Bethe Correia Net Worth:

Nothing To Come Fabrice Correia, Sven Rosenkranz, 2018-05-03 This monograph is a detailed study and systematic defence of the Growing Block Theory of time GBT first conceived by C D Broad The book offers a coherent logically perspicuous and ideologically lean formulation of GBT defends it against the most notorious objections to be found in the extant philosophical literature and shows how it can be derived from a more general theory consistent with relativistic spacetime on the pre relativistic assumption of an absolute and total temporal order The authors devise axiomatizations of GBT and its competitors which against the backdrop of a shared quantified tense logic significantly improves the prospects of their comparative assessment Importantly neither of these axiomatizations involves commitment to properties of presentness pastness or futurity The authors proceed to address and defuse a number of objections that have been marshaled against GBT including the so called epistemic objection according to which the theory invites skepticism about our temporal location The challenge posed by relativistic physics is met head on by replacing claims about temporal variation by claims about variation across spacetime The book aims to achieve the greatest possible rigor The background logic is set out in detail as are the principles governing the notions of precedence and temporal location The authors likewise devise a novel spacetime logic suited for the articulation and comparative assessment of relativistic theories of time The book comes with three technical appendices which include soundness and completeness proofs for the systems corresponding to GBT and its competitors in both their pre relativistic and relativistic forms The book is primarily directed at researchers and graduate students working on the philosophy of time or temporal logic but is of interest to metaphysicians and philosophical logicians more generally
