Beyond Reforms Structural Dynamics And Macroeconomic Vulnerability Latin American Development Forum:

Beyond Reforms José Antonio Ocampo, 2005 This collection presents the difficult challenges of the new economic era as well as a set of alternative economic policies for managing the open Latin American economies of the early twenty first century Ideas that were removed from the reform agenda over the past two decades are seen as critical to the improved economic and social performance that liberalization has so far failed to produce These ideas include a role for counter cyclical macroeconomic policies including restrictions on capital mobility active productive sector and technological development policies and the need to pay greater attention not only to social policies but also to the links between economic policies and social outcomes in order to guarantee a desirable social performance This collection sheds new light on issues that were largely overlooked during the reform period and that must be faced squarely to overcome the deficiencies that Latin America has faced during its phase of liberalization and its dismal economic performance since the Asian crisis

Beyond Reforms Jose Antonio Ocampo, 2005-07-15 Beyond Reforms argues that economic growth in developing countries is intrinsically tied to the dynamics of production structures to the specific policies and institutions created to support it and the creation of linkages among domestic firms and sectors Avoiding macroeconomic instability is also essential However macroeconomic stability is not a sufficient condition for growth The broader institutional context and the adequate provision of education and infrastructure are essential framework conditions but generally do not play a direct role in bringing about changes in the momentum of economic growth

Raising Student Learning in Latin America Emiliana Vegas, Jenny Petrow, 2007-09-26 Understanding what and how students learn has emerged as a salient issue in Latin America a region where the majority of children now have access to schools but few students learn the skills they need to succeed Raising Student Learning in Latin America examines recent advances in our understanding of the policies and programs that affect student learning and provides policy makers with effective options This volume relies on indicators from national and international assessments of subject matter knowledge plus intermediate learning indicators such as dropout and completion rates The first part focuses on the central role of student learning in education The second part reviews the evidence on factors and policies that affect student learning The final part addresses policy options on education quality assurance

Emerging Issues in Financial Development Tatiana Didier, Sergio L. Schmukler, 2013-12-17 This book synthesizes the results of a comprehensive analysis of the status prospects and challenges of sustainable financial development in Latin America as well as the lessons for developed and developing countries

Remittances and Development Pablo Fajnzylber, J. Humberto Lopez, 2008-02-08 Workers remittances have become a major source of financing for developing countries and are especially important in Latin America and the Caribbean which is at the top of the ranking of remittance receiving regions in the world While there has been a recent surge in analytical work on the topic this book is motivated by the large heterogeneity in migration and remittance patterns across countries and regions and by the fact that existing

evidence for Latin America and the Caribbean is restricted to only a few countries such as Mexico and El Salvador. Because the nature of the phenomenon varies across countries its development impact and policy implications are also likely to differ in ways that are still largely unknown. This book helps fill the gap by exploring in the specific context of Latin America and Caribbean countries some of the main questions faced by policymakers when trying to respond to increasing remittances flows. The book relies on cross country panel data and household surveys for 11 Latin American countries to explore the development impact of remittance flows along several dimensions: growth, poverty, inequality, schooling, health, labor supply, financial development, and real exchange rates.

New Century, Old Disparities Hugo Nopo, 2012-09-07 To what extent do individuals with the same observable endowment of human capital receive different salaries on the basis of their gender or ethnicity? What policy options promise to diminish these earnings gaps? This book tries to answer these and other questions using an innovative technique of matching comparisons.

Entrepreneurship in Latin America Eduardo Lora, Francesca Castellani, 2013-12-18 This book looks at both the potential and limits of policies to promote entrepreneurship as an important vehicle for social mobility in Latin America and the Caribbean. Who are the region's entrepreneurs? They tend to be middle aged males with secondary and often tertiary education who represent only a small segment of the economically active population in the six countries considered in this book. They come from families in which a parent is or was an entrepreneur. In fact a parent's occupation is more important in the decision to become an entrepreneur than a parent's wealth, income, or education. Middle class entrepreneurship tends to dominate the sample in part since this is the majority class in society. However, as a percentage of each social class entrepreneurship tends to be higher in the upper class followed by the middle and lower class. Entrepreneurs concentrate in micro enterprises with fewer than five employees. They enjoy greater social mobility than employees and the self employed but this mobility is not always in the upward direction. Entrepreneurs face multiple obstacles including stifling bureaucracy, burdensome tax procedures, and lack of financing, human capital, technological skills, and supportive networks. The support of family and friends and a modicum of social capital help cope with these obstacles to entrepreneurship.

