Seeds of Western Culture: Universal Chronology, the Exoduses and Archilochus' Odyssey Graham Peter Scott, 2025-01-01

The book rediscovers two of the main seeds of Western Culture the Exodus and the Odyssey which are entwined within the book by both a common link with Egypt and a review of ancient chronology They were both antecedents to the rise of Christianity which is at the heart of Western Culture It was inspired by a desire to understand the spiritual message of the Odyssey which required both geographical and spiritual interpretations of the poem Linked to this was a desire to understand the political context of the Trojan story which required resolving the false hiatus in the archaeology of Troy This resulted in a new paradigm for understanding ancient chronology which revealed the stories behind the Exodus and the location of the Garden of Eden Writing the book has been a long and eventful journey longer than Odysseus 19 years away from home The book is written in five parts Universal Chronology Based on the identification of Menophres with Thutmose III and of the Bubastite Portal s reference to Shoshenq s participation in the Battle of Qarqar the Egyptian Third Intermediate Period is shortened by 120 years with a pharaoh ruling from Tanis and subordinate kings at Bubastis and Thebes The Exodus Using the Universal Chronology and genealogical information and dates provided by the Bible it is demonstrated that the story of the Exodus is a combination of two events being the exodus of the Hyksos led by Abraham in 1406 BC following the eruption of Thera and the exodus of the Atenist Levite priests led by Moses in about the first year of Tutankhamun 1204 BC The story of Abraham also reveals the location of the Garden of Eden in the heartland of the Levant Radiocarbon Dating The process that created the dendrochronology based radiocarbon calibration curve is demonstrated to be a flawed non scientific process that relied upon circular arguments The Odyssey By comparing the life and work of Archilochus to both the Odyssey and the Iliad it is shown that Archilochus must have been the author of the Odyssey The allegory within the Odyssey is also discussed to provide both geographical and spiritual interpretations of the poem Western Culture The two main streams of Western Culture Ancient Greece and Christianity are shown to have had their foundations in the stories surrounding the Trojan War the spiritual message of the Odyssey and the influences of Egypt on Greece and Judaism It is shown how Greek and Jewish religions were fused to create the Gospels and contributed towards modern astrology

Our Dolphin

Ancestors Frank Joseph, 2016-03-17 Reveals the shared ancestry behind our affinity with dolphins and our shared destiny Explains how we are both descendants of the aquatic ape and still share many physiological features with dolphins that set us apart from other primates Explores dolphins communication with other species and how dolphin therapy has miraculous effects on people with autism cancer stroke and depression Explores the connections between dolphins and Atlantis and Lemuria Wild animals avoid contact with humans but wild dolphins seek us out to play and socialize even going so far as to voluntarily rescue people from drowning What explains this remarkable natural affinity Revealing the evolutionary basis for our special relationship with dolphins Frank Joseph explains how we are both descendants of the same ancient branch of

humanity Building upon the aquatic ape theory he details how we both began on land but devastating floods forced our distant ancestors into the seas where humanity developed many of the traits that set us apart from other primates such as our instinctive diving reflex and our newborns ability to swim But while some of the aquatic apes returned to land later evolving into modern humans some remained in the cradle of Mother Ocean and became our dolphin cousins Integrating scientific research on dolphin intelligence communication and physiology with enduring myths from some of the world's oldest cultures such as the Aborigines Norse Greeks and Celts the author examines our physical commonalities with dolphins including their vestigial thumbs and legs birth processes and body temperature He explores dolphins uncanny ability to diagnose disease such as cancer in humans and how dolphin therapy has had miraculous effects on children with autism victims of stroke and those suffering from depression He provides evidence for dolphins different attitudes toward men women and children their natural affinity with cats and dogs and their telepathic communication with other species including ours He explores dolphins mysterious role in the birth of early civilization and their connections with the Dog Star Sirius and Atlantis and Lemuria a bond still commemorated by annual gatherings of millions of dolphins As Frank Joseph shows if we can learn to fully communicate with dolphins accessing their millennia old oral tradition we may learn the truth about humanity's origins and our shared future when humankind may yet again quit the land for a final return to the sea

When a Human Gives Birth to a Raven Rafael Rachel Neis, 2023-06-14 This book investigates rabbinic treatises relating to animals humans and other lifeforms Through an original analysis of creaturely generation and species classification by late ancient Palestinian rabbis and other thinkers in the Roman empire Rafael Rachel Neis shows how rabbis blurred the lines between the human and other beings This they did even as they were intent on classifying creatures and delineating the contours of the human Recognizing that life proliferates via multiple mechanisms beyond sexual copulation between two heterosexual male and female individuals of the same species the rabbis produced intricate alternatives This expansive view of generation included humans Likewise in parsing the variety of creatures the rabbis attended to the overlaps and resemblances across seemingly distinct species upsetting in turn unmitigated claims of human distinctiveness Intervening in conversations in animal studies queer theory trans theory and feminist science studies *When a Human Gives Birth to a Raven* provincializes sacrosanct ideals of reproduction in favor of a broader range of generation kinship and species offering powerful historical alternatives to the paradigms associated with so called traditional ideas

