Beyond Tipping Point The Wiley International Volume 1:

Creating a Tipping Point: Strategic Human Resources in Higher Education Alvin Evans, Edna Chun, 2012-04-27 In a turbulent unstable era of severe financial pressures the development of strategic human resource HR practices has become an urgent mandate in higher education With significant and widespread institutional shifts resulting from globalization heightened competition and rapid innovation educational leaders must optimize their most significant resource human capital and align HR strategies structures and processes with organizational goals Due to substantial cuts in state appropriations and rapidly diminishing budgets public institutions of higher education in particular are struggling to realign resources and programs to fulfill their educational missions and maintain academic quality while simultaneously responding to complex external legislative and accreditation mandates In light of these challenges *Creating a Tipping Point Strategic Human Resources in Higher Education* breaks new ground by presenting a research based approach that supports the evolution of HR practices from siloed transactional models to strategic operations that serve the entire university This monograph provides a concrete progressive road map to developing organizational capabilities in support of the university's academic mission and illustrates this pathway with examples drawn from public research universities It offers strategies tools metrics and action steps that support the development of an effective and efficient strategic HR operation in higher education For institutions seeking to implement strategic HR this book is a practical and invaluable resource

Tipping Point for Advanced Capitalism D.W. Livingstone, 2023-09-07T00:00:00Z *Tipping Point for Advanced Capitalism* is a pathbreaking study of the changing class makeup of the Canadian other G7 and Nordic labour forces since the 1980s documenting especially the rise of non managerial professional employees The book provides unprecedented tracking of the links between employment classes and higher levels of class consciousness including the often hidden political consciousness of corporate capitalists as well as the extent of oppositional and revolutionary consciousness among non managerial workers The large differences exposed between class conscious capitalists and these non managerial workers on issues of poverty reduction and global warming reveal the strategic roles these key class agents play in actions to defend or transform advanced capitalism The most concerted evidence based study to bring class back into grasping the intimately linked ecological economic and political crises we now face

DATA MINING: Predicting Tipping Points Dr. Philip Gordon, PhD, 2013-01-31 *Tipping Points* as evidenced in global events are in many ways influenced by media **DATA MINING** for predicting and analyzing world events This just released ground breaking book **DATA MINING PREDICTING TIPPING POINTS** by Dr Philip Gordon Ph D details three case studies which were selected on the basis of common *Tipping Point* Attributes Each involved media contagiousness and stickiness during their development and each arrived at a dramatic moment in time which could only be characterized by the phenomenon of *Tipping Points* Three recent case studies explore the leading edge technologies of **DATA MINING** and the theory of **TIPPING POINTS** The first case study the 2008

Presidential Campaign of Barack Obama was chosen to examine a narrower scope and timeframe for the application of the analysis In contrast to the second case study the International Financial Crisis of 2007 2010 which involves a broader data study period to identify trends and more complex issues The third study Climate Change was included as consideration because the data mining research and analysis revealed critical relationships between Media Impact and Global Events As the issue of Climate Change is still evolving Dr Gordon provides a Data Mining and Tipping Point Theory methodology for analyzing and predicting our planets most pressing Global Tipping Points Review Comments The genius of the formulation of DATA MINING PREDICTING TIPPING POINTS is that it takes explicit account of the role of social media and the internet at facilitating bifurcations and promoting dynamical instability In effect we have trimmed a few feet of tail off the kite As a reader I was informed and educated as to the factors which conspire to influence stability instability in complex social systems the book does a good job of making sense of past bifurcations and dynamical instabilities namely political instability our perception of global climate change and international economic crises my compliments on a truly insightful Media Tipping Points Prof Dr med Peter S Geissler A B B S M S M Phil Ph D Yale M A M Eng M S Ph D M S M D M Phil Cantab A truly fascinating book that teaches a whole new way of thinking about major events and how the media can influence them Being a political junkie I was heavily into the media coverage of the 2008 Obama election and the global financial meltdown both via TV and the blogosphere I now find myself looking for the tipping points and stickiness factors as other key events unfold Usually I have trouble reading theoretical books but this one was an easy read and if you want supporting data then the references are there This could become a solid reference for those in the media who truly want to understand what they are reporting Highly recommended and I look forward to Dr Gordon s ongoing analysis of future events Dr Ralph Moorhouse Ph D Political junkie Expert natural polymers for industries The application of Data Mining and Tipping Point Theory to media and global events particularly the financial crisis and climate change is a fascinating one Dr Serge Besanger PhD Expert International Monetary Fund very interesting application of the Tipping Point Theory potential opportunity for predicting other global events i e Egyptian crisis and perhaps even terrorism activities Dr Adam AJLANI PhD Professor Sciences Politic and Political Consultant France TV1

