Networks and Groups Bhaskar Dutta, Matthew O. Jackson, 2013-03-09 When Murat Sertel asked us whether we would be interested in organizing a special issue of the Review of Economic Design on the formation of networks and groups we were happy to accept because of the growing research on this important topic We were also pleasantly surprised at the response to our request for submissions to the special issue receiving a much larger number of sub missions than we had anticipated In the end we were able to put together two special issues of insightful papers on this topic Given the growing interest in this topic we also decided with encouragement from Murat to combine the special issues in the form of a book for wider dissemination However once we had decided to edit the book it was natural to move beyond the special issue to include at least some of the papers that have been influential in the literature on the formation of networks These papers were published in other journals and we are very grateful to the authors as well as the journals for permission to include these papers in the book
