Made in Brooklyn Amanda Wasielewski, 2018-06-29 Made in Brooklyn provides a belated critique of the Maker Movement from its origins in the nineteenth century to its impact on labor and its entanglement in the neoliberal economic model of the tech industry This critique is rooted in a case study of one neighborhood in Brooklyn where artists occupy former factory buildings as makers Although the Maker Movement promises to revitalize the city and its dying industrial infrastructure by remaking these areas as centers of small scale production it often falls short of its utopian ideals Through her analysis of the Maker Movement the author addresses broader questions around the nature of artistic work after the internet as well as what the term hipster means in the context of youth culture gentrification labor and the influence of the internet Part history part ethnography this book is an attempt to provide a unified analysis of how the tech industry has infiltrated artistic practice and urban space
