students particularly those who are poor diverse and failing school Dominant educational research newspapers and popular movies such as Waiting for Superman continually fuel public debates about whether our 21st century schools provide justice for all decrease the achievement gap and leave no child behind However even though one of teachers greatest concerns and why many leave the profession classroom discipline is rarely brought to the forefront of discussion As a result public discourse does not get into what actually happens during disciplinary moments that ultimately leads to the disproportional tracking of particular students into exclusionary school disciplinary consequences which funnels an underclass of students into the school to prison pipeline This book is a scholarly study presented here as a readable story and practical guide for walking teachers administrators and teacher education programs through the process of transforming traditional ways of thinking about classroom discipline and teaching in order to create student centered creative non punitive classrooms that authentically engage the most alienated and oppressed students in our schools and society Transforming Bangladesh Raquib Ahmed,Abdullah Al-Maruf,J. Craig Jenkins,2023-11-14 This book focuses on the transformation of Bangladesh in respect to its people geography economy and environment The authors discuss current problems such as vulnerability caused by environmental degradation in Bangladesh but also opportunities of this rapidly changing country The book explains how the country is rapidly transforming from a rural subsistence agrarian based economic system to a new economic partner contributing to global processes Bangladesh is presented as an example for the changes in the Global South where a mismatch is often observed in linking resources and activities with environmental sustainability possibly due to insufficient base line knowledge As faster growth is marginalizing resources to increase the GDP the sustainability of resource exploitation is being questioned The authors describe the vulnerable situation caused by possible sea level rise soil degradation biodiversity loss climate extremities urbanization and population displacement This volume offers comprehensive knowledge about the geography and environment of Bangladesh and aims to help readers further investigate the issues and work on solutions The book appeals to academics professionals and students at all levels interested in Bangladesh as well as environmental problems and geographical issues in a rapidly transforming country **Reconfiguring Refugees** Alise Coen,2024-08-20 Shows how domestic identity narratives and political polarization shape the sociopolitical response to refugees The United States once played a major role in global refugee resettlement accounting for nearly two thirds of all refugees resettled worldwide However in recent years it has dramatically cut refugee admissions and implemented discriminatory policies on refugee protection These policies have been justified amid intensifying xenophobic rhetoric against specific groups In this book Alise Coen explains why the monumental shift around refugee resettlement occurred particularly in response to the high profile conflict in Syria She shows how refugees and broader global migration debates became contentious political issues in the US revealing the many ways in which refugees have been increasingly weaponized as partisan symbols by Democrats and Republicans The book calls attention to the power of rhetoric and identity

narratives and shows how the language used to talk about refugees fuels divisive policies From the years leading up to the Trump administration s policies targeting Muslim refugees to debates during the Biden administration around who deserves access to asylum Coen examines how ideas about race gender and nativism shape US approaches toward migration As arguments for closing the border continue to gain traction and politicians continue to use global displacement issues to further their agendas Reconfiguring Refugees explores the ideas meanings and policies that undermine and influence US responsibility sharing
