Congress. Senate. Committee on Energy and Natural Resources,2013 **Lemon-Aid New and Used Cars and Trucks 2007-2017** Phil Edmonston,2017-03-11 Steers buyers through the the confusion and anxiety of new and used vehicle purchases like no other car and truck book on the market Dr Phil along with George Iny and the Editors of the Automobile Protection Association pull no punches Driving Productivity Anthony J. Knowles,2025-08-28 Driving Productivity reconstructs the industrial histories of the American and German automotive industries in a new light From the Fordist assembly line to Japanese lean production and Industry 4 0 Anthony J Knowles critically examines major technical developments within the historical dynamics of capitalism Both countries face the pressure to automate transform labor and increase efficiency yet their responses differ due to divergent paradigms of integrating business labor and government Driving Productivity makes the case that improving productivity is a never ending process that becomes a compulsory social imperative that industries must respond to but are

nevertheless responded to differently between countries *Lemon-Aid New and Used Cars and Trucks 1990-2016* Phil Edmonston, 2015-11-21 This book steers buyers through the the confusion and anxiety of new and used vehicle purchases unlike any other car and truck book on the market Dr Phil Canada s best known automotive expert for more than forty five years pulls no punches **Workers, Power and Society** Jens Arnholtz, Bjarke Refslund, 2024-06-03 The book addresses how power and power resources remain important analytically as well as empirically dimensions for analysing contemporary capitalism It provides a theoretical framework for studying understanding and explaining changes in the world of work and how that leads to changes in contemporary capitalist societies Changes in the world of work are closely related to increasing inequality growing social unrest and societal polarisation Hence the book seeks to deepen our understanding of how developments in the sphere of work have implication far beyond the direct impact on workers The book focuses on how workers and unions utilise their various power resources to off set the power advantage of employers and capital in the sphere of labour politics which have crucial linkages with both cultural life politics and the market Although workers and unions power and influence have been declining almost universally across the world the argument in the book is that they still hold power resources that can challenge and sometimes alter outcomes in another direction than what employers and capital wants Hence the theory can help understand the possibilities that workers and unions still have and how these resources affect the outcomes of the labour capital struggle A core contribution of the book is that it develops theoretical propositions about power resource theory provides clear definitions of the core concepts as well as apply the power resource theory to a range of new or emerging topic fields like global value chains minimum wages and migrant workers The Future of Healthcare Reform in the United States Anup Malani, Michael H. Schill, 2015-10-15 When the Supreme Court s majority ruling in *NFIB v Sebelius* upheld the Patient Protection and Affordable Care Act the PPACA or Obamacare it was clear that this major shift in American health care provision was here to stay For better or worse the PPACA is now both a target for and a constraint on the next wave of reformist ideas Driven by curiosity about how the American health care regime will continue to evolve in the near and medium term Dean Michael Schill and Professor Anup Malani of the University of Chicago Law School commissioned fourteen essays from leading scholars of law economics medicine and public health that offer predictions for the most important issues and debates in health care reform over the next five to seven years Essays are arranged in five sections Part I ACA and the Law sets the stage with three essays on legal challenges and justifications for the Act Part II ACA and the Federal Budget explores the variety of potential fiscal consequences resulting from Obamacare Part III ACA and Health Care Delivery offers competing viewpoints on what the Act will ultimately mean for consumers of health care Part IV Health Care Costs Innovation and the ACA speculates about what the altered financial structure of health care will mean for the pace of development of new medical technologies Part V ACA and Health Insurance Markets concludes the volume with a pair of contrasting assessments of the prospects for the new insurance exchange

markets **Geopolitics and Business** Čedomir Nestorović, 2023-11-29 This book sheds light on the intricate relationship between geopolitics and business and the essential interdependence between corporations and geopolitics. Despite apparent animosity, practical solutions and theories proposed by geopolitics find resonance within the business world and vice versa. Concepts like critical theory, disruption, hegemony, strategic rivalry, and cost effectiveness hold common ground in both realms even though they have historically been disregarded. Geopolitical authors have often overlooked the vital role played by businesses in shaping global affairs while businesses themselves view geopolitics as a risk to be managed. These contrasting viewpoints have given rise to misunderstandings and misconceptions between the two spheres. The author sets out to bridge the gap between geopolitics and business, exploring how corporations perceive space, state, and power while also analyzing the influence of classical critical and feminist geopolitics on business strategies. This comprehensive analysis reveals that businesses are not mere non-state agents among many but indeed the principal non-state agents in geopolitics. The book is an essential read for scholars, researchers, and professionals seeking a deeper understanding of the dynamic interplay between these critical forces. *The New Domestic Automakers in the United States and Canada* A.J.

Jacobs, 2015-12-16 Over the past forty years, state, provincial, and local governments in the United States and Canada have provided foreign automakers with approximately 4.80 billion in incentives in order to lure light vehicle assembly plants to their areas. This has included tax abatements, infrastructure construction, land giveaways, job training programs, and other subsidies. As of early 2015, ten foreign vehicle makers operated 20 light vehicles in developed North America. Despite the fact that all ten of these automakers have pursued a similar pattern—first exporting vehicles into the United States and Canada before launching vehicle plants in developed North America—each has followed its own specific historical development path and has created its own unique growth trajectory. This book provides a unique historical and qualitative review of these ten vehicle makers from their early beginnings to their export entry into the United States and/or Canada through early 2015. In addition, it chronicles the histories of more than a dozen former automakers and potential future foreign light motor vehicle assembly plants in the United States and Canada. This includes the first foreign automaker to build its cars in the United States, De Dion Bouton of France, in July 1900; the early 20th-century endeavors of Fiat, Mercedes, and Rolls Royce; and the present-day hopes of Chinese and Indian automakers. In the process, the text also provides an assessment of the top competing states and sites for any future plants, the possible incentives packages governments may offer to attract such facilities, and an estimated incentive value for each automaker. Overall, the goal of this book is to expand the knowledge of policymakers at all tiers of government in the United States and Canada and to help them take a more holistic look at the pros and cons of attracting Automobile Manufacturing FDI. It is hoped that this will enable them to make more informed decisions when pursuing a new foreign motor vehicle assembly plant. Its findings should also prove informative to urban and regional planning, political science, sociology, economics, labor, and international development scholars and students in North
