Screen Comedy and Online Audiences Inger-Lise Kalviknes Bore, 2017-06-14 The question of why we laugh or don't laugh has intrigued scholars since antiquity This book contributes to that debate by exploring how we evaluate screen comedy What kinds of criteria do we use to judge films and TV shows that are meant to be funny And what might that have to do with our social and cultural backgrounds or with wider cultural ideas about film TV comedy quality and entertainment The book examines these questions through a study of audience responses posted to online facilities such as Twitter Facebook review sites blogs and message boards Bore's analysis of these responses considers a broad range of issues including how audiences perceive the idea of national comedy what they think of female comedians how they evaluate romcoms sitcoms and web comedy what they think is acceptable to joke about what comedy fans get excited about how fans interact with star comedians and what comedy viewers really despise The book demonstrates some of the ways in which we can adapt theories

of humour and comedy to examine the practices of contemporary screen audiences while offering new insights into how they negotiate the opportunities and constrictions of different online facilities to share their views and experiences

Television Series as Literature Reto Winckler, Víctor Huertas-Martín, 2022-01-19 This book explores how television series can be understood as a form of literature bridging the gap between literary and television studies It goes beyond existing adaptation studies and narratological approaches to television series in both its scope and depth The respective chapters address literary works themes tropes techniques values genres and movements in relation to a broad variety of television series while drawing on the theoretical work of a host of scholars from Simone de Beauvoir and Yuri Lotman to Ted Nannicelli and Jason Mittell and on critical approaches ranging from narratology and semiotics to empirical sociology and phenomenology The book fosters new ways of understanding television series and literature and lays the groundwork for future scholarship in a number of fields By questioning the alleged divide between television series and works of literature it contributes not only to a better understanding of television series and literary texts themselves but also to the development of interdisciplinary scholarship in the humanities

Meta Television Erin Giannini, 2024-03-18 The idea of metatextuality is frequently framed as a recent television development and often paired with the idea that it represents genre exhaustion US television however with its early live performances and set bound sitcoms always suggested an element of self awareness that easily shaded into metatextuality even in its earliest days Meta Television thus traces the general history of US television s metatextuality throughout television s history arguing that TV s self awareness is nothing new and certainly not evidence of a period of aesthetic exhaustion but instead is woven into both its past and present practice elucidated through case studies featuring series from the 1970s to the present day many of which have not been critically analyzed before and the various ways they deploy metatext to both construct and deconstruct their narratives Further Meta Television asserts that this re and de construction of narrative and production isn t just a reward to the savvy and or knowledgeable viewer or consumer but seeks to make broader points about the media we consume and how we consume it This book explores the ways in which the current metatextual turn in both the usual genres in which it appears horror and sci fi fantasy and its movement into drama and sitcom represents the next turn in television s inherent self awareness It traces this element throughout television s history growing from the more modest reflexivity of programs awareness of themselves as created objects in a particular medium to the more significant breaking of the fictive illusion and therefore the perceived distance between the audience and the series Erin Giannini shows how the increased currency of metatextual television in the contemporary era can be tied to a viewership well versed in its stories and production as well as able and willing to talk back via social media If television reflects culture to a certain extent this increased reflexivity mirrors that responsive audience as a consequence of the lack of

distance that metafiction embraces As Robert Stam traced the use and implications of reflexivity in film and literature this book does the same for television further problematizing John Ellis's glance theory in terms of both production and spectatorship

Television Sitcom and Cultural Crisis Holly Willson Holladay, Chandler L. Classen, 2024-06-21 This volume demonstrates that television comedies are conduits through which we might resist normative ways of thinking about cultural crises By drawing on Gramscian notion of crisis and the understanding that crises are overlapping interconnected and mutually constitutive the essays in this collection demonstrate that situation comedies do more than make us laugh they also help us understand the complexities of our social world's moments of crisis Each chapter takes up the televisual representation of a modern cultural crisis in a contemporary sitcom and is grounded in the extensive body of literature that suggests that levity is a powerful mechanism to make sense of and cope with these difficult cultural experiences Divided into thematic sections that highlight crises of institutions and systems identity and representation and speculation and futurism this book will interest scholars of media and cultural studies political economy communication studies and humor studies

Communicated Stereotypes at Work Yifeng Hu, Anastacia Kurylo, 2024-05-15 In *Communicated Stereotypes at Work* the editors and contributors posit that stereotypes communicated in the workplace remain a pervasive issue due to the dichotomy between the discriminatory and functional roles that these stereotypes can play in a range of professional settings Contributors demonstrate that while the use of stereotypes in the workplace is distasteful and exclusionary communicating these stereotypes can also appear on the surface to provide a pathway toward bonding with others giving advice and reducing uncertainty The result of this dichotomy is that those who communicate stereotypes in the workplace may not view this communication from themselves or others as being problematic With an emphasis on qualitative methods and analyses contributors deconstruct stereotypes by exploring the theoretical empirical and pragmatic roles they play in communication In doing so authors expose the underpinnings of stereotypes and why they are communicated focus on the role all of us play in perpetuating stereotypes and suggest alternative modes of productive discourse Scholars of interpersonal and organizational communication cultural studies and sociology as well as practitioners of various professions will find this book particularly useful
