarly reflect diverse disciplines *The Future of Nursing 2020-2030: Global Applications to Advance Health Equity* Susan Hassmiller,Ashley Darcy Mahoney,Kenya Beard,2023-08-16 This book provides an application of the concepts and recommendations of The Future of Nursing 2020 2030 Charting a Path to Achieve Health Equity Report a Consensus Study from the US National Academy of Medicine It offers complementary guidance through tools tips examples and storytelling As such this book written by prominent international academics and nurse practitioners offers program and policy recommendations for health equity As the world s largest and most trusted workforce nurses are in a key position thus must step up to help address these inequities now The recent pandemic has laid bare these inequities in ways that are stark and demanding of our attention This book offers program and policy recommendations along with case studies designed to empower nurses to understand and ACT to improve health equity This text provides nurses an opportunity to clearly see the need for an equitable just and fair society There has never been a more urgent call to action **Lung Cancer Screening** Gregory C. Kane,Julie A. Barta,Ronald E. Myers,Nathaniel R. Evans III,2023-08-24 This book is a comprehensive guide to lung cancer screening for clinicians healthcare systems community leaders and public health officials with the hope of creating a more equitable landscape in both lung cancer screening and lung cancer related outcomes at local state and national levels Authors take a new approach to primary and secondary lung cancer prevention that is in the early stages of adoption in the United States The last decade ushered in recognition of screening as an effective intervention but unfortunately despite the wide acceptance of the importance of this new screening modality nationally not more than 5% of eligible subjects have undergone screening to date in the United States although in some states uptake has reached as high as 16% As is common with any new preventive cancer screening racial and socioeconomic disparities emerge in utilization stage at diagnosis and mortality Over time these disparities decline but consequential differences endure Therefore it is critical to establish equitable screening practices The true measure of the effectiveness of any lung cancer screening program needs to be viewed through the lens of its impact on populations including those most affected by the morbidity and mortality of smoking related illness and lung cancer As such this book emphasizes a number of important public health topics including community outreach to vulnerable populations social justice issues addressing stigma and fatalism in the general community and the use of geocoding to assess a program s impact at a population level This book weaves traditional topics related to lung cancer screening such as promoting initial and repeat screening interpreting Lung RADs and managing the follow up of findings into the population perspective in order to present a unified comprehensive approach to the subject Further it serves as a guide that health systems health care professionals community leaders and other stakeholders can use to achieve the promise of lung cancer screening **A Population Health Approach to Health Disparities for Nurses**

Health Literacy From A to Z Helen Osborne, 2013 With patient experience at the forefront of health care effective communication of health messages is critical to quality care This book offers proven strategies to help providers clearly explain health information to a variety of audiences from patients and caregivers to students and the public Nurses Contributions to Quality Health Outcomes Marianne Baernholdt, Diane K. Boyle, 2021-05-04 This comprehensive book organizes the components of quality and safety outcomes within a framework developed by expert nurses Such a framework

is missing in existing books on quality and safety in health care and the concepts of nursing and organizational outcomes are often overlooked. This book fills this gap by exploring and expanding the various features of the Quality Health Outcomes Model (QHOM) and its four main concepts: System, Client, Interventions, and Outcomes. Using a broad and comprehensive approach, the authors identify the most current empirical evidence and concepts in the nursing field to provide an up-to-date understanding of the QHOM's four concepts and their interrelations. New concepts include: a) systems concepts of turbulence and complexity of workflow and use of the electronic health record to support clinical workflow; b) client concepts of social determinants of health, health literacy, and chronicity; c) intervention concepts of interprofessional practice, nursing care processes including unfinished care, and care coordination; d) outcome concepts related to nursing and the organization in addition to patient outcomes that includes the patient's experience. The ideas, approaches, and evidence are provided by a team of experienced researchers, practitioners, and leaders. The author team presents an updated state-of-the-art view of how system, client, and interventions affect client, nurse, and organizational outcomes. This book will appeal to researchers, clinicians, and researchers interested in healthcare quality and in particular nurses and nursing students in administration, research, and practice.
