Bewertungskriterien und -matrizen im Vergabeverfahren Thomas Ferber,2015-10-26 Eine der wesentlichen Veränderungen der Vergaberechtsreform 2016 ist eine neue Betrachtungsweise der Wirtschaftlichkeit. Denn nach den neuen Vergaberichtlinien soll bei den Vergaben ein starkerer Fokus auf Qualität, Nachhaltigkeit und Innovation gelegt werden. Der Zuschlag soll daher möglichst auf das Angebot mit dem besten Preis-Leistungs-Verhältnis erteilt werden. Dies erfordert bei der Vorbereitung und Durchführung der Vergabeverfahren ein tieferes Verständnis von Bewertungsmethoden und

Bewertungsmatrizen um die Fragestellungen: Welches Mehr an Leistung rechtfertigt welchen höheren Preis und in welchem Verhältnis müssen Preise, Kosten und Leistung stehen, um ein optimales Ergebnis zu erzielen? Beantworten zu können. Der Titel "Bewertungskriterien und -matrizen im Vergabeverfahren" geht auf diese zentralen Fragestellungen der Vergaberechtsreform ein und führt Sie sicher durch die Erstellung Ihrer Bewertungsmatrizen sowie die Anwendung bzw. Auswahl der zahlreichen Bewertungsmethoden.

Breidahl, Matthias Knuth, Flemming Larsen, 2018-01-24 Across Europe market mechanisms are spreading into areas where they did not exist before. In public administration, market governance is displacing other ways of coordinating public services. In social policy, the welfare state is retreating from its historic task of protecting citizens from the discipline of the market. In industrial relations, labor and management are negotiating with an eye to competitiveness often against new non union market players. What is marketization and what are its effects? This book uses employment services in Denmark, Germany and Great Britain as a window to explore the rise of market mechanisms. Based on more than 100 interviews with funders, managers, front line workers and others, the authors discuss the internal workings of these markets and the organizations that provide the services. This book gives readers new tools to analyse market competition and its effects. It provides a new conceptualization of the markets themselves, the dilemmas and tradeoffs that they generate and the differing services and workplaces that result. It is aimed at students and researchers in the applied fields of social policy, public administration and employment relations and has important implications for comparative political economy and welfare states.

Marketization Ian Greer, Charles Umney, 2022-11-03 How do markets function? Who creates, shapes and organizes them? And what do they mean for the relationship between labour and capital? Marketization examines how the state and capital use markets to discipline the working class. Ian Greer and Charles Umney provide a comprehensive overview of European political economy at all levels, from the offices of the European Commission to the workplace, to show the mechanisms and processes through which market competition is created and managed and how they

reshape the lives of workers Drawing on hundreds of conversations with policymakers administrators businesses workers and trade unionists across various European countries over many years Greer and Umney unpack marketization They go beyond liberal theories that see market exchange as part of the human condition and broad brush left critiques of neoliberalism Instead they look behind the scenes in the European political economy to examine the practicalities of how markets are created and manipulated by employers policymakers and bureaucrats in pursuit of greater profitability Far from leading to greater freedom and efficiency these processes often override the rights of individuals degrade the status and security of workers and undermine democratic accountability Page 4 de la couverture [Methodennavigator für Business-Analytics produzierender Unternehmen](#) Denis Krechting,2020-06-02 Der Einsatz von Business Analytics wird f r produzierende Unternehmen zunehmend zum strategischen Erfolgsfaktor Dabei stellt vor allem die Vielzahl der zur Verf gung stehenden Business Analytics Methoden und deren Einsatzm glichkeiten viele Praktiker vor Herausforderungen Diese Arbeit setzt an diesen Barrieren an und gibt Praktikern ein Methodenset an die Hand mit dessen Hilfe es m glich ist zu bewerten welche Methoden f r welche Problemstellung und welche Datengrundlage geeignet sind **Bewertungskriterien und -matrizen im Vergabeverfahren** Thomas Ferber,2018-11 Aus dem Inhalt Welche Kriterien sind die richtigen welche neben dem Preis m glich und erlaubt Wirtschaftlichkeit der Angebote Preis Leistung Transparenzgebot Ausschlusskriterien Richtwertmethode Mittelwertmethode Medianmethode Referenzwertmethode Vor und Nachteile sowie Besonderheiten der Bewertungsmethoden Erstellen von und bewerten mit Bewertungsmatrizen Vermeiden von Komplexit t Rechtsprechung Beispiele und Tipps f r die Praxis
