From: _____

Quantitative Functions at the Family Cinema, Inc.

Goal:

Your family recently bought a house to live in and you are looking for a new house. You want to find a house that will meet all the needs and wants. More than 100 houses are available at the end of the month of May. There is a table with the following information:

The cost of the house you are considering is given by the function $y = -0.0001x^2 + 2.4x$, where x is the number of houses available at the end of May. To ensure that your family has a house to live in, you must find the maximum height of the house. What is the maximum height (in feet) of the house?
