Statistical Modeling of the National Assessment of Educational Progress Murray Aitkin, Irit Aitkin, 2011-05-12 The purpose of this book is to evaluate a new approach to the analysis and reporting of the large scale surveys for the National Assessment of Educational Progress carried out for the National Center for Education Statistics The need for a new approach was driven by the demands for secondary analysis of the survey data by researchers who needed analyses more detailed than those published by NCES and the need to accelerate the processing and publication of results from the surveys This new approach is based on a full multilevel statistical and psychometric model for students responses to the test items taking into account the design of the survey the backgrounds of the students and the classes schools and communities in which the students were located The authors detail a fully integrated single model that incorporates both the survey design and the psychometric model by extending the traditional form of the psychometric model to accommodate the design structure while allowing for student teacher and school covariates Making a Difference Irwin Deutscher, 2018-01-16 Emphasis on measurement techniques can interfere with understanding how well particular social programs in their field work In *Making a Difference* The Practice of Sociology Irwin Deutscher links traditional sociological concerns with applied sociology in an effort to overcome this problem He contributes to the debate over the extent to which health educational and social programs initiated by the Roosevelt Kennedy and Johnson administrations have been successful in intimate human terms Deutscher believes that the introduction of a sociological perspective can provide a positive element to interdisciplinary pursuits This belief as well as his fresh perspectives on both the strengths and limitations inherent in applied sociology offer the field a revitalising lift As such this highly informative thought provoking volume will be of interest to sociologists and policy makers in health education crime welfare and housing *Developing and Managing Your School Guidance and Counseling Program* Norman C. An abundant array of examples, sample forms, job descriptions, evaluation surveys, flyers, letters, and procedures used by various states and school districts clearly illustrate each step of program development. At the end of each chapter, a new feature called Your Progress Check functions as a tracking tool for growth at each stage of the change process. Minding the Gap Nancy Hoffman, Joel Vargas, Andrea Venezia, 2007. Minding the Gap argues that in today's highly competitive global economy, all young people need a postsecondary education. Yet only one in ten students from the lowest economic quintile in the United States currently earns a postsecondary credential. This timely and instructive book from Jobs for the Future explores policies and practices that would quickly enable a larger number of low

income and first generation college students to earn postsecondary degrees In doing so *Minding the Gap* calls for a system that thoroughly integrates secondary and postsecondary education a system in which a college degree is the goal for all students *Minding the Gap* is an invaluable resource for policymakers and practitioners interested in eliminating the gap between secondary and postsecondary education It focuses on those factors that must be addressed if the gap is to be eliminated the lack of coordination between secondary and college curricula dramatically different approaches to funding for public schools and higher education and the lack of coordinated data systems spanning the educational continuum from kindergarten through college This is a mustread for all those interested in increasing the number of American college graduates Freeman A Hrabowski III President University of Maryland Baltimore County This comprehensive collection offers a bracing examination of the anachronistic divide that separates K 12 schooling and higher education to the detriment of both It explains how this state of affairs came about why it s a problem and what can be done about it The contributors provide concrete and concise guidance on implementation promising models policy data systems and financial aid This is an important book for educators and reformers serious about reinventing high school and tearing down the barriers to college access Frederick M Hess Director of Education Policy Studies American Enterprise Institute In today s economy a college education is a must for every citizen *Minding the Gap* shares innovative strategies for improving the delivery system of college so it is affordable and attainable for every child in America Mike Easley Governor of North Carolina *Minding the Gap* highlights the importance of raising the bar for high school and postsecondary education in the United States Most important it acknowledges that we must do a better job of reaching out to underserved and low income communities to raise the educational level of their students and to provide them with the critical skills needed for the future global workforce Charles B Reed Chancellor California State University Edited by Nancy Hoffman Joel Vargas Andrea Venezia and Marc S Miller

Uncommon Measures National Research Council, Division of Behavioral and Social Sciences and Education, Board on Testing and Assessment, Committee on Equivalency and Linkage of Educational Tests, 1998-11-30 The issues surrounding the comparability of various tests used to assess performance in schools received broad public attention during congressional debate over the Voluntary National Tests proposed by President Clinton in his 1997 State of the Union Address Proponents of Voluntary National Tests argue that there is no widely understood challenging benchmark of individual student performance in 4th grade reading and 8th grade mathematics thus the need for a new test Opponents argue that a statistical linkage among tests already used by states and districts might provide the sort of comparability called for by the president s proposal Public Law 105 78 requested that the National Research Council study whether an equivalency scale could be developed that would allow test scores from existing commercial tests and state assessments to be compared with each other and with the National Assessment of Education Progress In this book the committee reviewed research literature on the statistical and technical aspects of creating valid links between tests and how the content use and purposes of education testing in the

United States influences the quality and meaning of those links The book summarizes relevant prior linkage studies and presents a picture of the diversity of state testing programs It also looks at the unique characteristics of the National Assessment of Educational Progress Uncommon Measures provides an answer to the question posed by Congress in Public Law 105 78 suggests criteria for evaluating the quality of linkages and calls for further research to determine the level of precision needed to make inferences about linked tests In arriving at its conclusions the committee acknowledged that ultimately policymakers and educators must take responsibility for determining the degree of imprecision they are willing to tolerate in testing and linking This book provides science based information with which to make those decisions
