**Secular Narrations and Transdisciplinary Knowledge** Abdelmajid Hannoum, 2023-05-31 This book considers secularism and its narrative expressions It shows how secularism is articulated and transmitted ubiquitously within state institutions and outside of them Abdelmajid Hannoum does this by dissecting in a series of essays a variety of narrative forms interrogating modes of their constitution and production the dynamics of their translatability the politics of their use the struggle over their status of truth and the conditions that make secular narration so central to our existence The book ranges from a medieval narrative of the secular to a modern narrative to anthropological secularism and religious experiences to narratives of translation produced by what the author calls translation ideology to historical narratives regulated by archival power and state secrecy to narratives of violence to narratives of recollection as well as narratives of silence Particular attention is paid to postcolonial French contemporary cultures and politics Transdisciplinary approaches are deployed to not only reframe old questions in new ways but also posit new questions out of old ones In doing so this innovative work opens up fresh discursive possibilities that cross traditional disciplines It will be of interest to scholars of anthropology history and beyond

**The Reformation in Lithuania** Dainora Pociūtė, 2024-12-09 The Reformation in Lithuania Origins and Developments up to 1570 by Dainora Pociūtė explores the dynamics of the Reformation in the Grand Duchy of Lithuania focusing on its early evolution and highlighting its autonomous character and the impact of Italian Protestantism Abraomas Kulvietis an alumnus of the university of Siena was among the first to call for Church reforms in Vilnius The tradition of Lithuanian printing initiated by reformers who were forced to flee to Lutheran Prussia was one of the early results of the movement The progress of the Reformation accelerated rapidly from the 1550s when Mikalojus Radvila the Black the most powerful magnate in Lithuania announced his break with Rome and established an autonomous Evangelical Church in Lithuania It matured by interweaving not only Lutheran and Swiss doctrines but also Antitrinitarianism and Anabaptism This led to a gradual schism between radical communities and

sympathizers of magisterial Protestantism during the 1560s

**transdisciplinary, dialectical and multicultural perspectives** Sujay Rao Mandavilli, 2024-05-27 Among the earliest usage of the word God comes from the sixth century Christian manuscript Codex Argenteus The English word itself is thought to have been derived from the Proto Germanic word Gu an The English word God along with its counterparts in other languages is used for virtually all conceptions and the term remains an English translation common to all conceptions of religion This is in spite of the fact that there are many significant differences across religions It is sometimes used to describe a formless irreligious God associated with nature This usage is relatively more recent however and is said to have originated from the ideas of Baruch Spinoza who was a pantheist Among the Jews the word Yahweh was used to mean God while Muslims and Hindus use the term Allah and Brahman respectively Other religions use different names for example in the Chinese religion Shangdi is referred to as the creator of the universe while in Zoroastrianism the term Ahura Mazda is used The term

Waheguru is used by the Sikhs to refer to a great teacher while the Baha'i use the term Baha **The Routledge Handbook of Religion and the Body** Yudit Kornberg Greenberg, George Pati, 2023-02-01 The Routledge Handbook of Religion and the Body is the first comprehensive volume to feature multireligious cross cultural perspectives on the body and embodiment Featuring multidisciplinary approaches and methodologies from the humanities and the social sciences it addresses the body and embodied religiosity in theological ethical and cultural contexts Comprised of 30 chapters by a team of international contributors the handbook is divided into four parts Theology and Embodied Religiosity Gender Sexuality and Body Regulations Ritual and Performance Religion Healing and the Future of the Body Each part examines central issues debates and problems in relation to global belief systems including embodiments of love transfiguration the secular body disability body language maternal bodies embodied emotions celibacy ecology and the body reshaping the corporal body initiation rites physiology Tantra Reiki practice religious experience technological body modifications and ethics and the body Providing a breadth of rich and innovative research it is a must read for students and scholars in religious studies theology philosophy sociology anthropology psychology history and cultural and gender studies Chapter 7 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license [Lutheran Music Culture](#) Mattias Lundberg, Maria Schildt, Jonas

Lundblad, 2021-10-25 This volume presents a novel and distinct contribution to previous research on the rich Lutheran heritage of music It builds upon a current surge of interest in the field which resonates with a wider interest in connections between music and religion as well as with cultural and aesthetic dimensions of faith at large The book situates the topic in relation to recent developments within historical and cultural studies that have developed a more nuanced and positive view of the interplay between theologians and other cultural agents in the evolution of Western modernity during post Reformation processes of confessionalization It combines conceptual discussions of key terms relevant to the study of the