Reimagining Science Education in the Anthropocene, Volume 2 Sara Tolbert, Maria F.G. Wallace, Marc Higgins, Jesse Bazzul, 2023-11-29 This volume a follow up to Reimagining Science Education in the Anthropocene 2021 continues a transdisciplinary conversation around reconceptualizing science education in the era of the Anthropocene Drawing educators from many walks of life and areas of practice together in a creative work that helps reorient science education toward the problems and peculiarities associated with this contemporary geologic time This work continues the mission of transforming the ways communities inherit science and technology education its knowledges practices policies and ways of living with Nature Our understanding of the Anthropocene is necessarily open and pluralistic as different beings on our planet experience this time of crisis in different ways This second volume continues to nurture

productive relationships between science education and fields such as science studies environmental studies philosophy the natural sciences Indigenous studies and critical theory in order to provoke a science education that actively seeks to remake our shared ecological and social spaces in the coming decades and centuries This is an open access book **Regenerative Design** Carlos Cobreros, Emanuele Giorgi, Tiziano Cattaneo, 2025-06-16 This book aims to provide bases for reasoning on what opportunities the regenerative approaches to urban architectural design and development can bring to our territories and living systems environment society city and learning It collects research experiences and considerations from experts that present innovations from different contexts especially from the Latin Mediterranean context The goal of this book is to provide the reader with case studies analysis and guidelines resulting from scientific research from academia and practice The book collects research focused on topics that are nowadays crucial to understand how to intervene in the complicated contexts of socio environmental emergencies These studies are organized into seven sections discussing from the importance of new narrative facing future environmental challenges to the appropriate methodologies and approaches for regenerative culture with systemic view The book closes with outputs dreams and hopes of regenerative design challenges and opportunities to rewrite our alliance with the environment and to move forward our relation with the socio environmental capital Handbook of Global Environmental Politics Peter Dauvergne, 2012-01-01 The second edition of this Handbook contains more than 30 new and original articles as well six essential updates by leading scholars of global environmental politics This landmark book maps the latest theoretical and empirical research in this energetic and growing field Captured here are the pioneering and lively debates over concerns for the health of the planet and how they might best be addressed The introduction explores the intellectual trends and evolving parameters in the field of global environmental politics It makes a case for an expansive definition of the field one that embraces an interdisciplinary literature on the connections between global politics and environmental change The remaining chapters are divided into four broad themes states and cooperation global governance the political economy of governance and knowledge and ethics with each section covering key emerging issues In depth explorations are given to topics such as climate change multinational corporations international agreements and UN organizations regulations and business standards trade and international finance multilevel and transnational governance and ecological citizenship Handbook of Global Environmental Politics Second Edition is a comprehensive review of the field and offers cutting edge ideas for further research As such scholars students and policymakers will find themselves looking to it for many years to come **Signs from the Future** Santiago Zabala, 2025-10-28 We are constantly being warned but we seldom heed warnings Cautioned about authoritarian leaders climate change technological dystopias or other catastrophes we fail to take action or even take them seriously Too often warnings are dismissed much like the artists scientists environmentalists and intellectuals who deliver them Why don't we listen Santiago Zabala asks us to think of philosophy as a warning a call to heed ominous signs from the future He argues

that warnings as distinct from predictions invite us to see the possibility of a radical break from the present Predictions tell us to submit to the inevitable but warnings ask us to take part in shaping a different future A philosophy of warnings offers an alternative horizon of understanding beyond the real and the normal and a politics of warnings helps us confront hidden emergencies through collective interpretation listening and action Signs from the Future places thinkers such as Nietzsche Heidegger de Beauvoir and Arendt into conversation with present day politics art and culture drawing our attention to unheeded warnings This timely and engaging book shows why unresolved crises from the past must be interpreted anew today if we are to imagine an equitable future or a future at all

