Sedotti dalla matematica Sabine Hossenfelder, 2020-03-25 T14:56:00+01:00 Che riflettano sull'esistenza dei buchi neri o prospettino nuove scoperte al CERN i fisici sono convinti che le migliori teorie debbano essere belle naturali ed eleganti Sfortunatamente sostiene Sabine Hossenfelder tali requisiti sono anche il motivo per cui non c'è stato alcun progresso

significativo in fisica teorica negli ultimi quarant'anni. Guidati da criteri estetici i fisici hanno architettato nuove sbalorditive teorie ma le osservazioni non sono state in grado di dare supporto a queste idee e in realtà molte di esse non sono neanche sperimentalmente accessibili. E queste teorie troppo belle per non essere vere hanno condotto l'intero campo di ricerche in un vicolo cieco. Per uscire da questa trappola i fisici devono ripensare il modo in cui costruiscono le loro teorie. Sedotti dalla matematica ci ricorda che solo accettando il disordine e la complessità gli scienziati possono scoprire la verità sul nostro universo.

The Hitchhiker's Guide to Genesis Quick Savant, 2024-11-29 DNA: The Alien Code. The Origin of Life and the Shocking Truth About Our Genetic Past. Evolutionary theory by Charles Darwin changed our knowledge of life in the mid-19th century. One question remained: Where did life begin? We know a lot about the creation of our universe, but how life began remains a mystery. We investigate Nobel winner Francis Crick's novel idea of DNA structure in this intriguing inquiry. Crick's controversial argument that DNA, the cornerstone of life, may have originated off-planet changes our view of life on Earth. Crick believed that an intelligent alien society engineered and spread DNA through panspermia. Could extraterrestrials have engineered ourselves and all life on Earth? Do we derive from alien hybrids designed to carry a vanished civilization's genes? This book explores Crick's bold proposal by reviewing convincing scientific evidence for directed panspermia: the idea that life was deliberately carried across space to nurture intelligence on numerous planets, including Earth. From research with extremophiles, microbes that can survive space to frightening UFO sightings and official declarations of alien contacts, the evidence is increasing. Microbes may have hitchhiked on comets, asteroids, meteors, planetary pieces or cosmic dust. DNA patterns that suggest an artificial origin support Crick's bold prediction: DNA may be an intergalactic artifact that could reveal our cosmic destiny according to mathematicians, astrophysicists and Crick. But the narrative continues. New findings about the Last Universal Common Ancestor (LUCA) and alien life's involvement in intelligent species evolution pose intriguing questions about our destiny. Close reading of Genesis' original passages reveals alien influence in human development. Ready to meet our creators or their descendants? Could humans and aliens merge? Join the search for life's origins as we digest the idea that our DNA may hold the solution to the universe's biggest riddles.

Adasthra, 2012-01-01 This book gives a deeper understanding of creation and all that lives in the Universe especially on Earth It provides a clear picture about how everything was created with a special purpose and how it all functions Consciousness and the Evolving human **Two On A Tower** Thomas Hardy, 2013-11-01 This is the annotated edition including a rare biographical essay on the life and works of the author This romance as the author entitled it in the English edition is in some respects a successful and in all respects a powerful book It is not devoid of humor as the delightful description of the choir practice amply proves It is certainly a romance if a strange and almost bizarre plot can give a story as claim to that title It does not yield to any of our author s stories as a character study nor does it yield to any story of modern times in its absolute truth to the fundamental principles of human nature under certain given circumstances More than any of Mr Hardy s novels it gives one the impression of being a study undertaken on definite lines and with a definite object That object is the endeavor to show the misery that must come to the woman who allows her passion for a man to blind her to the obstacles which difference of age of rank of education of social aim have set between them The absorbing the disastrous passion of Lady Constantine for her young astronomer Swithin St Cleve the secret marriage the terrible complications that arise upon her discovery that she was not a widow when she contracted this marriage her anxiety to do no wrong to the budding genius of her boy husband who still finds more to gaze at in the stars of heaven than in her own love lit eyes her open marriage to the Bishop of Melchester to save her reputation the awakening of St Cleve to the fact that there are other women in the world besides his quondam wife and patroness and finally the death scene in the tower when the heart of her that loved not wisely but too well has snapped beneath its weight of grief all these particulars make up a story of intense power and interest

Sitting in the Lotus Blossom Diane Goble, 2010-08-31 In 1989 I had started to write a book about the art of conscious dying but every time I sat down to write information that had nothing to do with that concept kept coming through I decided to meditate to try to figure out what was going on I started seeing strange faces arising out of the darkness and messages like a moving LED sign displaying a continuous series of symbols that made no sense to me Then I would stop meditating and start writing information that didn t seem to be coming from my mind It seemed as though I was stepping down this other information from these unknown beings and translating it into written words They wouldn t leave me alone to write my book until finally I agreed to write their book first then they would help me with the book I wanted to write Sitting in the Lotus