Who Decides Social Policy? Bonvecchi, Alejandro, Scartascini, Carlos, 2020-11-02 This book combines an institutional political economy approach to policy making with social network analysis of social policy formulation processes. Based on extensive interviews with governmental and nongovernmental actors, the case studies of social policy formulation in Argentina, The Bahamas, Bolivia, and Trinidad and Tobago show that while societal actors are central in the networks in South American countries, government officials are the main participants in the Caribbean countries. The comparative analysis of the networks of ideas, information, economic resources, and political power across these cases indicates that differences in the types of bureaucratic systems and governance structures may explain the diversity of actors with decision power and the resources used to influence social policy formulation across the region. These analytical and methodological contributions combined with specific examples of policies and programs will help to enhance

the efficiency efficacy and sustainability of public policies in the social arena **Great Teachers** Barbara Bruns, Javier Luque, 2014-10-28 This book analyzes teacher quality in Latin America and the Caribbean which is the key to faster education progress Based on new research in 15 000 classrooms in seven different countries it documents the sources of low teacher quality and distills the global evidence on practical policies that can help the region produce great teachers **Journal of Economic Literature** ,2005 **The Least Developed Countries ... Report** ,2009 **Routledge Handbook of Industry and Development** John Weiss, Michael Tribe, 2015-09-16 The Routledge Handbook of Industry and Development is a global overview of industrialisation Each chapter will provide readers with contemporary insights into this this essential aspect of economic development Industrialisation has been at the forefront of discussion on economic development since the earliest days of development economics But over the last fifty years the manufacturing sectors of different countries and regions have grown at strikingly different rates In 1960 developing countries took a very small share of global manufacturing production Today the position had changed radically with fast growth of manufacturing in many parts of what was originally the developing world particularly in China and the rest of East Asia On the other hand countries in Africa and parts of Latin America have been largely left behind by this process of industrialisation This volume aims to illuminate this uneven development and takes stock of the current issues that hinder and support industrialisation in low and middle income economies This Handbook is a collection of chapters on different aspects of industrialisation experience in a range of countries Key themes include the role of manufacturing in growth the nature of structural change at different stages of development the role of manufacturing in employment creation alternative options for trade and industrial policy the key role of technology and technical change and the impact of globalisation and the spread of global value chains and foreign direct investment on prospects for industrialisation Several chapters discuss individual country experiences with examples from India Mexico South Africa and Tanzania as well as an overview of African industrialisation This authoritative Handbook will be a key reference source for those studying or wishing to understand contemporary economic development Offering inspiration and direction for future research this landmark volume will be of crucial importance to all development economics scholars and researchers Academy of Management Annual Meeting Academy of Management, 2005 *Fiscal Rules and Economic Size in Latin America and the Caribbean* Fernando Blanco, Pablo Saavedra, Friederike Koehler-Geib, Emilia Skrok, 2020-10-08 Following the collapse of commodity prices in Latin America and the Caribbean LAC in 2014 15 many countries in the region were unable to cushion the impact of the shock in order to experience a more gradual adjustment to a large extent because they had not built adequate fiscal buffers during the commodities windfall from 2010 14 Many LAC countries entered 2020 and the COVID 19 crisis in an even more difficult position with rising debt and limited fiscal space to smooth the negative impacts of the pandemic and adequately support their economies Fiscal policy in most LAC countries has been procyclical Public expenditure and debt levels have expanded in good times and contracted in severe downswings

due to insufficient fiscal buffers making crises deeper Fiscal rules represent a promising policy option for these and other economies If well designed and implemented they can help build buffers during periods of strong economic performance that will be available during rainy days to smooth economic shocks This book which was prepared before the COVID 19 crisis reviews the performance and implementation of different fiscal rules in the region and world It provides analytical and practical criteria for policy makers for the design establishment and feasible implementation of fiscal rules based on each country s business cycle features external characteristics type of shocks faced initial fiscal conditions technical and institutional capacities and political context While establishing new fiscal rules would not help to attenuate the immediate effects of this pandemic crisis higher debt levels in the aftermath of COVID 19 will demand rebuilding better and stronger institutional frameworks of fiscal policy in LAC and emerging economies globally Having stronger fiscal mechanisms that include fiscal rules can help countries prepare for the next crisis and should be on the front burner for policy makers in coming years The findings and lessons discussed apply to economies of different sizes with some differences under certain scenarios in terms of the technical design and criteria needed for implementation In this book policy makers will find that fiscal rules if tailored to country characteristics can work and be an essential fiscal tool for larger and particularly smaller economies
