Beyond Individual Choice Teams And Frames In Game Theory:

Beyond Individual Choice Michael Bacharach, 2006-05-07 Ch 1 The hi lo paradox Ch 2 Groups Ch 3 The evolution of group action Ch 4 Team thinking

Beyond Individual Choice Michael Bacharach, 2018-06-05 Game theory is central to modern understandings of how people deal with problems of coordination and cooperation Yet ironically it cannot give a straightforward explanation of some of the simplest forms of human coordination and cooperation most famously that people can use the apparently arbitrary features of focal points to solve coordination problems and that people sometimes cooperate in prisoner s dilemmas Addressing a wide readership of economists sociologists psychologists and philosophers Michael Bacharach here proposes a revision of game theory that resolves these long standing problems In the classical tradition of game theory Bacharach models human beings as rational actors but he revises the standard definition of rationality to incorporate two major new ideas He enlarges the model of a game so that it includes the ways agents describe to themselves or frame their decision problems And he allows the possibility that people reason as members of groups or teams each taking herself to have reason to perform her component of the combination of actions that best achieves the group s common goal Bacharach shows that certain tendencies for individuals to engage in team reasoning are consistent with recent findings in social psychology and evolutionary biology As the culmination of Bacharach s long standing program of pathbreaking work on the foundations of game theory this book has been eagerly awaited Following Bacharach s premature death Natalie Gold and Robert Sugden edited the unfinished work and added two substantial chapters that allow the book to be read as a coherent whole

Experimental Economics Nicholas Bardsley, Robin Cubitt, Graham Loomes, Peter Moffat, Chris Starmer, Robert Sugden, 2010 The authors explore the history of experiments in economics provide examples of different types of experiments and show that the growing use of experimental methods is transforming economics into an empirical science They explain that progress is being held back and debate on how to overcome these limitations

Logic, Rationality, and Interaction Wiebe van der Hoek, Wesley H. Holliday, Wen-fang Wang, 2015-10-28 FoLLI LNCS is the publication platform for the Association of Logic Language and Information FoLLI www.folli.org The Association was founded in 1991 to advance research and education on the interface between logic linguistics computer science and cognitive science The FoLLI Publications on Logic Language and Information aim to disseminate results of cutting edge research and tutorial materials in these interdisciplinary areas This LNCS volume is part of FoLLi book serie and contains the papers presented at the 5th International Workshop on Logic Rationality and Interaction LORI V held in October 2015 in Taipei Taiwan The topics covered in this program well represent the span and depth that has by now become a trademark of the LORI workshop series where logic interfaces with disciplines as diverse as game theory and decision theory philosophy and epistemology linguistics computer science and artificial intelligence

From Individual to Collective Intentionality Sara Rachel Chant, Frank Hindriks, Gerhard Preyer, 2014-04 Acting together requires collective intentions The contributions to this volume seek to

critically assess or to enrich theories of collective intentionality by exploring topics such as collective belief mutual coordination and the explanation of group behavior *Brain Informatics* Peipeng Liang, Vinod Goel, Chunlei Shan, 2019-12-05 This book constitutes the refereed proceedings of the 12th International Conference on Brain Informatics BI 2019 held in Haikou China in December 2019 The 26 revised full papers were carefully reviewed and selected from 36 submissions The papers are organized in the following topical sections cognitive and computational foundations of brain science human information processing systems brain big data analysis curation and management informatics paradigms for brain and mental health research and brain machine intelligence and brain inspired computing Also included is a special session on computational social analysis for mental health Collective Rationality Paul Weirich, 2010 Groups of people perform acts that are subject to standards of rationality The book's theory of collective rationality explains how to evaluate collective acts The people engaged in a game of strategy collectively produce an outcome and the theory reveals what makes some outcomes solutions It generates new equilibrium standards for solutions to cooperative games **Optimally Irrational** Lionel Page, 2022-11-03 The seemingly irrational puzzling aspects of human behaviour are not bugs but features Improving our navigation of the real world **A Research Annual** Ross B. Emmett, Jeff E. Biddle, Warren J. Samuels, 2009-06-09 Contains refereed articles on contrasting relational conceptions of the individual in economics This book also covers the development of Adam Smith's style of lecturing a comparison of problems encountered in the historian's work as editor based upon editing Harrod's papers and Haberler's Prosperity and Depression **Handbook of Behavioural Economics and Smart Decision-Making** Morris Altman, 2017-05-26 This Handbook is a unique and original contribution of over thirty chapters on behavioural economics examining and addressing an important stream of research where the starting assumption is that decision makers are for the most part relatively smart or rational This particular approach is in contrast to a theme running through much contemporary work where individuals' behaviour is deemed irrational biased and error prone often due to how people are hardwired In the smart people approach where errors or biases occur and when social dilemmas arise more often than not improving the decision making environment can repair these problems without hijacking or manipulating the preferences of decision makers This book covers a wide range of themes from micro to macro including various sub disciplines within economics such as economic psychology heuristics fast and slow thinking neuroeconomics experiments the capabilities approach institutional economics methodology nudging ethics and public policy **Humanism and Religion in the History of Economic Thought. Selected Papers from the 10th Aispe Conference** AA. VV., 2010-03-30 T00:00:00+02:00 363 81 *Handbook on the Economics of Philanthropy, Reciprocity and Social Enterprise* Stefano Zamagni, Luigino Bruni, 2013-01-01 The recent era of economic turbulence has generated a growing enthusiasm for an increase in new and original economic insights based around the concepts of reciprocity and social enterprise This stimulating and thought provoking Handbook not only encourages and supports this growth but also emphasises and expands

