**Beyond Remote-controlled Childhood** Diane E. Levin, 2013 Reduce screen media's potentially harmful impact

Young Children in a Digital Age Lorraine Kaye, 2016-06-23 Young children are born into a digital world and it is not unusual to see preschool children intuitively swiping screens and confidently pressing buttons. There is much debate about the impact of the increased access to technology on young children's health and wellbeing, with claims that it damages their social skills and emotional development. This timely new textbook examines how developments in technology, particularly mobile and touch screen technology, have impacted on children's lives and how, when used appropriately, it can support all aspects of their development. Clearly linking theory and research to everyday practice, the book offers guidance on the role of technology in the early years curriculum. Developing young children's understanding of safe and responsible use of technology. The role of the adult within digital play activities. Using technology to enhance and develop young children's creativity. Technology and language acquisition. Featuring a wide range of case studies and examples to show how the ideas described can be put into practice, this is essential reading for all early years students and practitioners that want to know how they can harness technology in a meaningful way to support young children's learning and development. **Children's**

**Self-determination in the Context of Early Childhood Education and Services** Federico Farini, Angela

Scollan, 2019-06-26 This book investigates the position of young children's self-determination within a range of social contexts such as education, social care, mass media, health, politics, law, and the family. It brings to the fore the voices of the children in the present with their interests, agendas, and rights. Based on original primary research, the chapters tackle hegemonic discourses on children's self-determination as well as current policies and practices. They address a broad range of topics from the planning of role play to national policies, from the use of digital technologies for pedagogy to children's health and well-being, and from democratic practices in the classroom to the preservation of traditional family values. The book presents case studies to unravel how childhood and young children's self-determination are constructed at the intersection with intergenerational relationships. Coming from different disciplines and using a diverse range of methodological traditions, the contributions in the volume eventually converge to generate a rich, complex, and multi-layered analysis of contemporary cultures of childhood and young children's rights. *Handbook of Research on Empowering Early Childhood Educators With Technology* Burris, Jade, Rosen, Dina, Karno, Donna, 2021-06-18

Computers and mobile technologies have become widely adopted as sought-after tools in the field of education. The prevalence of technology in early childhood education (ECE) is increasing, and teachers, both pre-service and in-service, are using best practices to integrate tools effectively to improve teaching and learning within the field. This includes settings such as childcare centers, family childcare, and community programs that have both educators and administrators adapting to the use of technology. Therefore, it has become critical to research and explore the best practices of technology integration and successful strategies to improve the

*Transdisziplinäre Medienbildung* Julia

Kernbach, 2025-02-11 Der Diskurs über Medienbildung wächst und wandelt sich stetig, dennoch bleibt die konkrete Umsetzung im Unterricht für Lehrkräfte oft unklar. Erstmals geht Julia Kernbach der Frage nach, dem Wie nach und betrachtet exemplarisch die Einstellungen und Praxis von Lehrkräften im Bereich Medienbildung an Montessori und Waldorfschulen. Sie analysiert, welche Faktoren beeinflussend wirken und plädiert für eine transdisziplinäre Medienbildung in der Aus- und Weiterbildung von Lehrkräften, die in Theorie und Praxis weit über den Erwerb digitaler Kompetenzen hinausgeht.
