Atrial Fibrillation From Bench To Bedside Contemporary Cardiology:

Atrial Fibrillation Jong-Il Choi, 2012-01-11 Atrial Fibrillation Basic Research and Clinical Applications is designed to provide a comprehensive review and to introduce outstanding and novel researches This book contains 22 polished chapters and consists of five sections 1 Basic mechanisms of initiation and maintenance of atrial fibrillation and its pathophysiology 2 Mapping of atrial fibrillation and novel methods of signal detection 3 Clinical prognostic predictors of atrial fibrillation and remodeling 4 Systemic reviews of catheter based surgical treatment and novel targets for treatment of atrial fibrillation and 5 Atrial fibrillation in specific conditions and its complications Each chapter updates the knowledge of atrial fibrillation providing state of the art for not only scientists and clinicians who are interested in electrophysiology but also general cardiologists

Atrial Fibrillation Andrea Natale, Jose Jalife, 2008-04-03 This important new book presents advancements in the treatment and prevention of Atrial Fibrillation AF The reader is provided with the latest information that is critically important in the daily care and for the potential cure of patients with AF Each chapter deals with a different aspect of AF and each chapter is authored by internationally recognized experts in the evolving field of cardiac electrophysiology This book is a single source that provides a multi perspective look at and approach to AF Because AF is so prevalent and affects all areas of medicine the information in this book will be useful to all those in the medical field

Formation of Intracardiac Electrograms under Physiological and Pathological Conditions Keller, Matthias, 2014-09-09 This work presents methods to advance electrophysiological simulations of intracardiac electrograms IEGM An experimental setup is introduced which combines electrical measurements of extracellular potentials with a method for optical acquisition of the transmembrane voltage in vitro Thereby intracardiac electrograms can be recorded under defined conditions Using experimental and clinical signals detailed simulations of IEGMs are parametrized which can support clinical diagnosis

Predictive, Preventive, and Personalised Medicine: From Bench to Bedside Halina Podbielska, Marko Kapalla, 2023-10-30 This volume presents advanced bio medical sciences with a particular value for translating research achievements into daily medical practice in the framework of Predictive Preventive and Personalised Medicine 3PM PPPM First two decades of the 21st century are characterised by epidemics of non communicable diseases such as many hundreds of millions of patients diagnosed with cardiovascular diseases and the type 2 diabetes mellitus breast lung liver and prostate malignancies neurological sleep mood and eye disorders amongst others Consequent socio economic burden is tremendous Unprecedented decrease in age of maladaptive individuals has been reported The absolute majority of expanding non communicable disorders carry a chronic character over a couple of years progressing from reversible suboptimal health conditions to irreversible severe pathologies and cascading collateral complications The paradigm change from reactive to predictive preventive and personalised medicine is essential to promote population health by application of individualised patient profiling multi parametric analysis leading to cost effective targeted prevention To this end inadequate data for risk assessment on speed and urgency of COVID

19 combined with increased globalization of human society led to the rapid spread of COVID 19 Despite an abundance of digital methods that could be used in slowing or stopping this virus and future pandemics the world remains unprepared and lessons have not been learned from previous cases of pandemics The book presents PPPM strategies which might be of great clinical utility for future pandemics In a long term way a significantly improved healthcare economy is one of the clear benefits of the proposed paradigm shift a tight collaboration between all stakeholders including scientific community healthcare providers patient organisations policy makers and educators is analysed for the smooth implementation of the 3PM concepts Further issues linked to big data management and medical ethics have to be carefully treated in the context of application of artificial intelligence in medicine
