experience of these fascinating sports **Being Extreme** Bill Gutman, 2014-04-01 As fast paced as a freefall from a roaring airplane as thrilling as a towering jump off a ski slope Being Extreme is a fascinating examination of the adrenaline rush of extreme sports Here is a world where living life on the edge is the only option where you are only as good as your last jump and where one false move can take you out of the game permanently From mountain climbing and freestyle motocross to skydiving and snowboarding and beyond in the past decade the world of extreme sports has exploded onto the scene with daredevils attempting acts of athleticism that leave spectators awed and fearful Being Extreme explores the motivations and societal impulses behind these high risk lifestyles through interviews with professional athletes and recreational enthusiasts as well as with psychiatrists who seek to understand the motivation behind these Big T personalities Authors Gutman and Frederick also explore what heart stopping sports are around the next curve because in a world where the rush is everything everyone is always upping their game **Understanding Extreme Sports: A Psychological Perspective** Eric

Understanding the motivations behind those who partake in extreme sports can be difficult for some If the popular conception holds that the incentive behind extreme sports participation is entirely to do with risking one's life then this confusion will continue to exist However an in depth examination of the phenomenology of the extreme sport experience yields a much more complex picture This book revisits the definition of extreme sports as those activities where a mismanaged mistake or accident would most likely result in death Extreme sports are not necessarily synonymous with risk and participation may not be about risk taking Participants report deep inner transformations that influence world views and meaningfulness feelings of coming home and authentic integration as well as a freedom beyond the everyday Phenomenologically these experiences have been interpreted as transcendent of time other space and body Extreme sport participation therefore points to a more potent life enhancing endeavour worthy of further investigation This book adopts a broad hermeneutic phenomenological approach to critique the assumed relationship to risk taking the death wish and the concept of No Fear in extreme sports and repositions the experience in a previously unexplored manner This is valuable reading for students and academics interested in Sports Psychology Social Psychology Health Psychology Tourism Leisure Studies and the practical applications of phenomenology **Beyond Pug's Tour**
