Beyond the Nation-state Ernst B. Haas, 1964 **Beyond the nation-state: functionalism and international organization** Ernst Bernard Haas, *Beyond the Nation-State : Functionalism and International Organization* Ernst B. Haas, 1968 **Beyond the Nation-State** Ernst B. Haas, 2024-08-22 Of all of the books produced by Ernst B Haas during his career *Beyond the Nation State* contains the most complete and definitive statement of neofunctionalism the theory of transnational integration for which he is best known Focusing on the International Labor Organization ILO *Beyond the Nation State* was one of the first efforts to analyse systematically the dynamics and effects of a global international institution Regarded as a classic in comparative politics and international relations and among students of European integration this book enjoyed a renaissance with the end of the cold war reinvigorated European integration and resumed interest in communitarian theorising about forms of global governance which relied on a heightened role for international institutions and their associated policy communities First published in 1964 *Beyond the Nation State* was part of larger project described by others as neofunctionalism regional integration and soft constructivism which animated Haas throughout his career *Beyond the Nation State* continues to provide valuable guidelines for describing and understanding contemporary IR and is reissued with a new introduction by Peter M Haas John G Ruggie Philippe Schmitter and Antje Wiener placing this important work in a current context **Beyond the Nation-state; Functionalism and International Organization [by] Ernst B. Haas** Ernst B. Haas, 1964 **International Organization as Technocratic Utopia** Jens Steffek, 2021 This volume examines the development of the idea of technocratic internationalism the promotion of the involvement of experts in the workings of international relations especially in international organizations such as the United Nations and European Union *Sovereign (In) Equality in International Organizations* Athena Debbie Efraim, 2021-10-25 This book challenges the dominant intellectual assumptions of mainstream international law scholarship regarding the principle of Sovereign Equality The animus and scope of this challenge is situated in the context of the decision making processes in International Governmental Organizations IGOs which employ the one state one vote and or the weighted voting rule Using the theories of Functionalism and Legitimacy to analyze the legal implications and complications of the principal voting mechanisms and voting practices of certain key IGOs vis vis the doctrine of Sovereign Equality the author establishes that this doctrine has remained far too orthodox for contemporary realities In this context she emphasizes the importance of the necessity for functional legitimate decision making processes in global governance and accordingly advocates the elimination of the anachronistic and non viable principle of Sovereign Equality from international institutional law The author also rejects the introduction of any new principle in IGOs e g democratic governance which will render decision making even less functional *Decision Making Within International Organisations* Bob Reinalda, Bertjan Verbeek, 2004-07-31 Following the end of the Cold War and in the context of globalization this book examines the extent to which member states dominate

decision making in international organizations and whether non state actors for example non governmental organizations and multinational corporations are influential The authors assess the new patterns of decision making to determine whether they are relatively open or closed privileged networks The organizations examined include the Council of Europe the United Nations the EU G8 the World Trade Organization International Maritime Organizations the World Health Organization and the OECD

The European Commission and the Integration of Europe Liesbet Hooghe, 2001 What kind of European Union do top Commission officials want Should the European Union be supranational or intergovernmental Should it promote market liberalism or regulated capitalism Should the Commission be Europe's government or its civil service This 2002 book examines top officials preferences on these questions through analysis of unique data from 137 interviews Understanding the forces that shape human preferences is the subject of intense debate Hooghe demonstrates that the Commission has difficulty shaping its employees preferences in the fluid multi institutional context of the European Union Top officials preferences are better explained by experiences outside rather than inside the Commission political party country and prior work leave deeper imprints than directorate general or cabinet Preferences are also influenced more by internalized values than by self interested career calculation Hooghe's findings are surprising and will challenge a number of common assumptions about the workings and motives of the European Commission

The Elgar Companion to the European Union Samuel B.H. Networks and Geographies of

