

# MATTER OF RESISTANCE

The background of the cover is a dramatic, low-angle shot of a vast, alien landscape. In the foreground, the backs of two people are visible as they look out over a desolate, mountainous terrain. The sky is a deep, dark purple, with a large, bright, glowing orb (possibly a planet or moon) dominating the upper half. A bright, golden light source, likely a setting or rising sun, is visible on the right side, casting a long, shimmering beam of light across the sky and illuminating the landscape below. The overall mood is one of mystery and grandeur.

**Soil Physics with Python** Marco Bittelli,Gaylon S. Campbell,Fausto Tomei,2015 This innovative study presents concepts and problems in soil physics and provides solutions using original computer programs It provides a close examination of physical environments of soil including an analysis of the movement of heat water and gases The authors employ the programming language Python which is now widely used for numerical problem solving in the sciences In contrast to the majority of the literature on soil physics this text focuses on solving not deriving differential equations for transport Using numerical procedures to solve differential equations allows the solution of quite difficult problems with fairly simple mathematical tools Numerical methods convert differential into algebraic equations which can be solved using conventional methods of linear algebra Each chapter introduces a soil physics concept and proceeds to develop computer programs to solve the equations and illustrate the points made in the discussion Problems at the end of each chapter help the reader practise using the concepts introduced The text is suitable for advanced undergraduates graduates and researchers of soil physics It employs an open source philosophy where computer code is presented explained and discussed and provides the reader with a full understanding of the solutions Once mastered the code can be adapted and expanded for the user s own models fostering further developments The Python tools provide a simple syntax Object Oriented Programming techniques powerful mathematical and numerical tools and a user friendly environment

**Living with Algorithms** Ignacio Siles,2023-04-25 A nuanced account from a user perspective of what it s like to live in a datafied world We live in a media saturated society that increasingly transforms our experiences relations and identities into data

others can analyze and monetize Algorithms are key to this process surveilling our most mundane practices and to many their control over our lives seems absolute In *Living with Algorithms* Ignacio Siles critically challenges this view by surveying user dynamics in the global south across three algorithmic platforms Netflix Spotify and TikTok and finds surprisingly a more balanced relationship Drawing on a wealth of empirical evidence that privileges the user over the corporate Siles examines the personal relationships that have formed between users and algorithms as Latin Americans have integrated these systems into the structures of everyday life enacted them ritually participated in public with and through them and thwarted them Sometimes users follow algorithms Siles finds and sometimes users resist them At times users do both Agency lies in the navigation of the spaces in between By analyzing what we do with algorithms rather than what algorithms do to us *Living with Algorithms* clarifies the debate over the future of datafication and whether we have a say in its development

Concentrating on an understudied region of the global south the book provides a new perspective on the commonalities and differences among users within a global ecology of technologies

Malik, 2021-12-06 This volume addresses various issues related to micronutrient deficiency especially zinc and discusses the possible approaches for combating mineral deficiency among humans and plants The book mainly focuses on the zinc biofortification of vegetable and cereal crops and highlights the consequences of zinc deficiency and the health risks associated with zinc deficiency especially in children and expecting mothers The authors discuss different types of food that are rich in zinc and other minerals how diets can be designed to meet the daily zinc requirements and the impact of zinc deficiency on plant health and quality of agricultural products and the role of micronutrients in abiotic stress tolerance The book also covers sustainable approaches to zinc biofortification in crops such as the microbial solubilization of zinc in soil to improve zinc uptake by plants and the formulation of these microbes into biofertilizers The book will be of interest to dieticians agricultural scientists students and microbiologists

Official Gazette of the United States Patent and Trademark Office , 1993 **China and the WTO** Petros C. Mavroidis, Andre Sapir, 2025-06-17

An examination of China's participation in the World Trade Organization the conflicts it has caused and how WTO reforms could ease them China's accession to the World Trade Organization WTO in 2001 was rightly hailed as a huge step forward in international cooperation However China's participation in the WTO has been anything but smooth with China alienating some of its trading partners particularly the United States The mismatch between the WTO framework and China's economic model has undermined the WTO's ability to mitigate tensions arising from China's size and rapid growth What has to change China and the WTO demonstrates that unilateral pressure by the United States and others is not the answer Instead Petros Mavroidis and Andr Sapir show that if the WTO enacts judicious reforms it could induce China's cooperation leading to a renewed confidence in

the WTO system The WTO and its predecessor the General Agreement on Tariffs and Trade are predicated on liberal domestic policies They managed the previous accessions of socialist countries and big trading nations but none were as large or powerful as China Mavroidis and Sapir contend that for the WTO to function smoothly and accommodate China s unique geopolitical position it needs to translate some of its implicit principles into explicit treaty language To make their point they focus on two core complaints that Chinese state owned enterprises SOEs benefit from unfair trade advantages and that domestic companies private as well as SOEs impose forced technology transfer on foreign companies as a condition for accessing the Chinese market and they lay out specific proposals for WTO reforms In an age of global trade disputes China and the WTO offers a timely exploration of unprecedented challenges to the current multilateral system and fresh ideas for lasting solutions

proud to offer this platform to promote the work of women scientists across all branches of Chemistry At present less than 30% of researchers worldwide are women Long standing biases and gender stereotypes are discouraging girls and women away from science related fields and STEM research in particular Chemistry is no exception to this Science and gender equality are however essential to ensure sustainable development as highlighted by UNESCO In order to change traditional mindsets gender equality must be promoted stereotypes defeated and girls and women should be encouraged to pursue STEM careers

Rhizosphere Functioning and Structural Development as Complex Interplay between Plants, Microorganisms and Soil Minerals Carsten W. Mueller, Andrea Carminati, Christina Kaiser, Jens-Arne Subke, Caroline Gutjahr, 2019-12-19 The rhizosphere the soil volume which is directly affected by root activity is an important hot spot for a multitude of biotic and abiotic processes Carbon transfer from plants to microorganisms and to soil takes place in these small volumes around living roots creating chemical gradients and zones of microbial activity over distinct temporal and spatial scales Hydraulic and biogeochemical properties of the rhizosphere and the formation of complex three dimensional structures such as micro and macroaggregates in turn result from complex feedbacks between physical chemical and biological processes The aim of this Research Topic is to advance our understanding of rhizosphere interactions by collating 16 original contributions across disciplines including original research reviews and specific methods on the processes taking place in the rhizosphere to shed new light on one of the most important interfaces for the diversity of life on earth