upon new topics and issues within the economics discourse Original contributions from key international experts acknowledge and illustrate that markets and firms can be civilizing forces when and if they are understood as expressions of cooperation and civil virtues They provide an illuminating discourse on a wide range of topics including reciprocity gifts and the civil economy which are especially relevant in times of crisis for financial capitalism The Handbook questions the current phase of the market economy that arises from a state of anthropological pessimism Such anthropological cynicism is one of the foundations of the contemporary economic system that is challenged by the contributors This highly original and interdisciplinary Handbook will provide a fascinating read for academics researchers and students across a wide range of fields including economics public sector economics public policy and social policy *Elgar Encyclopedia of Behavioural and Experimental Economics* Swee-Hoon Chuah, Robert Hoffmann, Ananta Neelim, 2025-02-12 This Encyclopedia presents a comprehensive account of the complementary forces of behavioural economics a novel field combining psychological insights with analytical economic thinking and experimental economics *Logic, Rationality, and Interaction* Natasha Alechina, Andreas Herzig, Fei Liang, 2023-10-23 This LNCS book is part of the FOLLI book series and constitutes the proceedings of the 9th International Workshop on Logic Rationality and Interaction LORI 2023 held in Jinan China in October 2023 The 15 full papers presented together with 7 short papers in this book were carefully reviewed and selected from 40 submissions The workshop covers a wide range on the following topics such as agency argumentation and agreement belief representation probability and uncertainty belief revision and belief merging knowledge and action dynamics of informational attitudes intentions plans and goals decision making and planning preference and utility cooperation strategic reasoning and game theory epistemology social choice social interaction speech acts knowledge representation norms and normative systems natural language rationality philosophical logic **Encyclopedia of Philosophy and the Social Sciences** Byron Kaldis, 2013-04-02 The entries in this encyclopedia give readers an opportunity to explore interconnections clarify commonalities as well as differences or comparative contrasts discover new fields or ideas of intellectual interest explore adjacent conceptual zones that may be found to further expand their own disciplinary domains and also understand better their own academic areas of expertise and the historical provenance of each p xxxi **Advances in Social Simulation 2015** Wander Jager, Rineke Verbrugge, Andreas Flache, Gert de Roo, Lex Hoogduin, Charlotte Hemelrijk, 2017-03-16 This book highlights recent developments in the field presented at the Social Simulation 2015 conference in Groningen The Netherlands It covers advances both in applications and methods of social simulation Societal issues addressed range across complexities in economic systems opinion dynamics and civil violence changing mobility patterns different land use transition in the energy system food production and consumption ecosystem management and historical processes Methodological developments cover how to use empirical data in validating models in general formalization of behavioral theory in agent behavior construction of artificial populations for experimentation replication of models and agent based models that can be

run in a web browser Social simulation is a rapidly evolving field Social scientists are increasingly interested in social simulation as a tool to tackle the complex non linear dynamics of society Furthermore the software and hardware tools available for social simulation are becoming more and more powerful This book is an important source for readers interested in the newest developments in the ways in which the simulation of social interaction contributes to our understanding and managing of complex social phenomena , The Logic of Responsibility Voids Hein Duijf,2022-03-07 This book focuses on the problem of responsibility voids these are cases where responsibility for a morally undesirable outcome cannot be attributed to any of the involved agents Responsibility voids are thought to occur in collective decision making and in the context of artificial intelligent systems In these cases philosophers worry that there is a shortfall of moral responsibility In particular such voids are often assumed to justify a notion of collective responsibility that cannot be reduced to individual responsibility One of the aims of the book is to study how collective responsibility and joint action relate to individual responsibility and individual actions The book offers a unifying framework for modelling moral responsibility by drawing from modal logic and game theory The book investigates the possibility and scope of the problem of responsibility voids One of its characteristics is its pluralistic perspective on moral responsibility in contrast to giving a unique and all encompassing definition of it the book makes progress by spelling out and modelling several conceptions of moral responsibility One of the appealing features of the book is that a relatively small range of models is used to investigate a variety of conceptions of moral responsibility The unifying framework can thus be used to characterize the conditions under which responsibility voids are ruled out *Economic Analysis, Moral Philosophy, and Public Policy* Daniel Hausman,Michael McPherson,Debra Satz,2017 This book shows how careful attention to moral reasoning can enrich economic understanding and clarify the importance and the limits of an economic analysis of policy problems *The Routledge Handbook of Mindshaping* Tadeusz Wiesław Zawidzki,Rémi Tison,2025-05-29 Of all species human beings are uniquely capable of coordinating on long term large scale cooperative projects with unfamiliar and genetically unrelated others According to the mindshaping hypothesis this relies on mechanisms and practices like imitation pedagogy normative cognition and narrative self constitution which shape us into expert coordinators without requiring time consuming and epistemically fraught attempts to read each other s minds Mindshaping has been applied to many areas of inquiry including game theory shared agency communication the ontogeny of human cognition the dissemination of scientific knowledge in popular media mental illness and the influence of social media technologies The Routledge Handbook of Mindshaping is the first volume of its kind Comprising 37 chapters by an international team of leading scholars this Handbook is organised into seven sections Mindshaping and coordination Mindshaping and cognitive psychology Mindshaping and normativity Mindshaping and epistemology Social and political dimensions of mindshaping Nonhuman mindshaping Mindshaping applied Within these sections key topics are addressed including game theory social signalling and shared agency folk psychology the emotions language acquisition and memory

stereotyping and consciousness raising moral agency self knowledge rationality epistemic norms primate sociality human elephant relations artificial intelligence mental illness and neurodiversity aesthetic expression and politics An outstanding survey of a vibrant and emerging field The Routledge Handbook of Mindshaping will be of great interest to those studying and researching philosophy of psychology philosophy of cognitive science philosophy of mind and applied epistemology It will also be of interest to those in related disciplines such as cognitive psychology sociology and anthropology
