Sublime in Art and Critical Theory G. Ray, 2005-09-02 The eleven interconnected essays of this book penetrate the dense

historical knots binding terror power and the aesthetic sublime and bring the results to bear on the trauma of September 11 and the subsequent War on Terror Through rigorous critical studies of major works of post 1945 and contemporary culture the book traces transformations in art and critical theory in the aftermath of Auschwitz and Hiroshima Critically engaging with the work of continental philosophers Theodor W Adorno Jacques Derrida and Jean Francois Lyotard and of contemporary artists Joseph Beuys Damien Hirst and Boaz Arad the book confronts the shared cultural conditions that made Auschwitz and Hiroshima possible and offers searching meditations on the structure and meaning of the traumatic historical event Ray argues that globalization cannot be separated from the collective tasks of working through historical genocide He provocatively concludes that the current US led War on Terror must be grasped as a globalized inability to mourn

Ginsburgh,David Throsby,2006-09-13 Over the last 30 or 40 years a substantial literature has grown up in which the tools of economic theory and analysis have been applied to problems in the arts and culture Economists who have surveyed the field generally locate the origins of contemporary cultural economics as being in 1966 the year of publication of the first major work in modern times dedicated specifically to the economics of the arts It was a book by Baumol and Bowen which showed that economic analysis could illuminate the supply of and demand for artistic services the contribution of the arts sector to the economy and the role of public policy Following the appearance of the Baumol and Bowen work interest in the economics of the arts grew steadily embracing areas such as demand for the arts the economic functions of artists the role of the nonprofit sector and other areas Cultural economics also expanded to include the cultural or entertainment industries the media movies the publishing industry popular music as well as heritage and museum management property right questions in particular copyright and the role of new communication technologies such as the internet The field is therefore located at the crossroads of several disciplines economics and management but also art history art philosophy sociology and law The Handbook is placed firmly in economics but it also builds bridges across these various disciplines and will thus be of interest to researchers in all these different fields as well as to those who are engaged in cultural policy issues and the role of culture in the development of our societies Presents an overview of the history of art markets Addresses the value of art and consumer behavior toward acquiring art Examines the effect of art on economies of developed and developing countries around the world Alchemist of the Avant-Garde John F.
