Multiple Knowledges. Learning

from/with Other Beings Joanna Godlewicz-Adamiec, Paweł Piszczatowski, Justyna Włodarczyk, Piotr Kociumbas, 2022-04-11

This issue of Transpositiones showcases a range of interdisciplinary and critical approaches to classic and alternative conceptions of cognition and sources of knowledge. The articles reflect on the many types of sensory and extrasensory knowledge available to non-human beings and wonder whether and in what ways we as humans can perceive, conceptualize, and respect these knowledges. The authors highlight how the existence of multiple knowledges questions species boundaries and onto and epistemological perspectives in the process of learning not only about other beings but also from and along with them. This selection of texts attempts to contribute to overcoming the anthropocentric perception of subjectivity and to the abandoning of an optics based on the dualisms of nature and culture, spirit and matter, subject and object, animate and inanimate, nature, physis and techne, etc., which are so firmly entrenched in the Western intellectual tradition. Sean Esbjorn-Hargens, Ph.D., Michael E. Zimmerman, Ph.D., 2011-03-08 Today there is a bewildering diversity of views on ecology and the natural environment. With more than two hundred distinct and valuable perspectives on the natural world and with scientists, economists, ethicists, activists, philosophers, and others often taking completely different stances on the issues, how can we come to agreement to solve our toughest environmental problems? In response to this pressing need, Integral Ecology unites valuable insights from multiple perspectives into a comprehensive theoretical framework, one that can be put to use right now. The framework is based on Integral Theory as well as Ken Wilber's AQAL model and is the result of over a decade of research exploring the myriad perspectives on ecology available to us today and their respective methodologies. Dozens of real-life applications and examples of this framework currently in use are examined, including three in-depth case studies: work with marine fisheries in Hawaii, strategies of eco-activists to protect Canada's Great Bear Rainforest, and a study of community development in El Salvador. In addition, eighteen personal practices of transformation are provided for you to increase your own integral ecological awareness. Integral Ecology provides the most sophisticated application and extension of Integral Theory available today and, as such, it serves as a template for any truly integral effort.
