Atlas And Clinical Reference Guide For Corneal Topography:

Atlas and Clinical Reference Guide for Corneal Topography Ming Wang, Lance Kugler, 2024-06-01 Corneal topography has become essentially a pattern recognition trade best learned by viewing multiple images of representative patterns. In spite of this, currently available topography books focus only on the technology behind topography or a particular application of topography as opposed to presenting a comprehensive collection of topographic patterns that provide quick consistent pattern recognition and identification. Drs Wang and Kugler along with Drs Morgan and Boerman look to fill this void with *Atlas and Clinical Reference Guide for Corneal Topography*. *Atlas and Clinical Reference Guide for Corneal Topography* is the first corneal topography book that lends itself to efficient image search and reference for busy clinicians at chair side. Organized into both map based and disease based sections, the book allows for quick reference in busy clinical situations. Images come from the commonly used topographers, the Zeiss Atlas and the Oculus Pentacam, but the principles of pattern recognition can be applied to any topographer. Due to the text's large collection of topographic images and corresponding corneal conditions, *Atlas and Clinical Reference Guide for Corneal Topography* can be used side by side with the topographer. Designed as both a learning tool for students and a reference for clinicians to use when faced with a challenging topography interpretation, *Atlas and Clinical Reference Guide for Corneal Topography* will be appreciated by a wide spectrum of eye care professionals. General ophthalmologists, cataract and refractive surgeons, corneal specialists, optometrists, and ophthalmology residents and students will benefit from this invaluable atlas for corneal topography. *Atlas and Clinical Reference Guide for Corneal Topography* Ming Wang, 2013-11-15. Currently available topography books focus only on the technology behind topography or a particular application of topography as opposed to presenting a comprehensive collection of topographic patterns that provide quick consistent pattern recognition and identification. *Grow Your Eye Care Practice* Ming Wang, 2024-06-01. A crash course in marketing for eye care professionals, *Grow Your Eye Care Practice* High Impact Pearls from the Marketing Experts guides readers through this crucial area of business development. With an increase in patients undergoing elective procedures and an increase in the amount of providers marketing, has become the most important way for eye care professionals to grow their practices and differentiate themselves from their competition. Since marketing is not addressed in any formal course in medical school, optometry school residency or fellowship, many eye care professionals lack basic understanding and skills in this area of growing importance to their businesses. To meet this critical need, editor Dr Ming Wang and associate editors Shareef Mahdavi, Michael Malley, and Dr Tracy Swartz have created this essential, timely handbook aggregating the key ophthalmic marketing pearls, teachings, and experiences of some of the leading national and international marketing experts. *Grow Your Eye Care Practice* begins with an overview of the history and current state of ophthalmic marketing, including a fascinating look at the commoditization of eye care as was demonstrated with the introduction of LASIK. The core chapters address foundational and innovative marketing concepts and their application to eye

care including Market research segmentation targeting and positioning Patient experience Branding versus call to action Word of mouth referrals Digital marketing including social media websites and SEO Innovative marketing approaches Ethics and laws governing medical marketing Upcoming disruptive marketing technologies Grow Your Eye Care Practice High Impact Pearls from the Marketing Experts is an indispensable desktop reference for all eye care professionals ophthalmologists optometrists administrators practice managers business associates residents fellows medical students and optometry students who wish to improve their marketing skills grow their practices and differentiate themselves from their competition
