Adrian Mario Gellel University of Malta Malta **Secular Spirituality** Harald Walach, 2014-09-18 This book discusses spirituality as an emerging scientific topic from a historical perspective with extensive discussion of the mind body problem and of scientific concepts of consciousness While the book focuses on the Western tradition of Enlightenment it also implicitly addresses the double meaning of the term with the Eastern tradition describing it as a state of true knowledge which is an important goal on an individual's spiritual path and the Western tradition seeing it as the collective process of getting rid of narrow minded dogmas and concepts The book is based on a simple yet challenging premise Science has not gone far enough in the scientific process of going from a collective mind tied up in dogmatic teachings to a truly free mind that seemingly freed itself from bondage and restrictions The book shows that science and with it our whole Western culture has to incorporate spirituality if it is to realize this goal of enlightenment If that is done and it can only be done by many individuals actually practicing spirituality this will also lead to the individual type of enlightenment **Mild Altered States of Consciousness** Eileen Sheppard, 2024-04-17 This book draws on transpersonal anthropology and psychology in order to explore mild altered states of consciousness ASCs experienced in everyday life While research into consciousness and particularly ASCs is growing this book focuses on a neglected area everyday experiences of ASCs Opening with an up to date overview of the development of the study of ASCs the author presents an in depth empirical exploration and mapping of mild ASCs Dr Sheppard examines original research conducted in a range of religious and secular contexts with participants who were engaged in activities including prayer sport nature conservation music and musical instrument making and TV viewing The author takes a novel phenomenological approach to the analysis of ASCs emphasising the subjective experience The book explores the healing potential of such mild ASCs the everyday fantasy reality of the interior landscape and discusses the problem of validity and belief in the study of ASCs It will appeal to students and scholars of transpersonal psychology consciousness studies social anthropology and the philosophy of mind **Mysticism and Meaning: Multidisciplinary Perspectives** Alex S. Kohav, 2019 The volume investigates the question of meaning of mystical phenomena and conversely queries the concept of meaning itself via insights afforded by mystical experiences The collection brings together researchers from such disparate fields as philosophy psychology history of religion cognitive poetics and semiotics in an effort to ascertain the question of mysticism's meaning through pertinent up to date multidisciplinary The discussion commences with Editor's Introduction that probes persistent questions of complexity as well as perplexity of mysticism and the reasons why problematizing mysticism leads to even greater enigmas One thread within the volume provides the contextual framework for continuing fascination of mysticism that includes a consideration of several historical traditions as well as personal accounts of mystical experiences Two contributions showcase ancient Egyptian and ancient Israelite involvements with mystical alterations of consciousness and Christianity's origins being steeped in mystical praxis and four essays highlight mysticism's formative presence in Chinese traditions and Tibetan Buddhism as well as medieval Judaism and

Swami Vivekananda's Vedāntic Cosmopolitanism Swami Medhananda, 2022 Swami Vivekananda the nineteenth century Hindu monk who introduced Vedanta to the West is undoubtedly one of modern India's most influential philosophers Unfortunately his philosophy has too often been interpreted through reductive hermeneutic lenses Typically scholars have viewed him either as a modern day exponent of Sankara's Advaita Vedanta or as a Neo Vedantin influenced more by Western ideas than indigenous Indian traditions In Swami Vivekananda's Vedāntic Cosmopolitanism Swami Medhananda rejects these prevailing approaches to offer a new interpretation of Vivekananda's philosophy highlighting its originality contemporary relevance and cross cultural significance Vivekananda the book argues is best understood as a cosmopolitan Vedantin who developed novel philosophical positions through creative dialectical engagement with both Indian and Western thinkers Inspired by his guru Sri Ramakrishna

Vivekananda reconceived Advaita Vedanta as a nonsectarian life affirming philosophy that provides an ontological basis for religious cosmopolitanism and a spiritual ethics of social service. He defended the scientific credentials of religion while criticizing the climate of scientism beginning to develop in the late nineteenth century. He was also one of the first philosophers to defend the evidential value of supersensuous perception on the basis of general epistemic principles. Finally, he adopted innovative cosmopolitan approaches to long standing philosophical problems. Bringing him into dialogue with numerous philosophers past and present, Medhananda demonstrates the sophistication and enduring value of Vivekananda's views on the limits of reason, the dynamics of religious faith, and the hard problem of consciousness.

