New Studies in the History of American Slavery Edward E. Baptist, Stephanie M. H. Camp, 2006-01-01 These essays by some of the most prominent young historians writing about slavery fill gaps in our understanding of such subjects as enslaved women the Atlantic and internal slave trades the relationships between Indians and enslaved people and enslavement in Latin America Inventive and stimulating the essays model the blending of methods and styles that characterizes the new cultural history of slavery s social political and economic systems Several common themes emerge from the volume among them the correlation between race and identity the meanings contained in family and community relationships gender and life s commonplaces and the literary and legal representations that legitimated and codified enslavement and difference Such themes signal methodological and pedagogical shifts in the field away from master slave or white black race relations models toward perspectives that give us deeper access to the mental universe of slavery Topics of the essays range widely including European ideas about the reproductive capacities of African women and the process of making race in the Atlantic world the contradictions of the assimilation of enslaved African American runaways into Creek communities the consequences and meanings of death to Jamaican slaves and slave owners and the tensions between midwifery as a black cultural and spiritual institution and slave midwives as health workers in a plantation economy Opening our eyes to the personal the contentious and even the intimate these essays call for a history in which both enslaved and enslavers acted in a vast human drama of bondage and freedom salvation and damnation wealth and exploitation

A Revolt Against Liberalism A. A. M. van der Linden,1996 This is the first study to provide a comprehensive picture of the revolt brought about by American radical historians in the 1960s and 1970s With the turbulent sixties as a backdrop the work of radical luminaries like Eugene Genovese Herbert Gutman Staughton Lynd William Appleman Williams and Howard Zinn is discussed These historians made a significant contribution to present day notions about slavery working class history the New Deal the Cold War and a wealth of other subjects Their main target was American liberalism Radical criticism centered on the liberal concepts of the division of power and of the nature of man The acrimonious debate which ensued tore the historical profession apart Therefore most historians have stressed the disagreements between liberals and radicals Yet in this study it will be argued that in some respects the radicals were part and parcel of mainstream historiography though they presented a radical version of it Slavery and Sentiment on the American Stage, 1787-1861 Heather S.

[The Oxford Encyclopedia of Women in World History](#) Bonnie G. Smith, 2008 The Encyclopedia of Women in World History captures the experiences of women throughout world history in a comprehensive 4 volume work Although there has been extensive research on women in history by region no text or reference work has comprehensively covered the role women have played throughout world history The past thirty years have seen an explosion of research and

effort to present the experiences and contributions of women not only in the Western world but across the globe. Historians have investigated women's daily lives in virtually every region and have researched the leadership roles women have filled across time and region. They have found and demonstrated that there is virtually no historical social or demographic change in which women have not been involved and by which their lives have not been affected. The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences and illuminates how women worldwide have influenced and been influenced by these historical social and demographic changes. The Encyclopedia contains over 1,250 signed articles arranged in an A-Z format for ease of use. The entries cover six main areas: biographies, geography, and history; comparative culture and society; including adoption, abortion, performing arts, organizations, and movements such as the Egyptian Uprising and the Paris Commune; women's and gender studies; and topics in world history that include slave trade, globalization, and disease. With its rich and insightful entries by leading scholars and experts, this reference work is sure to be a valued go-to resource for scholars, college and high school students, and general readers alike.

Thirty Years' View; or a history of the working of the American Government for thirty years, from 1820 to 1850: chiefly taken from the Congress Debates, the private papers of General Jackson, and the speeches of ex-Senator Benton, with his actual view of men and affairs. With historical notes and illustrations, and some notices of eminent deceased contemporaries. By a Senator of thirty years [i.e. T. H. Benton]. United States, 1856

The Cambridge History of American Literature: Volume 2, Prose Writing 1820-1865 Sacvan Bercovitch, Cyrus R. K. Patell, 1994. This is the fullest and richest account of the American Renaissance available in any literary history. The narratives in this volume made for a four-fold perspective on literature: social, cultural, intellectual, and aesthetic. Michael D. Bell describes the social conditions of the literary vocation that shaped the growth of a professional literature in the United States. Eric Sundquist draws upon broad cultural patterns; his account of the writings of exploration, slavery, and the frontier is an interweaving of disparate voices, outlooks, and traditions. Barbara L. Packer's sources come largely from intellectual history, the theological and philosophical controversies that prepared the way for transcendentalism. Jonathan Arac's categories are formalist; he sees the development of antebellum fiction as a dialectic of prose genres, the emergence of a literary mode out of the clash of national, local, and personal forms. Together, these four narratives constitute a basic reassessment of American prose writing between 1820 and 1865. It is an achievement that will remain authoritative for our time and that will set new directions for coming decades in American literary scholarship.