development and significance of an Early Modern Lutheran Music Culture with theological readings of central texts on music analytic approaches to historical repertoires and material perspectives on its dissemination     Rethinking Law and Religion Russell Sandberg, 2024-06-05 This incisive book delineates the development of Law and Religion as a sub discipline critically reflecting on the author s own role in constructing the field It develops a subversive social systems theory in order to take both law and religion seriously and to challenge them equally     **Europe in Law and Literature** Laura Anina Zander, Nicola Kramp-Seidel, 2023-05-08 Europe is a broad and multifaceted construct variously understood as a geographical political legal institutional social or cultural formation It is characterized by numerous conflicts and processes of negotiation that have accompanied or sustained the development of normative orders and divergent conceptions of law both in relation to individual states and to Europe as a whole The same applies to the field of literature language and aesthetics numerous myths and ideologies have shaped today s understanding of Europe and still support it today This volume examines how such processes were legally structured and literarily addressed criticized and complemented Its interdisciplinary perspective and open and dynamic both dialogical and dialectical format intends to replicate the fragmented sometimes conflicting but always productive mosaic of voices ideas and concepts that have constituted and still constitute Europe whether in the past present or future Instead of resolving any of the complexities and contradictions that frame discussions on law literature and Europe it aims to induce further engagement and confrontations with new and alternative visions of Europe     L. Circe | Theological Volume 2 Eureka Circe, 2025     Decolonizing European Sociology Encarnacion Gutierrez Rodriguez, Manuela Boatcă, Sérgio Costa, 2016-05-13 Decolonizing European Sociology builds on the work challenging the androcentric colonial and ethnocentric perspectives eminent in mainstream European sociology by identifying and describing the processes at work in its current critical transformation Divided into sections organized around themes like modernity border epistemology migration and the South this book considers the self definition and basic concepts of social sciences through an assessment of the new theoretical developments such as postcolonial theory and subaltern studies and whether they can be described as the decolonization of the discipline With contributions from a truly international team of leading social scientists this volume constitutes a unique and tightly focused exploration of the challenges presented by the decolonization of the discipline of sociology     **The Cultural Study of Music** Martin Clayton, 2013-01-11 First Published in 2003 Routledge is an imprint of Taylor Francis an informa company     *Between State and Church* Wojciech Kriegseisen, 2016 The author analyses the inter confessional relations in selected territories in a longue duree perspective between Reformation and Enlightenment going beyond a simple juxtaposition of tolerant and intolerant states to conduct an analysis of political social and ideological conditions determining the level of religious tolerance

**Bliss Brain** Dawson Church, 2022-03-22 Award Winner in the Science category of the 2020 Best Book Awards sponsored by American Book Fest Award winning author and thought leader Dawson Church Ph D blends cutting edge neuroscience

with intense firsthand experience to show you how you can rewire your brain for happiness starting right now Neural plasticity the discovery that the brain is capable of rewiring itself is now widely understood But what few people have grasped yet is how quickly this is happening how extensive brain changes can be and how much control each of us has over the process In Bliss Brain famed researcher Dawson Church digs deep into leading edge science and finds stunning evidence of rapid and radical brain change In just eight weeks of practice 12 minutes a day using the right techniques we can produce measurable changes in our brains These make us calmer happier and more resilient When we cultivate these pleasurable states over time they become traits We don't just feel more blissful as a temporary state the changes are literally hard wired into our brains becoming stable and enduring personality traits The startling conclusions of Church's research show that neural remodeling goes much farther than scientists have previously understood with stress circuits shriveling over time Simultaneously The Enlightenment Circuit associated with happiness compassion productivity creativity and resilience expands During deep meditation Church shows how the 7 neurochemicals of ecstasy are released in our brains These include anandamide a neurotransmitter that's been named the bliss molecule because it mimics the effects of THC the active ingredient in cannabis It boosts serotonin and dopamine the first is an analog of psilocybin the second of cocaine He shows how cultivating these elevated emotional states literally produces a self-induced high While writing Bliss Brain Church went through a series of disasters including escaping seconds ahead of a California wildfire that consumed his home and office and claimed 22 lives The fire triggered a painful medical condition and a financial disaster Through it all Church steadily practiced the techniques of Bliss Brain while teaching them to thousands of other people This book weaves his story of resilience into the fabric of neuroscience producing a fascinating picture of just how happy we can make our brains no matter what the odds

**Animals as Religious Subjects** Celia Deane-Drummond, Rebecca Artinian-Kaiser, David L. Clough, 2013-07-18 This book examines one of the most pressing cultural concerns that surfaced in the last decade the question of the place and significance of the animal This collection of essays represents the outcome of various conversations regarding animal studies and shows multidisciplinary at its very best namely a rigorous approach within one discipline in conversation with others around a common theme The contributors discuss the most relevant disciplines regarding this conversation namely philosophy anthropology religious studies theology history of religions archaeology and cultural studies The first section Thinking about Animals explores philosophical anthropological and religious perspectives raising general questions about the human perception of animals and its crucial cultural significance The second section explores the intriguing topic of the way animals have been used historically as religious symbols and in religious rituals The third section re-examines some Christian theological and biblical approaches to animals in the light of current concerns The final section extends the implications of traditional views about other animals to more specific ethical theories and practices

*Pathways in Ethics* Piet Naudé, 2016-10-01 The public rationality of Christian faith is demonstrated in the way that Christian convictions

make contributions to the contents and substance of intellectual pluralistic public discourses on themes like economic justice and human rights The impact of Christian faith for all walks of life from the most intimate individual life to the most social global and cosmic life are dealt with in this great work of Public Theology from the African soil Prof Nico Koopman     **The Sociology of Religion** George Lundskow,2008-06-10 Most Sociology of Religion texts are decidedly staid and uninteresting covering contemporary developments which are only contemporary only from a disciplinary perspective They are not contemporary if viewed from the perspective of the religion s practioners in religious and non religious settings The textbooks that attempt to be interesting to undergraduate students often fall short because they either try to cover too much in an encyclopedic format or sacrifice a sociological perspective for a personal one Many use real life examples only superficially to illustrate concepts Lundskow s approach is the opposite students will learn the facts of religion in its great diversity all the most interesting and compelling beliefs and practices and then learn relevant concepts that can be used to explain empirical observations The book thus follows the logic of actual research investigate and then analyze rather than approaching concepts with no real bearing on how religion is experienced in society This approach using provocative examples and with an eye toward the historical and theoretical not to mention global experience of religion will make this book a success in the classroom The author envisions a substantive approach that examines religion as it actually exists in all its forms including belief ritual daily living identity institutions social movements social control and social change Within these broad categories the book will devote particular chapters to important historical moments and movements leaders and various individual religions that have shaped the contemporary form and effect of religion in the world today     **Daily**
