Louis Sullivan Prophet Of Modern Architecture By Hugh Morrison:

Louis Sullivan Hugh Morrison, 2001 The first definitive biography of the now famous architect Hugh Morrison's *Louis Sullivan Prophet of Modern Architecture* is still the best introduction to his work This reissue provides Morrison's original text and illustrations in a larger more modern format It also offers an assessment of Morrison's ground breaking research in Timothy J Samuelson's Introduction and most important an authoritative revision of the chronological List of Buildings including corrections of the data in light of six decades of research Working from Morrison's original notes Samuelson has restored a number of photographic images intended for the original edition and has replaced some photographs with alternate images that more accurately represent the buildings He has also added a selected bibliography of important works about Sullivan Page 4 of cover Form and Function Frank Lloyd Wright, 1935 *LOUIS SULLIVAN AND HIS MENTOR, JOHN HERMAN EDELMANN, ARCHITECT* Charles E. Gregersen Aia Ncarb, 2013 Although the world famous architect Louis Sullivan praised John Edelman at length as a friend philosopher gifted draftsman and above all as his benefactor in his *The Autobiography of an Idea* he avoided any mention of having worked for two years as an apprentice in Edelman's architectural office and the influence that experience obviously had on his future work This book corrects that deficiency in Sullivan's narrative Through a comparison of their buildings and ornamental designs the differences in the approaches of these two men to architectural planning and the debt Sullivan owed to Edelman's unique ornamental style in the development of his own world renowned ornament is demonstrated Edelman is also revealed as the young architect who not only took Sullivan on as an apprentice but in time introduced him to his future partner Dankmar Adler only to be betrayed in the end by Sullivan for having done so Architectural Theory of Modernism Ute Poerschke, 2016-04-20 Architectural Theory of Modernism presents an overview of the discourse on function form concepts from the beginnings in the eighteenth century to its peak in High Modernism Functionalist thinking and its postmodern criticism during the second half of the twentieth century is explored as well as today's functionalism in the context of systems theory sustainability digital design and the information society The book covers among others the theories of Carlo Lodoli Gottfried Semper Eugène Emmanuel Viollet le Duc Louis Sullivan Frank Lloyd Wright Hannes Meyer Adolf Behne CIAM Jane Jacobs Robert Venturi and Denise Scott Brown Charles Jencks William Mitchell and Manuel Castells **Modern Architecture** Adam Sharr, 2018 Adam Sharr tells the story of how modern architecture developed and produced its powerful cultural images Considering the new building materials and techniques which shaped the movement such as innovations in steel and concrete and the advent of air conditioning he concludes by asking whether contemporary architecture remains modern at heart *The Architecture of Luxury* Annette Condello, 2016-03-16 Over the past century luxury has been increasingly celebrated in the sense that it is no longer a privilege or attitude of the European elite or America's leisure class It has become more ubiquitous and now practically everyone can experience luxury even luxury in architecture Focusing on various contexts within Western Europe

Latin America and the United States this book traces the myths and application of luxury within architecture interiors and designed landscapes Spanning from antiquity to the modern era it sets out six historical categories of luxury Sybaritic Lucullan architectural excess rustic neoEuropean and modern and relates these to the built and unbuilt environment taking different cultural contexts and historical periods into consideration It studies some of the ethical questions raised by the nature of luxury in architecture and discusses whether architectural luxury is an unqualified benefit or something which should only be present within strict limits The author argues how the ideas of permissible and impermissible luxury have informed architecture and how these notions of ethical approval have changed from one context to another Providing voluptuous settings for the nobles and the leisure class luxury took the form of not only grand palaces but also follies country and suburban houses private or public entertainment venues and ornate skyscrapers with fast lifts The Architecture of Luxury proposes that in Western societies the growth of the leisure classes and their desire for various settings for pleasure resulted in a constantly increasing level of luxury sought within everyday architecture The Architecture of Use Stephen Grabow, Kent Spreckelmeyer, 2014-10-03 By analyzing ten examples of buildings that embody the human experience at an extraordinary level this book clarifies the central importance of the role of function in architecture as a generative force in determining built form Using familiar twentieth century buildings as case studies the authors present these from a new perspective based on their functional design concepts Here Grabow and Spreckelmeyer expand the definition of human use to that of an art form by re evaluating these buildings from an aesthetic and ecological view of function Each building is described from the point of view of a major functional concept or idea of human use which then spreads out and influences the spatial organization built form and structure In doing so each building is presented as an exemplar that reaches beyond the pragmatic concerns of a narrow program and demonstrates how functional concepts can inspire great design evoke archetypal human experience and help us to understand how architecture embodies the deeper purposes and meanings of everyday life **The Great Chicago Fire** Ross Miller, 2000 A study of the great Chicago fire of 1871 and the rebuilding that followed focusing on how the city manipulated the tragedy into a lasting myth about the modern struggle against adversity
