Beyond Sun and Sand Sherrie L. Baver, Barbara Deutsch Lynch, 2006-02-15 Filtered through the lens of the North American and European media the Caribbean appears to be a series of idyllic landscapes sanctuaries designed for sailing diving and basking in the sun on endless white sandy beaches Conservation literature paints a similarly enticing portrait describing the region as a habitat for endangered coral reefs and their denizens parrots butterflies turtles snails and a myriad of plant species In both versions the

image of the exotic landscape overshadows the rich island cultures that are both linguistically and politically diverse but trapped in a global economy that offers few options for development Popular depictions also overlook the reality that the region is fraught with environmental problems including water and air pollution solid waste mismanagement destruction of ecosystems deforestation and the transition from agriculture to ranching Bringing together ten essays by social scientists and activists Beyond Sun and Sand provides the most comprehensive exploration to date of the range of environmental issues facing the region and the social movements that have developed to deal with them The authors consider the role that global and regional political economies play in this process and provide valuable insight into Caribbean environmentalism Many of the essays by prominent Caribbean analysts are made available for the first time in English

The Common Agricultural Policy beyond the MacSharry Reform C. Folmer, M.A. Keyzer, M.D. Merbis, H.J.J. Stolwijk, P.J.J. Veenendaal, 2013-10-22 The reform of the Common Agricultural Policy CAP which is now being implemented reduces the support for a selected number of agricultural products This book uses welfare theory and applied general equilibrium analysis to assess the medium to long term consequences of this reform if the new policies remain in place until the beginning of the next century It analyses the implications of two alternative scenarios a a further trade liberalisation covering all commodities and b increased

protectionism with high prices constraints on production and export subsidies financed by the farmers themselves The study also investigates the implications of financial renationalisation whereby the European Union member states would cover the costs of their own support measures

Agricultural Markets Beyond Liberalization Aad van Tilburg, Henk A.J. Moll, A. Kuyvenhoven, 2012-12-06 Agricultural markets have entered a long term process of liberalization with the aim of reducing imposed market imperfections such as monopolistic public trade entry barriers and subsidies The experience of more than a decade of agriculture liberalization offers a good opportunity to review and analyze the outcome of this process and to draw lessons for the future The central topic in Agricultural Markets Beyond Liberalization is the relationship between market structure and how markets perform in a dynamic context during a liberalization process The topic is studied from both a micro and macro viewpoint and refers to different types of agricultural markets This volume brings together the dynamics of agricultural markets in several parts of the world with a special focus on transition economics and Africa The different studies cover geographical areas as wide as a district as well as a group of countries and institutions from individual contracts to multi national organizations The analysis of liberalization under different circumstances and the different methods of analysis used by the authors provide a valuable foundation for the assessment of liberalization
