Manual Asymmetries, Handedness and Motor Performance Pamela Bryden, Andrea Helen Mason, Claudia L. R. Gonzalez, 2016-06-10 The performance of most tasks with one hand typically the right is a uniquely human characteristic Not only do people prefer to use one hand rather than the other but also they usually perform tasks faster and more accurately with this hand The study of manual asymmetries and what such performance differences between the two hands reveal about brain organization and motor function has been a topic of considerable research over the last several decades The aim of this Research Topic is to review and further explore the origins of manual asymmetries and their relationship to handedness unimanual and bimanual motor performance and brain function The articles included here involve original research conducted in humans or non human models species as well as theoretical perspectives review articles and meta analyses

Extensive Air Showers Peter K. F. Grieder, 2010-08-09 Extensive air showers are a very unique phenomenon In the more than six decades since their discovery by Auger and collaborators we have learned a lot about these extremely energetic events and gained deep insight into high energy phenomena particle physics and astrophysics In this Tutorial Reference Manual and Data Book Peter K F Grieder provides the reader with a comprehensive view of the phenomenology and facts of the various types of interactions and cascades theoretical background experimental methods data evaluation and interpretation and air shower simulation He discusses astrophysical aspects of the primary radiation and addresses remaining puzzling questions that cannot yet be answered They remain as a challenge for present and future research in the

field The book is split into two volumes Volume I deals mainly with the basic theoretical framework of the processes that determine an air shower and ends with a summary of ways and means to extract information from air shower observations on the primary radiation It also presents a compilation of data of our current knowledge of the high energy portion of the primary spectrum and composition Volume II contains mainly compilations of data of experimental and theoretical nature as well as predictions from simulations of individual air shower constituents Also included are chapters dedicated exclusively to special processes and detection methods Extensive up to date reference lists appear at the end of each chapter Researchers and students working in the field of cosmic ray detection and astroparticle physics will appreciate finding this book in their library
