Public Scholarship for Our Time Adrianna J. Kezar,Yianna Drivalas,Joseph A. Kitchen,2023-07-03 This book proposes a new paradigm of public scholarship for our time one that shifts from the notion of the public intellectual to the model of the engaged scholar The editors premise is that the work of public scholarship should be driven by a commitment to supporting a diverse democracy and promoting equity and social justice The contributors to this volume present models that eschew the top down framing of policy to advocate for practice that drives bottom up change by arming the widest range of stakeholders especially members of marginalized communities with relevant research They demonstrate how public scholarship in higher education can increase its impact on practice and policy and compellingly argue that public scholarship should be recognized as normative practice for all scholars and indeed integrated into the curriculum of graduate courses The chapters describe multiple types of public scholarship and different strategies that move beyond informing policymakers faculty and administrators to engage publics such as students and parents media the general public and particularly groups that may have had little or no access to research Examples include partnering with a community agency to design a research project and disseminate results writing for practitioner or policy venues and magazines outside the traditional academic journals serving on boards for national groups that impact decisions related to your area of research and the use of social media Whether scholar director of graduate education or graduate student of higher education this book opens up a new vision of how research can inform practice that promotes the public good **Reclaiming Indigenous Research in Higher**

Education Robin Zape-tah-hol-ah Minthorn,Heather J. Shotton,2018-02-27 Indigenous students remain one of the least represented populations in higher education They continue to account for only one percent of the total post secondary student population and this lack of representation is felt in multiple ways beyond enrollment Less research money is spent studying Indigenous students and their interests are often left out of projects that otherwise purport to address diversity in higher education Recently Native scholars have started to reclaim research through the development of their own research methodologies and paradigms that are based in tribal knowledge systems and values and that allow inherent Indigenous knowledge and lived experiences to strengthen the research Reclaiming Indigenous Research in Higher Education highlights the current scholarship emerging from these scholars of higher education From understanding how Native American

students make their way through school to tracking tribal college and university transfer students this book allows Native scholars to take center stage and shines the light squarely on those least represented among us
