A History of African Societies to 1870 Elizabeth Isichei, 1997-04-13 This comprehensive and detailed exploration of the African past from prehistory to approximately 1870 is intended to provide a fully up to date complement to the Cambridge History of Africa Reflecting several emphases in recent scholarship it focusses on the changing modes of production on gender relations and on ecology laying particular stress on viewing history from below A distinctive theme is to be found in its analyses of cognitive history The work falls into three sections The first comprises a historiographic analysis and covers the period from the dawn of prehistory to the end of the Early Iron Age The second and third sections are for the most part organised on regional lines the second section ends in the sixteenth century the third carries the story on to 1870 A second volume now in preparation will cover the period from 1870 to 1995 This book attempts a more rounded view of African history than most of the other textbooks on the subject addressed to a largely undergraduate level student Earlier histories have tended to ignore some of the current foci in the scholarly literature on Africa generally not reflected in the textbooks these include discussions of topical issues like ecology and gender Isichei's book is also more radical

Transformations in History Toyin Falola, 2024-11-04 The book uses the main body of Lovejoy s work to speak to core African and economic history issues It thoroughly examines Lovejoy s contributions to the study of Africa particularly in exploring issues around production and exchanges at local regional and international levels The book offers readers a fresh perspective on the discourse of slavery and colonialism while simultaneously introducing them to the quality of work already accomplished by a stellar scholar As the book argues Lovejoy presents verifiable historical data that nudges us to reconsider our perception of Africa s growth trajectory especially before its encounter with the Americas A chapter examines the various ways by which the people experienced slavery before it became proliferated during the time Europeans entered into the business Another chapter addresses questions about the progressive efforts of slave traders to access the interior to drive more victims who would be shipped to the Atlantic for the business of servitude to advance the European economy Alongside this exploration a provides the background as to the contributions of Africans to ensure the continuity of this business Lovejoy notes for instance that Muslims were found in every region in the Americas during slavery which indicates that they were being taken there through transatlantic slavery While Muslims were found in these areas it was not true that they were there in large numbers This is underscored by their resistance to all forms of forced extraction of the people from their homeland In essence they challenged the system in ways that redefined their participation in the exercise The book analyzes how Muslims ensured that economic and political power were withdrawn from the hands of the victims and how they systematically created institutions that promoted that very inequity Lovejoy s extensive knowledge allows us to develop theories and establish applicable methodologies for understanding African reality since the precolonial era He presents original perspectives about addressing issues of African American engagements and the roles of critical voices in the diaspora Consequently the book is an invaluable educational resource particularly for people who want to deepen their understanding of African social and economic history
