Roulette Odds and Profits Catalin Barboianu, 2008 Continuing his series of books on the mathematics of gambling the author shows how a simple rule game such as roulette is suited to a complex mathematical model whose applications generate improved betting systems that take into account a player's personal playing criteria The book is both practical and theoretical but is mainly devoted to the application of theory About two thirds of the content is lists of categories and sub categories of improved betting systems along with all the parameters that might stand as the main objective criteria in a personal strategy odds profits and losses The work contains new and original material not published before The mathematical chapter describes complex bets the profit function the equivalence between bets and all their properties All theoretical results are accompanied by suggestive concrete examples and can be followed by anyone with a minimal mathematical background because they involve only basic algebraic skills and set theory basics The reader may also choose to skip the math and go directly to the sections containing applications where he or she can pick desired numerical results from tables The book offers no new so called winning strategies although it discusses them from a mathematical point of view It does however offer improved betting systems and helps to organize a player's choices in roulette betting according to mathematical facts and personal strategies It is a must have roulette handbook to be studied before placing your bets on the turn of either a European or American roulette wheel

The Wizard of Odds Dani Haviland, 2021-10-07 Why won't people just leave him alone He's perfectly happy being a loner until fate shoves him into a carpool full of oddballs on a cross country rescue mission An unlikely crew of insurance company misfits and one self employed massage therapist set out to save exotic animals from a black market gambler who thinks rare critters make the best supper ingredients From the frozen roads of Minnesota to the sunbaked deserts of Arizona they'll have to survive snowstorms stalkers and each other But somewhere between midnight drives close calls and too many snacks laughter sparks tempers flare and love sneaks into the mix Can this ragtag team find their way to happily ever after or will their second chances crash before the finish line A bright laugh out loud romantic comedy about found family love at first sight and the beautiful chaos of second chances
