*Joint Trauma System (JTS) Clinical Practice Guidelines (CPGs) & DOD TRAUMA REGISTRY DATA DICTIONARY For Military and Civilian Health Care Practitioners* ,2018-10-09 Almost 1 000 total pages see index at beginning of publications for a complete list of included CPGs Each CPG includes a section on the following 1 GOAL 2 BACKGROUND 3 EVALUATION 4 TREATMENT 5 PERFORMANCE IMPROVEMENT PI MONITORING 6 SYSTEM REPORTING reduced burn morbidity and mortality near elimination of extremity compartment syndrome better patient care documentation and improved communication across the spectrum of care between geographically dispersed facilities CPGs are evidence based and developed with experts in the military and civilian communities deployed clinicians Service trauma surgical consultants JTS leadership and formerly deployed Trauma Directors and Coordinators JTS has a formalized process for developing reviewing updating and approving CPGs The guidelines are developed and implemented by clinical subject matter experts in response to needs identified in the military area of responsibility CPGs were developed originally for U S Central Command However

collaborative efforts are ongoing with the other Combatant Commands to customize CPGs to their COCOMs

## INTRODUCTION TO THE JOINT TRAUMA SYSTEM JTS

The Joint Trauma System JTS is the Department of Defense DoD authority for the military's trauma care system. The vision of the Joint Trauma System is that every Soldier, Sailor, Marine, and Airman injured on the battlefield will have the optimum chance for survival and maximum potential for functional recovery. To achieve this vision, in 2006 the JTS implemented programs for data-driven trauma system development and improvement, in addition to the collection of trauma data. As part of its data collection efforts, the JTS maintains a registry of trauma patients who received care at medical treatment facilities (MTFs). Since 2007, this registry, known as the DoD Trauma Registry (DoDTR), has documented demographic, injury, treatment, and outcomes data for all trauma patients admitted to any DoD MTF, regardless of whether the injury occurred during ongoing military operations and is the largest military trauma data source in the world. Development of the DoDTR began during the early years of the Global War on Terror (GWOT) when the need to systematically improve trauma care for combat-wounded resulted in the impromptu creation of a demonstration registry known then as the Combat Trauma Registry (CTR). The CTR was constructed by the Center for AMEDD Strategic Studies (CASS); trauma-related information was initially abstracted into it from paper medical records received from trauma nurse coordinators (TNCs) at Landstuhl Regional Medical Center (LRMC) in Germany. Shortly after the demonstration program started, the Army Surgeon General approved its transition to an operational mode, leading to the formation of the Joint Theater Trauma System (JTTS) and eventually the Joint Trauma System (JTS).

**Oxford Textbook of Urological Surgery** Freddie C. Hamdy, Ian Eardley, 2017 A comprehensive textbook mapped to the curriculum for urological training as approved by the General Medical Council. This core text will be essential reading for both the trainee and specialist in urology in the UK and abroad.

**IAP Handbook of Developmental and Behavioral Pediatrics** Sameer H Dalwai, 2021-02-28 Developmental and behavioural paediatrics is the assessment of children to ascertain their developmental status. This includes speech and language delay, learning difficulties, Attention Deficit Hyperactivity Disorder (ADHD), and social communication disorders including Asperger's Syndrome and Autism. Accurate diagnosis means that children and their parents can be given the appropriate support and advice required to ensure the best possible therapy and support.

**BMI Healthcare** This book is a comprehensive guide to the diagnosis and management of developmental and behavioural disorders in children. Beginning with an introduction to normal development and behaviour, the text then discusses surveillance and screening processes. Each of the following chapters covers a different disorder or syndrome, from Down's syndrome, neuroregressive disorders, and ADHD to cerebral palsy, selective mutism, visual and hearing impairments, and many more. The final sections discuss therapeutic techniques, including pharmacotherapy, counselling, and complementary and alternative medicine.

**Key points:** Comprehensive guide to diagnosis and management of developmental and behavioural disorders in children. Covers many different disorders and syndromes. Includes discussion on medicolegal aspects. Features illustrations and figures to enhance learning.
