Beyond Philosophy Subject Educational Post Structuralist:

Beyond the Philosophy of the Subject Michael A. Peters, Marek Tesar, 2015-11-19 This first volume focuses on a collection of texts from the latter twenty years of Educational Philosophy and Theory selected for their critical status as turning points or important awakenings in post structural theory In the last twenty years the applications of the postmodern and poststructuralist perspectives have become less mono focused less narrowly concerned with technical questions and also less interested in epistemology and more interested in ethics This book covers questions of genealogy ontology the body and the institution giving examples of theoretical applications of post structural theory that testify to the generative and endlessly applicable potential of this work to different fields and avenues of thought While informed by Foucault's thinking of the political subjugation of docile bodies to individuals as self determining beings the chapters in this book culminate in amalgamations of different schools of educational philosophy which explore poststructuralist approaches to education *Beyond the Philosophy of the Subject* will be key reading for academics researchers and postgraduate students in the fields of philosophy of education philosophy education educational theory post structural theory the policy and politics of education and the pedagogy of education

Critical Readings in Teacher Education, 2008-01-01 Like other fields of study teacher education defines itself both by what it includes and by what it excludes Teacher educators and researchers have spent a great deal of time seeking and attempting to eradicate the flaws in existing structures and practices but significantly less time learning to perceive the absences The premise of this book is that until we can identify and begin to address what is absent teacher education will be constrained by a perennial recycling of concerns that have characterized so much of research policy and practice to date If teacher education is to have a different future we need to ask different and difficult questions This book with contributions from theorists in Australia Canada and the United States addresses the challenges we face in establishing a more hopeful future for teacher education The authors provocative contributions identify what is missing in teacher education while providing critical counterpoints to existing frames of reference in the field In writing against the grain they open up new conceptual spaces and exciting trajectories for a different teacher education

Philosophical Perspectives on Compulsory Education Marianna Papastephanou, 2013-09-12 From antiquity to the present schools of some form have in one way or other been involved in the material and symbolic reproduction of societies Such diachronic resilience along with the synchronic omnipresence of schooling often makes schools appear as natural self evident and unavoidable This naturalization of schooling is then extended to its modern specification as compulsory in a universalist fashion This book does not only seek to explore what is left of older debates on compulsory education in the years hindsight but also to associate the discussion of schooling with new theoretical developments and new emphases It contains a first part which operates primarily at the conceptual and justificatory level and reserves a more or less qualified welcome to a revisited notion of compulsory And it supplements this first part with a second more applied one that focuses on specific aspects of

compulsory schooling and or education From Luther down to John Stuart Mill and John Dewey compulsory education has been heralded either as a vehicle of social coordination and individual well being or as a vehicle of democratization and progress or as a means for protecting the rights of the young and of society and so on and so forth But there have also been periods of challenge and denaturalization of compulsory education producing a range of interesting and spirited debates not only on matters of educational legality but also on matters that boil down to broader philosophical questions about the self and the world Without neglecting the lasting significance of older debates argumentation over schooling its character and its scope can be recast in the light of current philosophical educational debates Given the fact that failure adequately to mine such connections leads to a lack in philosophical educational engagement with one of the most central pedagogical practices of the contemporary world namely the school the book aspires to remedy this lack and to put together work that addresses those connections through the highly original and innovative work of its contributors The subtext in all contributions is a vision of educational transformation in one way or other All chapters from the most theoretical to the most practice related promote a version of a recast or redirected compulsory schooling *Poststructuralism, Philosophy, Pedagogy* J.D.

Marshall, 2006-01-18 This book has been quite long in the making In its original format but with some different chapters and with the then publisher it foundered as did other volumes in the planned series At the in press stage when we obviously thought it was going ahead it was suddenly canned Quite distraught I closed it away in a desk drawer for a year or so But then Joy Carp of Kluwer Academic Publishers expressed an interest in it and we were in business again Most of the contributors to the original volume have stayed with it only to be delayed by myself for a variety of reasons but see the dedication I had been writing on Michel Foucault for a number of years but had become concerned about mis appropriations of his ideas and works in educational literature I was also concerned about the increasingly intemperate babble in that literature of the notion of postmodernism Indeed at one major educational conference in North America I listened to a person expounding postmodernism in terms of Destroy Destroy Destroy Like Michel Foucault I am not quite sure what postmodernism is but following Mark Poster's account of poststructuralism as merely a collective term to catch a number of French thinkers I thought that what we had to do in education was to look at what particular thinkers had said and not become involved in vapid discussion at an abstract level on isms Thus the book was conceived **Feminist Critique of**

Teaching Marx Curry Malott, John M. Elmore, Mike Cole, 2013-05-01 We are in the midst of yet another global crisis in capitalism In the UK we have the most right wing and ideologically driven government since Thatcher a ruthless cabal of millionaires intent on destroying the welfare state In the US President Obama whose initial record did not live up to the expectations of many on the Left is increasingly driven by right wing republicanism and other corporate interests At the same time there are developments in Latin America in particular Venezuela which are heralding the dawn of a new politics and recovering the voice of Marx but with a twenty first century socialist focus thus giving hope to the lives of millions of working people throughout the world This is why the world media is intent on discrediting President Hugo Chavez and insisting that ordinary people have to pay the cost of the crisis in capitalism The Arab Spring and the Occupy movement also show signs of an anti capitalist movement in embryo In Greece perhaps more than anywhere else in Europe even France the austerity stricken working classes are pushing for real existing socialism It is therefore not surprising that the ruling class of Greece is increasingly supporting the neo Nazi fascist Golden Dawn party threatening civil war should they lose power as a class Now is a prescient time to bring twenty first century socialism to the educational institutions of the world to teach Marx across the curriculum and across the globe Through this volume our goal was to contribute to the literature by concretely demonstrating the practical implications of Marx's theory to curriculum However while this book provides concrete examples of how Marx can and has informed a revolutionary critical education it is not intended to be prescriptive That is the chapters should not be read as a how to guide but they should be taken as inspiration for new creative approaches to Teaching Marx and interpreting and posing The Socialist Challenge **A Contemporary Theory of Mathematics Education Research**