HEAR Danilo Mandic,Caterina Nirta,Andrea Pavoni,Andreas Philippopoulos-Mihalopoulos,2023-02-14 Hearing is an intricate modality of sensory perception It is continuously enfolded in the surroundings in which it takes place While passive in its disposition hearing is integral to the movement and fluctuations of one s environment At all times hearing remains open in active but attuned to the present and continuously immersed in the murmur of its background A delicate perception that is always situated but fundamentally overarching and extended into the open Hearing is an immanent modality of being in and with the world Beyond the capacity of sensory perception hearing is also the ultimate juridical act a sense making activity that adjudicates and informs the spatio temporal acoustics of justice This penultimate volume of Law and the Senses gathers contributions from across different disciplines working on the relationship between law and hearing the human vocalisations and non human echolocations the spatial and temporal conditions in which hearing takes place as well as the forms of order and control that listening entails Through notions and practices of improvisation and noise attunement and audibility sonic spatiality and urban sonicity they explore challenge and expand the structural and sensorial qualities of law Moreover they recognise how hearing directs us to perceiving and understanding the intrinsic acoustic sphere of simultaneous relations which challenge and break the normative distinctions that law informs and maintains In an attempt to hear the ambiguous indefinable and unembodied nature of hearing as well as its objects sound and silence this volume approaches hearing as both an ontological and epistemological device to think with and about law *Whitaker's Books in Print* ,1998 *The Hypothesis of the Gospels* Ian N Mills,2025 The gospels were not the only books in antiquity to retell a traditional story Readers of the gospels drew on an existing model for pluriform literature to make sense of the different versions of Jesus s life This paradigm explains the compositional behavior of the evangelists and early traditions about gospel origins

Queering Early Modern Death in England Lauren Shohet,Christine Varnado,2025-09-18 What does queer death have to do with early modern England This collection interrogates the profoundly queer strange excessive camp and uncanny dimensions of death in early modern English literary theatrical and material archives Contributors provide new insights on death by using the analytic tools of queer theory via non binary analyses of gender sexuality humanity nature embodiment and temporality Turning queer analysis to questions of death allows it to be understood as non dualist non linear a teleological and fruitfully muddled The essays illuminate early modern experiences before the ascendancy of Cartesian

dualism occluded alternative understandings of death They also speak to a present and a future where many received paradigms no longer hold Key dramatic texts from the early modern period including *The Duchess of Malfi* *The Alchemist* *The Spanish Tragedy* *The Winter's Tale* *Richard III* and *A Midsummer Night's Dream* show the expansive possibilities of death and dying in a queer mode Further essays consider queer dimensions of death in lyric poetry animal husbandry typology and Shakespearean authorship These approaches make clear why readers interested in queerness and death should immerse themselves in the cultural life of sixteenth and seventeenth century England

Battle John A Lynn, 2009-04-24 *Battle A History of Combat and Culture* spans the globe and the centuries to explore the way ideas shape the conduct of warfare Drawing its examples from Europe the Middle East South Asia East Asia and America John A Lynn challenges the belief that technology has been the dominant influence on combat from ancient times to the present day In battle ideas can be more far more important than bullets or bombs Clausewitz proclaimed that war is politics but even more basically war is culture The hard reality of armed conflict is formed by and in turn forms a culture's values assumptions and expectations about fighting The author examines the relationship between the real and the ideal arguing that feedback between the two follows certain discernable paths Battle rejects the currently fashionable notion of a Western way of warfare and replaces it with more nuanced concepts of varied and evolving cultural patterns of combat After considering history Lynn finally asks how the knowledge gained might illuminate our understanding of the war on terrorism

Ingres Susan L. Siegfried, 2009 Jean Auguste Dominique Ingres 1780-1867 produced a body of work that strongly appealed to his contemporaries while disconcerting them Even today the odd qualities of his work continue to fascinate scholars critics and artists In this handsomely illustrated and elegantly written book Susan L Siegfried argues that the strangeness associated with Ingres's paintings needs to be located in the complex and richly invested nature of the work itself as well as in the artist's very powerful if often perverse sense of artistic project She shows that his major rethinking of pictorial narrative in his classical literary historical and religious subjects was as central to his achievement as his distinctive rendering of the female figure in classical nudes and portraits He was engaged in a complex process of giving visual form to narrative which he did in new and unusual ways that involved him in a close reading of the texts on which he drew including authors such as Homer Virgil Ariosto and Dante as well as religious narratives and stories about medieval and early modern French history