Climate, Land Use, and Fire: Can Models Inform Management? Dominique Bachelet,Gitta Lasslop,John T. Abatzoglou,2021-01-13

Reconstructing Earth's Climate History Kristen St. John,R. Mark Leckie,Kate Pound,Megan Jones,Lawrence Krissek,2021-06-25 Reconstructing Earth s Climate History There has never been a more critical time for students to understand the record of Earth s climate history as well as the relevance of that history to understanding Earth s present and likely future climate There also has never been a more critical time for students as well as the public at large to understand how we know as much as what we know in science This book addresses these needs by placing you the student at the center of learning In this book you will actively use inquiry based explorations of authentic scientific data to develop skills that are

essential in all disciplines making observations developing and testing hypotheses reaching conclusions based on the available data recognizing and acknowledging uncertainty in scientific data and scientific conclusions and communicating your results to others The context for understanding global climate change today lies in the records of Earth's past as preserved in archives such as sediments and sedimentary rocks on land and on the seafloor as well as glacial ice corals speleothems and tree rings These archives have been studied for decades by geoscientists and paleoclimatologists Much like detectives these researchers work to reconstruct what happened in the past as well as when and how it happened based on the often incomplete and indirect records of those events preserved in these archives This book uses guided inquiry to build your knowledge of foundational concepts needed to interpret such archives Foundational concepts include interpreting the environmental meaning of sediment composition determining ages of geologic materials and events supported by a new section on radiometric dating and understanding the role of CO₂ in Earth's climate system among others Next this book provides the opportunity for you to apply your foundational knowledge to a collection of paleoclimate case studies The case studies consider long term climate trends climate cycles major and or abrupt episodes of global climate change and polar paleoclimates New sections on sea level change in the past and future climate change and life and climate change and civilization expand the book's examination of the causes and effects of Earth's climate history In using this book we hope you gain new knowledge new skills and greater confidence in making sense of the causes and consequences of climate change Our goal is that science becomes more accessible to you Enjoy the challenge and the reward of working with scientific data and results Reconstructing Earth's Climate History Second Edition is an essential purchase for geoscience students at a variety of levels studying paleoclimatology paleoceanography oceanography historical geology global change Quaternary science and Earth system science

An Anthology of Global Risk SJ Beard, Tom Hobson, 2024-09-03 This anthology brings together a diversity of key texts in the emerging field of Existential Risk Studies It serves to complement the previous volume The Era of Global Risk An Introduction to Existential Risk Studies by providing open access to original research and insights in this rapidly evolving field At its heart this book highlights the ongoing development of new academic paradigms and theories of change that have emerged from a community of researchers in and around the Centre for the Study of Existential Risk The chapters in this book challenge received notions of human extinction and civilization collapse and seek to chart new paths towards existential security and hope The volume curates a series of research articles including previously published and unpublished work exploring the nature and ethics of catastrophic global risk the tools and methodologies being developed to study it the diverse drivers that are currently pushing it to unprecedented levels of danger and the pathways and opportunities for reducing this In each case they go beyond simplistic and reductionist accounts of risk to understand how a diverse range of factors interact to shape both catastrophic threats and our vulnerability and exposure to them and reflect on different stakeholder communities policy mechanisms and theories of change that can help to mitigate and manage this risk Bringing together experts from across diverse disciplines the anthology provides an accessible survey of the current state of the art in this emerging field The interdisciplinary and trans disciplinary nature of the cutting edge research presented here makes this volume a key resource for researchers and academics However the editors have also prepared introductions and research highlights that will make it accessible to an interested general audience as well Whatever their level of experience the volume aims to challenge readers to take on board the extent of the multiple dangers currently faced by humanity and to think critically and proactively about reducing global risk

