Kirinyaga A Fable Of Utopia 1 By Mike Resnick:

Race and Utopian Desire in American Literature and Society Patricia Ventura, Edward K. Chan, 2019-10-12 Bringing together a variety of scholarly voices this book argues for the necessity of understanding the important role literature plays in crystallizing the ideologies of the oppressed while exploring the necessarily racialized character of utopian thought in American culture and society Utopia in everyday usage designates an idealized fantasy place but within the interdisciplinary field of utopian studies the term often describes the worldviews of non dominant groups when they challenge the ruling order In a time when white supremacy is reasserting itself in the US and around the world there is a growing need to understand the vital relationship between race and utopia as a resource for resistance Utopian literature opens up that relationship by envisioning and negotiating the prospect of a better future while acknowledging the brutal past The collection fills a critical gap in both literary studies which has largely ignored the issue of race and utopia and utopian studies which has said too little about race

The Utopian Fantastic Martha A. Bartter, 2004-04-30 Utopia forms a major aspect of human desire one that is as important as religion Understanding utopia and the ways in which it can collapse into dystopia is crucial in many disciplines Fantastic literature including science fiction and fantasy is the only form of literature that takes utopia dystopia seriously Therefore analysis of these works provides a basis for serious experimentation in social science In this volume critics analyze contemporary literary thought experiments such as 1984 and We They show how utopian experiments can easily slide into dystopia Exploring these fictional sociocultural political experiments gives us new ways to think about our lives and culture While literature history and political science professors may find this book useful it can also serve as a call to arms to anyone dedicated to maintaining freedom and humane living in the world today

Mutopia Istvan Csicsery-Ronay Jr, 2022-06-15 The Enlightenment's project of establishing scientific proof for the unity of the universe led instead to the fragmentation of knowledge The culture of certainty mutated into a culture of conjecture and speculative supplements as the image of a unified cosmos mutated into a patchwork totality In the process the pursuit of knowledge developed a symbiotic association with science fiction While sf has often provided concrete ideas adopted by the knowledge faculties equally important is the way science fictional counterfactual world building science fiction's fantastic knowledge has intersected with rational speculation in all fields of knowledge As a result the dream of a completed rationally engineered utopia has evolved into the image of mutopia in which the objects of knowledge the process of knowing and the science fictional imagination itself are expected to undergo constant transformation The essays in *Mutopia* address the science fictional imagination's relevance for scientific modeling critical theory the deconstruction of the future the future of religion the future of nations the imagination of empire the construction of aliens the future of science fiction itself and the transformation of utopia into mutopia Written over many years by a leading scholar of science fiction the essays are revised and expanded for republication in this collection alongside new commentary that places them in an updated context

African Climate Futures Carl Death, 2025-06-10 *African Climate Futures* shows how climate changed futures are imagined in Africa and by Africans and how these future visions shape political debates and struggles in the present Scientific climate scenarios forecast bleak futures with increased droughts floods lethal heatwaves sea level rises declining crop yields and greater exposure to vector borne diseases Yet African climate futures could also encompass energy transitions and socio economic revolutions transformed political agency and human subjectivities and radically reparative more than human climate politics At the heart of the book is an original and interdisciplinary approach It studies official climate policy strategies and fictional texts side by side as ecopolitical imaginaries that envision low carbon climate changed futures and narrate pathways from here to there It discusses net zero strategies from Ethiopia The Gambia Nigeria South Africa and Zimbabwe and draws on postcolonial feminist and queer theory arguing that Africanfuturist climate fiction can inspire more radical reparative more than human ecopolitical imaginaries These stories can help us to understand the debts we all owe imagine what reparations might entail and explore the contours of living convivially alongside more than human others in heterotopian climate changed futures Stories can help

explore how we might feel in climate changed futures and can help us to narrate a path through them This book uses Africanfuturist climate fiction to inspire new ways of challenging and enriching theoretical debates in global climate change politics including how we understand the places temporalities ecologies and politics of climate futures If we want to survive to tell new stories in liveable futures then we need to urgently and radically transform carboniferous capitalism Oxford