Participation and the Mystery Jorge N. Ferrer, 2017-04-12

A groundbreaking and hopeful new look at contemporary spirituality, transpersonal psychology, integral education, and religious diversity and pluralism. *Participation and the Mystery* is both an introduction to and expansion of Jorge N. Ferrer's groundbreaking work on participatory spirituality, which holds that human beings are active cocreators of spiritual phenomena, worlds, and even ultimates. After examining the impact of his work since the publication of *Revisioning Transpersonal Theory*, Ferrer discusses the relationship between science and transpersonal psychology, the nature of a fully embodied spirituality, and the features of integral spiritual practice. The book also introduces a participatory philosophy of education and applies it to the academic teaching of mysticism and a novel approach to embodied spiritual inquiry. Critically engaging the influential work of Stanislav Grof, Ken Wilber, and A. H. Almaas, Ferrer concludes with an original solution to the problem of religious pluralism that affirms the ontological richness of religious worlds while avoiding the extremes of perennialism and contextualism, offering a hopeful vision for the future of world religion. *Participation and the Mystery* is an invaluable resource to anyone seeking to deepen their understanding of participatory approaches to transpersonal psychology, integral and contemplative education, contemporary spirituality, and religious studies. In *Participation and the Mystery*, we are given the opportunity to dive into the engaging, provocative, and stunningly erudite thought of Jorge N. Ferrer, arguably one of the premier transpersonal theorists of our time. Building on the key essays written after the publication of his seminal work *Revisioning Transpersonal Theory*, Ferrer shows us how his compelling and extremely fertile participatory model can be applied with intriguing and rewarding results to multiple highly distinct fields of discourse. Read this book if you want your worldview to be both challenged and enriched.

G. William Barnard, author of *Living Consciousness: The Metaphysical Vision of Henri Bergson*

Ferrer is a leading figure in transpersonal psychology. His participatory perspective explains both the deep commonalities and the creative diversity of spiritual traditions. It provides a way to understand the general phenomenon of spirituality without falling prey to ideological dogmatism or the tendency to privilege one's own spiritual tradition or practice over others. Ferrer's work deserves to be widely read.

Michael Washburn, author of *Transpersonal Psychology in Psychoanalytic Perspective*

This is an important collection of essays from one of the leading contemporary thinkers in transpersonal studies. Ferrer's participatory approach

represents the most significant development in transpersonal theory and practice to have emerged this century and this book is the ideal introduction to Ferrer's work. It will become required reading for all students of transpersonal psychology as well as for anyone seeking to deepen their understanding of transformational practice, transpersonal education, spirituality and religion. Michael Daniels, author of *Shadow Self: Spirit Essays in Transpersonal Psychology*. Rich and thought provoking, this book ranges widely through Ferrer's reflections on the participatory worldview in relation to psychology, education and religion. Andrew O. Fort, Texas Christian University.

Philosophy of Mysticism Richard H. Jones, 2016-03-23. This work is a comprehensive study of the philosophical issues raised by mysticism. Mystics claim to experience reality in a way not available in normal life, a claim which makes this phenomenon interesting from a philosophical perspective. Richard H. Jones's inquiry focuses on the skeleton of beliefs and values of mysticism, knowledge claims made about the nature of reality and of human beings, value claims about what is significant and what is ethical, and mystical goals and ways of life. Jones engages language, epistemology, metaphysics, science and the philosophy of mind. Methodological issues in the study of mysticism are also addressed. Examples of mystical experience are drawn chiefly from Buddhism and Advaita Vedanta but also from Christianity, Judaism, Islam and Daoism.

Early Israel Alex Shalom Kohav, 2022-11-29. Early Israel offers the most sweeping reinterpretation of the Pentateuch since the nineteenth century. Documentary Hypothesis, Engaging a dozen plus modern academic disciplines from anthropology, biblical studies, Egyptology and semiotics to linguistics, cognitive poetics and consciousness studies from religious studies, Jewish studies, psychoanalysis and literary criticism to mysticism studies, cognitive psychology, phenomenology and philosophy of mind, it wrests from the Pentateuch an outline of the heretofore undiscovered ancient Israelite mystical initiatory tradition of the First Temple priests. The book effectively launches a new research area, Pentateuchal esoteric mysticism, akin to a center or organizing principle discussed in biblical theology. The recovered priestly system is discordant vis-à-vis the much later rabbinical project. This volume appeals to a diverse academic community from Biblical and Jewish studies to literary studies, religious studies, anthropology and consciousness studies.

British Literature and Spirituality Franz Karl Wöhrer, John S. Bak, 2013. This book reflects the current state of research in the field of the spiritual in British literature where spirituality is understood as a culturally determined universal phenomenon or a factuality of humanity consisting of the living apprehension of the Sacred during rare gratuitous moments of illumination. With critical essays by scholars working in various disciplines, English studies, music, the arts, psychology, theology, etc., the book explores a corpus of encoded narratives of as well as reflections on the Sacred in British literature from the Late Middle Ages to the present. Multi-disciplinary in nature and interdisciplinary in method, *British Literature and Spirituality* illustrates the hermeneutic potential of readings that transcend the disciplinary boundaries of spiritual writings.