The CEO Playbook for Strategic Transformation Scott A. Snell, 2024-08-13 There is no CEO task more significant than leading change in an organization whose old business model needs updating Large scale change involves rethinking how to engage customers partners and suppliers with new technology

and hard decisions about how to reorganize internal operations plus the challenges of executing the transformation The stakes are high filled with risk and reward obvious to all and it often fails Why Most organizations aren't built for change they're designed for stability scale and repetition Too many things can go wrong from natural organizational resistance and inertia to lack of strategic focus to execution problems And yet organizations today must be more dynamic than ever before Strategy is dynamic not static and requires agility nimbleness rapid resource deployment and organizational change This practical playbook helps CEOs and other key leaders reduce the risks and see through the overwhelming complexity of a major change in organizational strategy Unlike many other books on leading change that focus narrowly on overcoming resistance The CEO Playbook for Strategic Transformation offers a comprehensive framework involving 4 major tasks for leaders 1 Establish and Communicate the Urgent Need 2 Engage Stakeholders 3 Mobilize the Organization and 4 Develop Organizational Agility Leaders who guide their organizations through these stages are far more likely to succeed than those who lack a playbook Professor Scott Snell shares insights based on years of experience working with organizations undergoing change He also provides a set of self assessments frameworks for action and interventions to help senior leaders succeed at their most challenging and important task Practical Succession Management Andrew Munro, 2017-05-15

Succession management often little more than an annual form filling chore and a throwback to chess board charting of 1950s multinationals needs revitalisation to become a key driver of organisational renewal in the twenty first century Whilst recent corporate failings have focused attention on the difficulties of leadership succession those organisations which have made the transition to greatness have understood the impact of strategic resourcing in renewing their leadership capability and character The challenge for organisations is reconciling leadership demand and supply When it may be impossible to say what your organisation will look like in three years time or what strategy it will be pursuing demand becomes difficult to predict And in an era of shifting career realities supply management needs to be more than an analysis of the age profile of the leadership population Practical Succession Management is a response to the increasing relevance of proactive succession management but the widespread difficulty of making it happen The author focuses on the business realities of succession management rather than provide a conceptualisation of how it might work in principle or simply headline a series of corporate just so stories In a robust evaluation of relevant research and imaginative practice Andrew Munro maps out the battlegrounds for succession management with tools and techniques to guide readers from start to finish The result is a book that will stimulate and challenge your thinking in opening up new options and provide practical methodologies to advance strategic resourcing within your organisation **The Uncanny Valley Hypothesis and Beyond** Marcus

Cheetham, 2018-05-02 A field of theory and research is evolving around the question highlighted in the Uncanny Valley Hypothesis How does high realism in anthropomorphic design influence human experience and behaviour The Uncanny Valley Hypothesis posits that a very humanlike character or object e.g. robot prosthetic limb doll can evoke a negative

affective i.e. uncanny state Recent advances in robotic and computer graphic technologies in simulating aspects of human appearance behaviour and interaction have been accompanied therefore by theorising and research on the meaning and relevance of the Uncanny Valley Hypothesis for anthropomorphic design Current understanding of the uncanny idea is still fragmentary and further original research is needed However the emerging picture indicates that the relationship between humanlike realism and subjective experience and behaviour may not be as straightforward as the Uncanny Valley Hypothesis suggests This Research Topic brings together researchers from traditionally separate domains including robotics computer graphics cognitive science psychology and neuroscience to provide a snapshot of current work in this field A diversity of issues and questions are addressed in contributions that include original research review theory and opinion papers Good Microbes in Medicine, Food Production, Biotechnology, Bioremediation, and Agriculture Frans J. de Bruijn, Hauke Smidt, Luca S.