Global Social Policy Diffusion Michael Windzio,Ivo Mossig,Fabian Besche-Truthe,Helen Seitzer,2021-11-24 This open access book analyses the global diffusion of social policy as a process driven by multiplex ties between countries in global social networks The contributions analyze links between countries via global trade colonial history similarity in culture and spatial proximity Networks are viewed as the structural backbone of the diffusion process and diffusion is analysed via several subfields of social policy in order to interrogate which network dimensions drive this process The focus is on a global perspective of social policy diffusion via networks and it is the first book to explicitly follow this macro quantitative perspective on diffusion at a global scale whilst also comparing different networks The collection tests the network structures in terms of their relevance to the diffusion process in different subfields of social policy such as old age and survivor pensions labor and labor markets health and long term care education and training and family and gender policy The book will therefore be invaluable to students and researchers of global social policy sociology political science international relations organization theory and economics **The Political Economy of Communications** Kenneth Dyson,Peter

Humphreys,2023-10-20 First published in 1990 The Political Economy of Communications explores the central theme of the relationship between politics and markets in policy development The contributors show how governments have been drawn into increasing interdependency by technological and market developments with international institutions like the European Community becoming more important in these policy areas They argue that neither government ideologies nor market and technological forces offer an adequate account of the processes of change in communications policy These conclusions lead to a critique of central theories of international political economy notably neo liberalism and the authors advocate instead a neo pluralist perspective for the study of political economy of communications an approach that takes institutions much more seriously as a central unit of analysis The book will be of interest to students of international relations European studies and media and telecommunication studies as well as to political scientists and economists concerned with public policy

Approaches to World Order Robert W. Cox,Timothy J. Sinclair,1996-03-28 Robert Cox s writings have had a profound influence on recent developments in thinking in world politics and political economy in many countries This book brings together for the first time his most important essays grouped around the theme of world order The volume is divided into sections dealing respectively with theory with the application of Cox s approach to recent changes in world political economy and with multilateralism and the problem of global governance The book also includes a critical review of Cox s work by Timothy Sinclair and an essay by Cox tracing his own intellectual journey This volume will be an essential guide to Robert Cox s critical approach to world politics for students and teachers of international relations international political economy and international organisation **Latin America and the Shifting Sands of Globalization** Sean W. Burges,2016-01-22

Latin America occupies an increasingly prominent position within the global political economic and cultural consciousness with intra regional governance structures and multilateral processes now a key topic of interest to foreign policy and

international business circles It has become abundantly clear that outside of Latin America there is a poor understanding of how the shifting sands of regional power are impacting not only on how regional countries fit into the global system but also on how intra regional relations are viewed and managed The contributions to this collection investigate these issues examining how changing global power dynamics are in turn impacting on national foreign policies and regional governance structures The book focuses first and foremost on the Latin American view outwards not the US or European view to the south This book was originally published as a special issue of the Journal of Iberian and Latin American Research

Exploration and Contestation in the Study of World Politics Peter J. Katzenstein, Robert Owen Keohane, Stephen D. Krasner, 1999 New insights into the interplay between conflict and cooperation the impact of domestic political structures on foreign policy the role of institutions and the influence of worldviews and causal beliefs on decision making *Rules for the World* Michael Barnett, Martha Finnemore, 2012-04-15 Rules for the World provides an innovative perspective on the behavior of international organizations and their effects on global politics Arguing against the conventional wisdom that these bodies are little more than instruments of states Michael Barnett and Martha Finnemore begin with the fundamental insight that international organizations are bureaucracies that have authority to make rules and so exercise power At the same time Barnett and Finnemore maintain such bureaucracies can become obsessed with their own rules producing unresponsive inefficient and self defeating outcomes Authority thus gives international organizations autonomy and allows them to evolve and expand in ways unintended by their creators Barnett and Finnemore reinterpret three areas of activity that have prompted extensive policy debate the use of expertise by the IMF to expand its intrusion into national economies the redefinition of the category refugees and decision to repatriate by the United Nations High Commissioner for Refugees and the UN Secretariat's failure to recommend an intervention during the first weeks of the Rwandan genocide By providing theoretical foundations for treating these organizations as autonomous actors in their own right Rules for the World contributes greatly to our understanding of global politics and global governance **A History of International Civil**
