Advances in Information Retrieval Fabio Crestani, Mark Girolami, C.J. van Rijsbergen, 2002-03-13 The annual colloquium on information retrieval research provides an opportunity for both new and established researchers to present papers describing work in progress or final results This colloquium was established by the BCS IRSG British Computer Society Information Retrieval Specialist Group and named the Annual Colloquium on Information Retrieval Research Recently the location of the colloquium has alternated between the United Kingdom and continental Europe To reflect the growing European orientation of the event the colloquium was renamed European Annual Colloquium on Information Retrieval Research from 2001 Since the inception of the colloquium in 1979 the event has been hosted in the city of Glasgow on four separate occasions However this was the first time that the organization of the colloquium had been jointly undertaken by three separate computer and information science departments an indication of the collaborative nature and diversity of IR research within the universities of the West of Scotland The organizers of ECIR 2002 saw a sharp increase in the number of go quality submissions in answer to the call for papers over previous years and as such 52 submitted papers were each

allocated 3 members of the program committee for double blind review of the manuscripts A total of 23 papers were eventually selected for oral presentation at the colloquium in Glasgow which gave an acceptance rate of less than 45% and ensured a very high standard of the papers presented

Advances in Information Retrieval W. Bruce Croft, 2006-04-11 The Center for Intelligent Information Retrieval CIIR was formed in the Computer Science Department of the University of Massachusetts Amherst in 1992 The core support for the Center came from a National Science Foundation State Industry University Cooperative Research Center S IUCRC grant although there had been a sizeable information retrieval IR research group for over 10 years prior to that grant The basic goal of these Centers is to combine basic research applied research and technology transfer The CIIR has been successful in each of these areas in that it has produced over 270 research papers has been involved in many successful government and industry collaborations and has had a significant role in high visibility Internet sites and start ups As a result of these efforts the CIIR has become known internationally as one of the leading research groups in the area of information retrieval The CIIR focuses on research that results in more effective and efficient access and discovery in large heterogeneous distributed text and multimedia databases The scope of the work that is done in the CIIR is broad and goes significantly beyond traditional areas of information retrieval such as retrieval models cross lingual search and automatic query expansion The research includes both low level systems issues such as the design of protocols and architectures for distributed search as well as more human centered topics such as user interface design visualization and data mining with

text and multimedia retrieval Advances in Information Retrieval Mohand Boughanem, Catherine Berrut, Josiane Mothe, Chantal Soule-Dupuy, 2009-03-27 This book constitutes the refereed proceedings of the 30th annual European Conference on Information Retrieval Research ECIR 2009 held in Toulouse France in April 2009 The 42 revised full papers and 18 revised short papers presented together with the abstracts of 3 invited lectures and 25 poster papers were carefully reviewed and selected from 188 submissions The papers are organized in topical sections on retrieval model collaborative IR filtering learning multimedia metadata expert search advertising evaluation opinion detection web IR representation clustering categorization as well as distributed IR **Advances in Knowledge-based and Intelligent Information and Engineering Systems** Manuel Graña, 2012 In this 2012 edition of Advances in Knowledge Based and Intelligent Information and Engineering Systems the latest innovations and advances in Intelligent Systems and related areas are presented by leading experts from all over the world The 228 papers that are included cover a wide range of topics One emphasis is on Information Processing which has become a pervasive phenomenon in our civilization While the majority of Information Processing is becoming intelligent in a very broad sense major research in Semantics Artificial Intelligence and Knowledge Engineering supports the domain specific applications that are becoming more and more present in our everyday living Ontologies play a major role in the development of Knowledge Engineering in various domains from Semantic Web down to the design of specific Decision Support Systems Research on Ontologies and their applications is a highly active front of current Computational Intelligence science that is addressed here Other subjects in this volume are modern Machine Learning Lattice Computing and Mathematical Morphology The wide scope and high quality of these contributions clearly show that knowledge engineering is a continuous living and evolving set of technologies aimed at improving the design and understanding of systems and their relations with humans
