Teaching about the Work Values of Europeans Anke Uhlenwinkel,2010 The European Values Education EVE project is a large scale cross national and longitudinal survey research program on basic human values The main topic of its first stage was work in Europe Student teachers of several universities in Europe worked together in multicultural exchange groups Their results are presented in this issue **Development and Work Ethic in sub-Saharan Africa** Toon van Eijk,2009-06-25 Lagging economic development in Africa has been attributed to many causes but the prevailing work ethic is never mentioned as a possible constraint to development in the formal literature Obviously this is a politically and culturally sensitive issue A discussion of the work ethic can easily degenerate into paternalistic and racist reflections The author manages to discuss it in a social scientific manner without lapsing into platitudes In this book development is seen as a process of long term evolution in which people are central Development is about changes in individual and collective behaviour The work ethic is a crucial component of human behaviour The work ethic is discussed in relation to the process of disciplining to labour in North Western Europe and in relation to issues such as gender Christianity the invention of the mechanical clock the Industrial Revolution geography the state the mimetic desire and the belief in a technological fix

Welfare for Markets Anton Jäger,2024-05-31 A sweeping intellectual history of the welfare state s policy in waiting The idea of a government paying its citizens to keep them out of poverty now known as basic income is hardly new Often dated as far back as ancient Rome basic income s modern conception truly emerged in the late nineteenth century Yet as one of today s most controversial proposals it draws supporters from across the political spectrum In this eye opening work Anton Jäger and Daniel Zamora Vargas trace basic income from its rise in American and British policy debates following periods of economic tumult to its modern relationship with technopopulist figures in Silicon Valley They chronicle how the idea first arose in the United States and Europe as a market friendly alternative to the postwar welfare state and how interest in the policy has grown in the wake of the 2008 credit crisis and COVID 19 crash An incisive comprehensive history Welfare for Markets tells the story of how a fringe idea conceived in economics seminars went global revealing the most significant shift in political culture since the end of the Cold War **The Handbook of Work and Health Psychology** Marc J.

hydro political networks and dynamically challenge the mainstream powers and politics *Anthropology in the Age of Technology* Paul van Dijk, 2022-05-16 This book is the first to discuss for an English speaking audience the ideas of the German Jewish man of letters thinker and activist G nther Anders Anders is one of few philosophers to deal intensely with the moral consequences of Auschwitz and Hiroshima He can rightly be called the philosopher of the atomic age and his thinking a philosophy of modern technology In biting manifestoes sharp aphorisms and penetrating essays in stirring diary notes and political fables Anders strikes out the age in which we live As a twentieth century visionary he exposes the absence of the moral and social imaginations that is necessary to prevent our history from ending in a total catastrophe In the gap between our technical creations and our utter inability to imagine their destructive potential lies the basis for the unstoppable activity of this practical philosopher From every possible angle he attempts to comprehend this modern schizophrenia in its roots and consequences Anders is one of the most important thinkers of the twentieth century He tried to describe and analyze the variety of manifestations of the self destructive progress of our technical civilization which makes humanity into an antiquated sort He diagnosed countless important problems ranging from the world of media to the dictates of the world of machinery and he investigated their social political and philosophical meaning To read his writings is more than becoming acquainted with a rich and colorful philosopher It is more than an encounter with a moving and passionate individual It is ultimately a confrontation with oneself with our own guilt and responsibility with our personal hopes and fears with our lack of imagination and with our need to recover it Ethical Consensus and the Truth of Laughter Hub Zwart, 1996 We participate in moral debate instead of taking established morality for granted because of our discontent with the moral discourse already existing We feel that something is distorted or concealed that something remains to be said One of the strategies to expose the deficiencies of established discourse is critical argument but under certain specific historical circumstances the apparent self evidence of established moral discourse has gained such a dominance has acquired such an ability to conceal its basic vulnerability that its validity simply seems beyond contestation Notwithstanding our discontent we remain unable to challenge the established truth effectively Then all of a sudden its vulnerability is revealed and this is the experience of laughter Moral criticism is preceded by laughter In fact all crucial transformations that emerged in the history of morality were accompanied by and made possible by laughter and moral criticism is basically and originally a comic genre After drawing an outline of the present moral regime in chapter one the moral significance of laughter is recovered with the help of four philosophers of laughter in chapter two namely Bakhtin Nietzsche Bataille and Foucault Laughter allows reality to appear in a certain light it contains a basic truth it is a philosophical principle in its own right that cannot be reduced to or identified with the truth of science In the subsequent chapters it is shown how three crucial moral transformations occurring in the fourth century B C the sixteenth century A D and the nineteenth century A D evolved out of an experience of laughter articulated by three outstanding protagonists of laughter presented in this book Socrates Luther and Ibsen Finally the

significance of the experience of laughter in view of the present is discussed *Better Work* Monique Kremer, Robert Went, Godfried Engbersen, 2021-11-13 This Open Access book provides a thorough analysis of the quality of work in the Netherlands and suggests policy proposals to promote and facilitate good work for more people New technology flexibilization and the intensification of work will have significant consequences for all those who will still have jobs in the future and much less studied so far for the quality of their work Good work is essential for general well being for the individual s quality of life for the economy and for society Good work for everyone should therefore be seen as an important aspiration for companies institutions social partners and governments An essential read for an international audience of academics in the field of the sociology of work labor economics and social policy as well as for policymakers and researchers of trade unions and representatives of other social movements *Arbeid, een eigenaardig medicijn* Hans Achterhuis, 1984 Historische en filosofische beschouwingen over de plaats van betaalde arbeid in de maatschappij **Fashion and Utopia in Management Thinking** René ten Bos, 2000-01-01 Building upon some rather unusual sources in postmodern theory the author argues that management fashion might encourage the practitioner to engage in philosophical self examination and to adopt alternative forms of understanding However it is also argued that management fashion often fails to keep up to this promise because it remains paradoxically incapable of laying off its rationalist cloak BOOK JACKET **Civic Driven Change through Self-Empowerment** Toon van Eijk, 2010 In recent years foreign aid has been increasingly criticized for not being very effective A promising new concept and methodology in the discourse on development is Civic Driven Change CDC This form of bottom up and participatory aided change certainly enriches the debate on development Nevertheless some challenging aspects in its operationalization remain to be solved The biggest problem in CDC might be that the analysis of the multi dimensional process of development remains too superficial to create significant impact The role of citizens as agents of development is indisputable and a redesign of states and markets from within is essential This however not only implies that the citizens themselves as the building blocks of societal institutions must develop civic agency They also need to access the deeper more inner levels of human consciousness Societal transformation demands above all personal transformation If you want to change the world start with yourself *Ontwikkeling en arbeidsethos in Sub-Sahara Afrika* Toon van Eijk, 2007 Meesterstukken uit de filosofie , 2001 **Het tijdperk van de maatschappij** Walter Weyns, 2004 Sociaal wetenschappelijke essays over de postmoderne samenleving het teloorgaan van traditionele begrippen van maatschappij cultuur en persoonlijkheid en over de onoverzichtelijkheid onzekerheid instabiliteit en permanente onduidelijkheid in het hedendaagse sociale leven **Ondubbelzinnig / druk 1 / ING** H.
