Beyond the Boom Charlie Taylor, McKinsey Global Institute, 2012 *National Intellectual Capital and the Financial Crisis in Australia, Canada, Japan, New Zealand, and the United States* Carol Yeh-Yun Lin, Leif Edvinsson, Jeffrey Chen, Tord Beding, 2013-11-01 In the first decade of the twenty first century the biggest event of worldwide proportion was the 2008 global financial crisis which was caused primarily by ineffective governance failed surveillance systems and implementation flaws While fiscal and monetary policies succeeded in pulling many countries out of a financial freefall most economies have performed beneath pre recession levels as governments continued to struggle with their finances Examining the financial crisis from the viewpoint of intangible assets provides a different perspective from traditional economic approaches National Intellectual Capital NIC comprised mainly of human capital market capital process capital renewal capital and financial capital is a valuable intangible asset and a key source of national competitive advantage in today s knowledge economy The authors pioneers in the field present extensive data and a rigorous conceptual framework to analyze the connections between the global financial crisis and NIC development Covering the period from 2005 to 2010 across 48 countries the authors establish a positive correlation between NIC and GDP per capita and consider the impact of NIC investment for short term recovery and long term risk control and strategy formulation Each volume in a series of Springer Briefs on NIC and the financial crisis provides in depth coverage of the impact of the crisis the aftermath future prospects and policy implications for a regional cluster This volume focuses on Australia Canada Japan New Zealand and the United States of America

Inclusive Growth in Australia John Buchanan, 2020-07-16 Inclusive Growth in Australia overturns two decades of assumptions that social policy is wasteful and a source of dependency It reflects a global resurgence of the understanding that an active and effective social policy regime is vital not only for a flourishing society but also for a strong economy It explains this new paradigm of inclusive growth and shows how it can be implemented in Australia Inclusive growth dismantles the idea that social development will automatically trickle down from untrammelled market based growth Rather growth must be managed so that it is employment centred broad based across sectors and with a social security system promoting sustainability and equality of opportunity The editors argue that productivity is nearly everything when it comes to raising living standards So while social policies will be about goals other than the economy they must demonstrate their compatibility with an economic growth strategy With contributions from leading national and international experts in the field including Marian Baird Grant Belchamber Gerald Burke Saul Eslake Roy Green and Peter Whiteford Inclusive Growth in Australia shows that welfare state spending is as much an economic investment as a measure of social protection Written for policy makers industry and NGOs as well as students Inclusive Growth in Australia locates Australian economic and social policy within the most important emergent themes shaping international debate [Australia's Metropolitan Imperative](#) Richard Tomlinson, Marcus Spiller, 2018-07 Since the early 1990s there has been a global trend towards governmental

devolution However in Australia alongside deregulation public private partnerships and privatisation there has been increasing centralisation rather than decentralisation of urban governance Australian state governments are responsible for the planning management and much of the funding of the cities but the Commonwealth government has on occasion asserted much the same role Disjointed policy and funding priorities between levels of government have compromised metropolitan economies fairness and the environment Australia's Metropolitan Imperative An Agenda for Governance Reform makes the case that metropolitan governments would promote the economic competitiveness of Australia's cities and enable more effective and democratic planning and management The contributors explore the global metropolitan renaissance document the history of metropolitan debate in Australia and demonstrate metropolitan governance failures They then discuss the merits of establishing metropolitan governments including economic fiscal transport land use housing and environmental benefits The book will be a useful resource for those engaged in strategic transport and land use planning and a core reference for students and academics of urban governance and government

new study offers a timely and compelling account of why past generations of Australians have seen the north of the country as an empty land and how those perceptions of Australia's tropical regions impact current policy and shape the self image of the nation. It considers the origins of these concerns from fears of invasion and moral qualms about leaving resources lying idle from apprehensions about white nationhood coming under international censure and misgivings about the natural attributes of the north and elucidates Australians' changing appreciations of the natural environments of the north, their shifting attitudes toward race and their unsettled conceptions of Asia.
